Personal Finance 505 J. D. Siwik, 2020-01-07 Personal Finance invokes the sentiment that you should be maxing out your 401k, pay extra on your mortgage, invest in mutual funds, and buy term life insurance. This is the old model. This is the Personal Finance 101 model. The Personal Finance 505 model takes a comprehensive and holistic view on your entire life. The model provides maximum flexibility and options. It adopts to the life and lifestyle you utilize. The secret to early retirement and options is simple. Save more money sooner rather than later. That is the answer. The caveat is HOW you save. It is the flexibility in your model. The Personal Finance 505 model understands that life happens. It understands that life is not a linear job from your 20s until retirement age. It provides you with built in options if and when you need them.

Handbook Of Financial Econometrics, Mathematics, Statistics, And Machine Learning (In 4 Volumes) Cheng Few Lee, John C Lee, 2020-07-30 This four-volume handbook covers important concepts and tools used in the fields of financial econometrics, mathematics, statistics, and machine learning. Econometric methods have been applied in asset pricing, corporate finance, international finance, options and futures, risk management, and in stress testing for financial institutions. This handbook discusses a variety of econometric methods, including single equation multiple regression, simultaneous equation regression, and panel data analysis, among others. It also covers statistical distributions, such as the binomial and log normal distributions, in light of their applications to portfolio theory and asset management in addition to their use in research regarding options and futures contracts. In both theory and methodology, we need to rely upon mathematics, which includes linear algebra, geometry, differential equations, Stochastic differential equation (Ito calculus), optimization, constrained optimization, and others. These forms of mathematics have been used to derive capital market line, security market line (capital asset pricing model), option pricing model, portfolio analysis, and others. In recent times, an increased importance has been given to computer technology in financial research. Different computer languages and programming techniques are important tools for empirical research in finance. Hence, simulation, machine learning, big data, and financial payments are explored in this handbook. Led by Distinguished Professor Cheng Few Lee from Rutgers University, this multi-volume work integrates theoretical, methodological, and practical issues based on his years of academic and industry experience.

Third-Party Litigation Finance Anthony J. Sebok, 2024-01-31 Buy a new version of this textbook and receive access to the Connected eBook on Casebook Connect, including lifetime access to the online ebook with

highlight, annotation, and search capabilities. Access also includes an outline tool and other helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. Litigation finance sits at the intersection of many well-known subjects within the law school curriculum: contracts, torts, civil procedure, evidence, professional responsibility, insurance, and capital markets. There are no professionally produced materials for a professor who wants to teach an entire semester-long course on litigation finance. This casebook is an attempt to fill that gap. Its ten chapters provide a foundation for a two- or three-credit class, although many of the chapters could also be used individually as supplemental material for a free-standing unit on litigation finance in another course, such as torts, civil procedure, or the law of lawyering. Notwithstanding the fact that the law of litigation finance is rapidly developing as investment in litigation and legal services grows, the cases and other materials contained in this book will remain relevant and useful to anyone trying to teach students about this important new body of law. Benefits for instructors and students: Careful selection of the leading cases in the United States about the development and current law of assignment and litigation finance. Diverse selection of secondary source material, including major law review articles, as well as reports and advocacy materials from supporters and critics of litigation finance. Notes following the readings help the student progress through the materials in a logical and coherent manner.
