A Path to a Fit and Healthy Life for Beginners James L. Blake Jr.,2019-10-16 We live in a society of instant gratification, and so many people assume that there is a wonder pill out there to help us achieve health, fitness, and wellness. We are also surrounded by countless fad diets and fitness programs, and we can be overwhelmed by the choices. The first step, however, begins with belief. A Path to a Fit and Healthy Life for Beginners is designed to help you become the owner of your fitness and health. Author, fitness trainer, and retired US Army veteran James L. Blake Jr. explains the importance of being healthy throughout our life on this earth. He reminds us that we can't just wait for something bad to happen to motivate us into taking the first steps—we have to take that same attitude now, in the present, before we face the worst, and apply it to our health, fitness, and wellness. It's too easy for us to get caught up society, which is driven by our everyday lives—and then before we know it, it's too late. Wake up to the reality, both for yourself and for your children. As James says, "Personal courage is something that is infused, not given."

Assisted NuMenus ,1996 A rule published by USDA on June 13, 1995 updated and expanded the nutrition standards for school meals to include the Dietary Guidelines for Americans, required nutrients, as well as recommended levels of fat and saturated fat. The rule established specific minimum standards for key nutrients and calories that schools must meet. To help schools implement the updated standards, the rule extended to schools a choice of three options for meal planning to consider. One of these options was nutrient standard menu planning (NuMenus). NuMenus provides a tool for improving the nutritional quality of school meals. This book was designed for those school food authorities who want to use a nutrient-based approach but do not necessary to independently conduct NuMenus. Includes cycle menus, food production records, prep and pull lists, NuMenus recipes, food product specifications, and nutrient analyses.
