*Eine Billion Dollar* Andreas Eschbach,2001 John Salvatore Fontanelli, Sohn eines New Yorker Schuhmachers italienischer Abstammung, erbt unerwartet ein Vermögen, dessen Grundstein ein florentinischer Kaufmann im 16. Jahrhundert gelegt hat, und das in den seither vergangenen 500 Jahren mit Zins und Zinseszins auf eine Billion Dollar angewachsen ist. Der Erbe dieses Vermögens, so verheißt ein Testament, werde mit seiner Hilfe der Menschheit die verlorene Zukunft zurückgeben. Um diese Prophezeiung zu erfüllen, macht sich Fontanelli auf eine abenteuerliche Reise durch Politik, Wirtschaft und Ökologie, und er lernt bald: Die Welt retten ist gar nicht so einfach, auch wenn man guten Willens ist und sehr viel Geld besitzt.

**Eine Billion Dollar** Andreas Eschbach,2009-03-17 Stell dir vor, du wirst über Nacht zum reichsten Menschen der Welt... John Salvatore Fontanelli ist ein armer Schlucker, bis er eine unglaubliche Erbschaft macht: ein Vermögen, das ein entfernter Vorfahr im 16. Jahrhundert hinterlassen hat und das durch Zins und Zinseszins in fast 500 Jahren auf über eine Billion Dollar angewachsen ist. Der Erbe dieses Vermögens, so heißt es im Testament, werde einst der Menschheit die verlorene Zukunft wiedergeben. John tritt das Erbe an. Er legt sich Leibwächter zu, verhandelt mit Ministern und Kardinälen. Die schönsten Frauen liegen ihm zu Füßen. Aber kann er noch jemandem trauen? Und dann erhält er einen Anruf von einem geheimnisvollen Fremden, der zu wissen behauptet, was es mit dem Erbe auf sich hat ... Mit *Eine Billion Dollar* hat Bestsellerautor Andreas Eschbach einen spannenden Thriller über Moral und Habgier geschrieben.

**One Trillion Dollars** Andreas Eschbach,2014-08-15 What would you do if you were the richest person in the world overnight? Yesterday John Fontanelli was just a pizza delivery guy in New York City. One day later he's the richest man in the world. One trillion dollars: \$1,000,000,000,000! More money than anyone could imagine. For generations the Vacchis, an old Italian family of lawyers and asset managers, had supervised the fortune as it grew over five hundred years, until one particular date that the benefactor had stipulated in his will. The youngest male descendant would be fated to oversee the fortune for the good of humanity. John relishes his new life of luxury, rubbing elbows with royalty, buying up corporations, fielding a flood of beautiful women – until one day the phone rings, and a mysterious stranger tells the trillionaire that he knows what dirty secrets lie behind the fortune... Bestselling author Andreas Eschbach's »One Trillion Dollars« is a thriller that pits morality and choice against the lust for material goods – at any cost. This novel inspired the Paramount+ television series *One Billion Dollars*.

Carroll,Chunka Mui,2008-09-11 "This book is your chance to learn from others' mistakes."-- Entrepreneur In the 1960s, IBM CEO Tom Watson called an executive into his office after his venture lost \$10 million. The man assumed he was being fired. Watson told him, "Fired? Hell, I spent \$10 million educating you. I just want to be sure you learned the right lessons." There are thousands of books about successful companies but virtually none about the lessons to be learned from those that crash and burn. Now Paul Carroll and Chunka Mui draw on research into more than 750 flameouts to reveal the seven biggest reasons for business failure.

**Metal Men** A. Craig Copetas,2014-05-27 This true story of the multibillionaire who fled to Switzerland "reads like a mystery novel" (USA Today). How did Marc Rich make over ten billion dollars while paying hardly any taxes? Journalist A. Craig Copetas infiltrated the inner circle of the commodities market and Rich's associates to show not only how the metals and minerals trader pulled off the scam, becoming one of America's most wanted criminals, but also how other traders have used the same model to evade taxes as well. A continuing figure of controversy even after his death, Rich, a hedge fund manager and the founder of Glencore, was wanted for evading almost ninety million dollars in taxes and if caught, could have spent life in prison. From a former staff reporter at The Wall Street Journal, *Metal Men* is a story of international intrigue spanning the globe, from the inside of the White House to the Kremlin, a brilliantly researched work that exposes the inner workings of one of country's largest scams. "Mr. Copetas is at his best evoking the high-stakes, fast-paced life of the commodities traders: the greed and corruption that consume them are the stuff of high drama." –The New York Times Book Review

**A multi-billion-dollar opportunity – Repurposing agricultural support to transform food systems** Food and Agriculture Organization of the United Nations,United Nations Development Programme,United Nations Environment Programme,2021-09-14 Public support mechanisms for agriculture in many cases hinder the transformation towards healthier, more sustainable, equitable, and efficient food systems, thus actively steering us away from meeting the Sustainable Development Goals and targets of the Paris Agreement. This report sets out the compelling case for repurposing harmful agricultural producer support to reverse this situation, by optimizing the use of scarce public resources, strengthening economic recovery from the COVID-19 pandemic, and ultimately driving a food systems transformation that can support global sustainable development commitments. The report provides policymakers with an updated estimate of past and current agricultural producer support for 88 countries, projected up until 2030. The trends emerging from the analysis are a clear call for action at country, regional and global levels to phase out the most distortive, environmentally and socially harmful support, such as price incentives and coupled subsidies, and redirecting it towards investments in public goods and services for agriculture, such as research and development and infrastructure, as well as decoupled fiscal subsidies. Overall, the analysis highlights that, while removing and/or

reducing harmful agricultural support is necessary, repurposing initiatives that include measures to minimize policy trade-offs will be needed to ensure a beneficial outcome overall. The report confirms that, while a few countries have started repurposing and reforming agricultural support, broader, deeper, and faster reforms are needed for food systems transformation. Thus, it provides guidance (in six steps) on how governments can repurpose agricultural producer support – and the reforms this will take.

**Lord of All Things** Andreas Eschbach, 2014 Winner of the 2012 Kurd-Laßwitz-Preis They are just children when they first meet: Charlotte, daughter of the French ambassador, and Hiroshi, a laundress's son. One day on the playground, Hiroshi declares that he has an idea that will change the world. An idea that will sweep away all differences between rich and poor. When Hiroshi runs into Charlotte several years later, he is trying to build a brighter future through robotics. Determined to win Charlotte's love, he resurrects his childhood dream, convinced that he can eradicate world poverty by pushing the limits of technology beyond imagination. But as Hiroshi circles ever closer to realizing his vision, he discovers that his utopian dream may contain the seeds of a nightmare—one that could obliterate life as we know it. Crisscrossing the globe, from Tokyo to the hallowed halls of MIT to desolate Arctic islands and Buenos Aires and beyond—far beyond—Lord of All Things explores not only technology's dizzying potential, but also its formidable dangers.

**Lifelines of Our Society** Dirk Van Laak, 2023-08-01 A comprehensive history and examination of global infrastructures and the outsized role they play in our lives. Infrastructure is essential to defining how the public functions, yet there is little public knowledge regarding why and how it became today's strongest global force over government and individual lives. Who should build and maintain infrastructures? How are they to be protected? And why are they all in such bad shape? In *Lifelines of Our Society*, Dirk van Laak offers broad audiences a history of global infrastructures—focused on Western societies, over the past two hundred years—that considers all their many paradoxes. He illustrates three aspects of infrastructure: their development, their influence on nation building and colonialism, and finally, how individuals internalize infrastructure and increasingly become not only its user but regulator. Beginning with public works, infrastructure in the nineteenth century carried the hope that it would facilitate world peace. Van Laak shows how, instead, it transformed to promote consumerism's individual freedoms and our notions of work, leisure, and fulfillment. *Lifelines of Our Society* reveals how today's infrastructure is both a source and a reflection of concentrated power and economic growth, which takes the form of cities under permanent construction. Symbols of power, van Laak describes, come with vulnerability, and this book illustrates the dual nature of infrastructure's potential to hold nostalgia and inspire fear, to ease movement and govern ideas, and to bring independence to the nuclear family and control governments of the Global South.

**I'm Feeling Lucky** Douglas Edwards, 2011-07-12 A marketing director's story of working at a startup called Google in the early days of the tech boom: “Vivid inside stories . . . Engrossing” (Ken Auletta). Douglas Edwards wasn't an engineer or a twentysomething fresh out of school when he received a job offer from a small but growing search engine company at the tail end of the 1990s. But founders Larry Page and Sergey Brin needed staff to develop the brand identity of their brainchild, and Edwards fit the bill with his journalistic background at the San Jose Mercury News, the newspaper of Silicon Valley. It was a change of pace for Edwards, to say the least, and put him in a unique position to interact with and observe the staff as Google began its rocket ride to the top. In entertaining, self-deprecating style, he tells his story of participating in this moment of business and technology history, giving readers a chance to fully experience the bizarre mix of camaraderie and competition at this phenomenal company. Edwards, Google's first director of marketing and brand management, describes the idiosyncratic Page and Brin, the evolution of the famously nonhierarchical structure in which every employee finds a problem to tackle and works independently, the races to develop and implement each new feature, and the many ideas that never came to pass. *I'm Feeling Lucky* reveals what it's like to be “indeed lucky, sort of an accidental millionaire, a reluctant bystander in a sea of computer geniuses who changed the world. This is a rare look at what happened inside the building of the most important company of our time” (Seth Godin, author of *Linchpin*). “An affectionate, compulsively readable recounting of the early years (1999–2005) of Google . . . This lively, thoughtful business memoir is more entertaining than it really has any right to be, and should be required reading for startup aficionados.” —Publishers Weekly, starred review “Edwards recounts Google's stumbles and rise with verve and humor and a generosity of spirit. He kept me turning the pages of this engrossing tale.” —Ken Auletta, author of *Greed and Glory on Wall Street* “Funny, revealing, and instructive, with an insider's perspective I hadn't seen anywhere before. I thought I had followed the Google story closely, but I realized how much I'd missed after reading—and enjoying—this book.” —James Fallows, author of *China Airborne*

**Learning from SARS** Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2004-04-26 The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.
