**Drawing is Thinking** Milton Glaser,2008-11-26 For more than fifty years, Milton Glaser has designed much of the world we live and experience every day. His posters, books, albums, restaurants, advertisements, and so much more have identified him as the preeminent force in design in America. Now, in Drawing is Thinking, Glaser draws upon an amazing vocabulary of images and techniques to create his most personal book to date. In a way, he has not only been drawing all his life, he has been thinking about art and design on that journey. Based on his view that all art has its origin in the impulse to create, he has designed a book that powerfully delineates this position. In Drawing is Thinking, the drawings depicted are meant to be experienced sequentially, so that the viewer not only follows Glaser through these pages, but comes to inhabit his mind. The drawings represent a sweeping range of subject matter taken from the full range of a reflective master's career. The pages suggest that drawing is not simply a way to represent reality, but, as the title implies, a better way to perceive the world. The maker

and the viewer become more attentive, one by creating the work, the other by experiencing it. Glaser's two signature books, *Graphic Design and Art is Work*, are each in print decades after their first appearances. In different ways, each is a display of his work with extended descriptions of how the work came about, and how design problems were visually resolved. But in *Drawing is Thinking* the author is less interested in display. Glaser this time is concerned with how the mind works in its attempt to create reality.--BOOK JACKET.

*Manhattan Out* Raymond Depardon, Paul Virilio, 2008 Raymond Depardon arrived in New York in the winter of 1980. He was visiting a friend who had just taken up a job in the city and to kill time he strolled around the streets with his Leica. He decided to take pictures without ever looking through the camera's viewfinder, working incognito in the nooks and crannies of New York. He amassed two or three rolls a day but at the time was thoroughly disappointed with the results. Depardon never mentioned the work to anyone and only decided to unveil these blind pictures twenty-seven years later. He was surprised to discover that most of his subjects were aware that they were being photographed. Their knowing glances towards the camera lens imbued with a pretence of indifference immortalises the very spirit and charm of this, the ultimate city. Raymond Depardon, born in 1942 in Villefranche-sur-Saône, is a film-maker, photographer and journalist. Co-founder of the agency Gamma in 1967, he travelled the world as a photojournalist and began making documentaries in the Direct Cinema tradition. In 1978 he joined Magnum Photos. In 1991 he was awarded the Grand Prix National de la Photographie and his work *Délits flagrants* won the César for best documentary film in 1995. He has made eighteen feature films and published about forty books. He lives in Paris. Paul Virilio, born in Paris in 1932, is a Senior Professor at the École Spéciale d'Architecture of Paris and was formerly Director and Head of the same institution between 1968 and 1998. After his first philosophical essays, he became the director of the collection *Espace Critique* by éditions Galilée in 1973. He was awarded the Grand Prix National de la Critique in 1987. In 1990, he became the course director at the Collège International de Philosophie when Jacques Derrida was the principal. In 1992, he became a member of the Haut Comité pour le logement des défavorisés, presided by Louis Besson. As an urban designer and an essayist, specialising in strategic questions about new technology, Virilio, has published widely in France and abroad. He has been a supporter of the association Non-Violence XXI, ever since its creation in 2001. He lives in La Rochelle.

**Structures of Image Collections** Howard F. Greisdorf, Brian C. O'Connor, 2007-12-30 Human beings have always had a penchant for collecting images. The challenge today is that almost anything and everything in the world is available as a viewable image. Consequently, say O'Connor and Greisdorf, image collections can no longer be the result of ad hoc processes rooted in antiquated methodologies. To this end, they present the reader with an interdisciplinary approach to the principles, practices and belief systems underlying categorization and image management. The book is divided into three parts: defining the nature of images; describing how images are used; and explaining how and why images are collected (including the mechanics of storage and accessibility). Individual chapters contain a historical perspective on the subject matter and supporting research. Liberally enhanced with illustrations from the authors' own collections. For anyone who cognitively engages with image collections either vocationally or avocationally.

This book aims to be the definitive tome on Mashup development, to stand in the middle of all the other, more API specific books coming out on Google Maps, Flickr, etc. The book shows how to create real world Mashups using all the most popular APIs, such as Google Maps, Flickr, Amazon Web Services, and delicious, and includes examples in multiple different server-side languages, such as PHP, Java, and .NET.

*Your Digital Afterlife* Evan Carroll, John Romano, 2010-11-15 Almost without realizing it, we have shifted toward an all-digital culture. Future heirlooms like family photos, home movies, and personal letters now exist only in digital form, and in many cases they are stored using popular services like Flickr, YouTube, and Gmail. These digital possessions form a rich collection that chronicles our lives and connects us to each other. But have you considered what will happen to your treasured digital possessions when you die? Unfortunately the answer isn't as certain as we might presume. There are numerous legal, cultural, and technical issues that could prevent access to these assets, and if you don't take steps to make them available to your heirs, your digital legacy could be lost forever. Written by the creators of TheDigitalBeyond.com, this book helps you secure your valuable digital assets for your loved ones and perhaps posterity. Whether you're the casual email user or the hyper-connected digital dweller, you'll come away with peace of mind knowing that your digital heirlooms won't be lost in the shuffle. "Death is the final frontier of cyberspace—and this book provides a road map to the key issues, problems and future prospects for bridging this ultimate transition with dignity, security and grace." — Daniel "Dazza" Greenwood, Executive Director of the eCitizen Foundation "To be ahead of one's time usually means stepping to the side of one's time in order to see it clearly. This book does just that, putting our digital lives and afterlives into sharp focus. Fascinating." — David Eagleman, neuroscientist and author
