Digital Photography Ken Milburn,2004 In this absorbing book by professional photographer Milburn, a multitude of expert advice is offered to those who are ready to move to the next level of digital photography and digital image processing. Rather than discussing photography principles, the book focuses on workflow: time-tested, step-by-step procedures based on hard-nosed experience by and for genuine practitioners of the art. 0-596-00547-4\$44.95 / O'Reilly & Associates

Lafore's Windows Programming Made Easy Robert Lafore,1993 Complete with a disk of programs and templates, this guide is based on the fact that one doesn't need to know everything about Windows programming to write programs in Windows. The trick is in knowing what is and isn't important. Lafore explains the essentials and leaves out the extras. Features short, pithy, to-the-point chapters that explain the simplest and fastest ways to perform Windows programming--and a disk that speeds the learning process.

Color Management in Digital Photography Brad Hinkel,2007 Hinkel simplifies the language of color management, based on classes and workshops the author has given to hundreds of students of digital photography. His process for color management is intended to provide enough information to create a simple and effective system allowing the user to focus on creativity instead of technology.

Advances in Iranian Linguistics II Simin Karimi,Narges Nematollahi,Roya Kabiri,Jian Gang Ngui,2023-04-15 This volume offers insight into different aspects of an interesting but fairly understudied language family, opens a path to new inquiries, and provides valuable contribution to linguistics, in general, and to Iranian linguistics, in particular. The articles in this volume offer novel analyses of significant properties of some of the Iranian languages, and contribute to various linguistic subareas such as experimental and historical linguistics as well as the morphology, syntax and semantics of several members of this language family. Specifically, this volume features a few articles on the Ezafe construction which shed new light on this interesting phenomenon of Western Iranian languages from historical, comparative and syntactic points of view. Moreover, a few articles address the syntax and formal semantics of properties of Persian, offering new insight into particular constructions in this language which are also fruitful for the general theory of linguistics. Crucially, all authors raise important questions, opening up the path for further investigations.
