Get the Edge at Craps Sharpshooter,2003-10 This is the book craps players have been waiting for! For the first time ever, the casino's worst nightmare, the amazing player known as 'Sharpshooter', reveals his secrets for getting the edge at craps -- how to control the dice when you shoot in order to reduce the appearance of certain numbers (the 7!) and increase the appearance of other numbers. If you learn Sharpshooter's methods of dice control or 'rhythmic rolling', craps becomes not only a beatable game but a money maker for the player.

Review of Progress in Quantitative Nondestructive Evaluation Donald O. Thompson,Dale E. Chimenti,2013-12-01 This volume (Parts A and B) contains the edited papers presented at the annual Review of Progress in Quantitative Nondestructive Evaluation held at Bowdoin College, Brunswick, ME on July 24-28, 1989. The Review was organized by the Center for Advanced NDE at the Ames Laboratory of the U. S. Department of Energy, in cooperation with the Office of Basic Energy Sciences, USDOE, and the Materials Laboratory at Wright-Patterson Air Force Base. The statistics for the 1989 Review of Progress in QNDE include a total of over 460 participants from the U. S. and nine foreign countries who presented some 325 papers. Over the years this conference has grown into one of the largest, most significant gatherings of NDE researchers and engineers in the world. The meeting was divided into 35 sessions, with as many as four sessions running concurrently, and covering all stages of NDE development from basic research investigations to early engineering applications and all methods of inspection science from ultrasonics to x-ray tomography. The Editors have organized the papers in the Proceedings according to topical subject headings, rather than in the original order of presentation. This rearrangement yields a more user-friendly reference work and follows a pattern now familiar to regular attendees of the Review. Some changes in the headings and their subcategories have been introduced to accommodate dynamic evolution of the field, as we observe it.

Introduction to Visual SLAM Xiang Gao,Tao Zhang,2021-09-28 This book offers a systematic and comprehensive introduction to the visual simultaneous localization and mapping (vSLAM) technology, which is a fundamental and essential component for many applications in robotics, wearable devices, and autonomous driving vehicles. The book starts from very basic mathematic background knowledge such as 3D rigid body geometry, the pinhole camera projection model, and nonlinear optimization techniques, before introducing readers to traditional computer vision topics like feature matching, optical flow, and bundle adjustment. The book employs a light writing style, instead of the rigorous yet dry approach that is common in academic literature. In addition, it includes a wealth of executable source code with increasing difficulty to help readers understand and use the practical techniques. The book can be used as a textbook for senior undergraduate or graduate students, or as reference material for researchers and engineers in related areas.

RGB-D Image Analysis and Processing Paul L. Rosin,Yu-Kun Lai,Ling Shao,Yonghuai Liu,2019-10-26 This book focuses on the fundamentals and recent advances in RGB-D imaging as well as covering a range of RGB-D applications. The topics covered include: data acquisition, data quality assessment, filling holes, 3D reconstruction, SLAM, multiple depth camera systems, segmentation, object detection, salience detection, pose estimation, geometric modelling, fall detection, autonomous driving, motor rehabilitation therapy, people counting and cognitive service robots. The availability of cheap RGB-D sensors has led to an explosion over the last five years in the capture and application of colour plus depth data. The addition of depth data to regular RGB images vastly increases the range of applications, and has resulted in a demand for robust and real-time processing of RGB-D data. There remain many technical challenges, and RGB-D image processing is

an ongoing research area. This book covers the full state of the art, and consists of a series of chapters by internationally renowned experts in the field. Each chapter is written so as to provide a detailed overview of that topic. RGB-D Image Analysis and Processing will enable both students and professional developers alike to quickly get up to speed with contemporary techniques, and apply RGB-D imaging in their own projects.

Intelligent Robotics and Applications Ming Xie, Youlun Xiong, Caihua Xiong, Zhencheng Hu, 2009-12-14 The market demands for skills, knowledge and personalities have positioned robotics as an important field in both engineering and science. To meet these challenging demands, robotics has already seen its success in automating many industrial tasks in factories. And, a new era will come for us to see a greater success of robotics in non-industrial environments. In anticipating a wider deployment of intelligent and autonomous robots for tasks such as manufacturing, eldercare, homecare, edutainment, search and rescue, de-mining, surveillance, exploration, and security missions, it is necessary for us to push the frontier of robotics into a new dimension, in which motion and intelligence play equally important roles. After the success of the inaugural conference, the purpose of the Second International Conference on Intelligent Robotics and Applications was to provide a venue where researchers, scientists, engineers and practitioners throughout the world could come together to present and discuss the latest achievement, future challenges and exciting applications of intelligent and autonomous robots. In particular, the emphasis of this year's conference was on "robot intelligence for achieving digital manufacturing and intelligent automations." This volume of Springer's Lecture Notes in Artificial Intelligence and Lecture Notes in Computer Science contains accepted papers presented at ICIRA 2009, held in Singapore, December 16-18, 2009. On the basis of the reviews and recommendations by the international Program Committee members, we decided to accept 128 papers having technical novelty, out of 173 submissions received from different parts of the world.

Raining Fire Rajan Khanna, 2017-07-18 Ben Gold, former airship pilot has lost everything: his airship, his friends, and Miranda, the woman he loves. All that he has left is a thirst for revenge, a reckless plan to sate it, and some journal entries from Miranda to help ground him in the chaos. As he spirals out of control, he must survive old friends, new enemies, and of course Ferals, the mindless, violent victims of the global pandemic that shattered the world. Meanwhile, the Cabal, a group of scientists on the floating city of Valhalla, are using the disease as a weapon while the militant Valhallans continue their raiding and destruction across the continent. When raiders from Valhalla massacre a town of innocents, Ben finds a new purpose in doing anything he can to undermine their power. Ben must reunite with old friends and find new ones if he is to succeed. Can he overcome the forces arrayed against him in time to save himself—and maybe the world? From the Trade Paperback edition.

Slam Book Ann M. Martin, 2014-04-22 Anna is desperate to be popular, but the key to being

cool has devastating consequences About to start her freshman year of high school, Anna wants more than anything to be popular. At a family reunion, her cousin describes a secret “slam book”—a notebook kids use to write all kinds of comments about one another. Anna decides this may be her key to success. Anna’s friends Paige, Randy, and Jessie quickly jump in on the nasty fun and before long, Anna has realized her dreams of popularity. But the slam book keeps getting meaner, and Paige and Anna start using the book to fight with each other. Soon, Anna comes up with the ultimate prank, using lonely and insecure Cheryl as her means to pull it off. But Anna’s vicious trick may lead to tragic consequences. This ebook features an illustrated personal history of Ann M. Martin, including rare images from the author’s collection.
