Car Emergency Kit Joseph Krueger, Virginia

Nicols, 2020-03-20 PARTICULARLY GOOD FOR TEENAGERS OR NEW DRIVERS! If you're lucky enough to drive a nice new car, you may not think of it as being part of your emergency plan. But when disaster hits, all drivers can find themselves in trouble! What preparedness habits should all drivers develop? Review them with the latest booklet of the Emergency Preparedness Q&A Mini-Series. A Car Emergency Kit is not the same as a personal survival kit or go-bag. It is focused on the car itself and the car's role in protecting you and your family in a disaster or evacuation. Some of the questions you'll find: What should I be including when it comes to keeping my car ready for emergencies? What's the best way to get gas in an emergency? What tools should I carry in my car? In an emergency, how do I keep from getting lost? Are roadside assistance programs a good idea? As an experienced driver, most of the answers should be familiar to you. They may be brand new, however, to young drivers. All drivers will like the fast read - fewer than 50 pages - and the checklists of good ideas and recommendations. Don't overlook the safety cautions. Authors Virginia S. Nicols and Joseph A. Krueger are long-time car buffs whose background includes military training, disaster response marketing and nearly 20 years of hands-on experience with Community Emergency Response Teams (CERT). 98. 6 Degrees Cody Lundin,2011-05-16 If you breathe and have a pulse, you NEED this book. -Cody Lundin Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense, modern survival skills for the backcountry, the backyard, or the highway. It is the ultimate book on how to stay alive-based on the principal of keeping the body's core temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks, and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor, and plenty of backcountry expertise. Cody Lundin and his Aboriginal Living Skills School have been featured in dozens of national and international media sources, including Dateline NBC, CBS News, USA Today, The Donny and Marie Show, and CBC Radio One in Canada, as well as on the cover of Backpacker magazine. When not teaching for his own school, he is an adjunct faculty member at Yavapai College and a faculty member at the Ecosa Institute. Cody is the only person in Arizona licensed to catch fish with his hands, and lives in a passive solar earth home sixty miles from Prescott, Arizona.
