The Politics of Anti-Corruption Agencies in Latin America Joseph Pozsgai-Alvarez,2021-11-29 This book investigates the history, development, and current state of anti-corruption agencies in Latin America. In recent decades, specialized anti-corruption agencies have sprung up as countries seek to respond to corruption and to counter administrative and political challenges. However, the characteristics, resources, power, and performance of these agencies reflect the political and economic environment in which they operate. This book draws on a range of case studies from across Latin America, considering both national anti-corruption bodies and agencies created and administered by,

or in close coordination with, international organizations. Together, these stories demonstrate the importance of the political will of reformers, the private interests of key actors, the organizational space of other agencies, the position of advocacy groups, and the level of support from the public at large. This book will be a key resource for researchers across political science, corruption studies, development, and Latin American Studies. It will also be a valuable guide for policy makers and professionals in NGOs and international organizations working on anti-corruption advocacy and policy advice.

Poder Judicial y conflictos políticos. Tomo II. (Chile: 1958-1973) Elizabeth Lira Kornfeld, Brian Loveman, 2021-11-25 En los conflictos y procesos judiciales analizados, se revelan las diferencias ideológicas y políticas existentes en el país, haciendo difícil asegurar la percepción de imparcialidad, de neutralidad e independencia de los tribunales.

Criminal law between war and peace Stefano Manacorda, Adán Nieto Martín, 2009 If subjecting war to law is one of the most important legal achievements of the 20th century, progressing further in that direction is one of the most important challenges for the 21st century. The problems it poses are many: the term “war” has formally fallen into disuse and we talk about “peacekeeping”; armies are today the product of cooperation between states and international organizations; private contractors increasingly participate in warlike activities, as the case of the Iraq war demonstrates; and the lines between war and very serious forms of crime (terrorism, organized crime) are increasingly blurred. This volume compiles the contributions presented at XVth International Congress on Social Defence, and tackle the criminal-legal issues raised by these new scenarios. It constitutes an innovative volume, gathering together the work of both academic and military authors, who have drawn on their theoretical and practical experience.
