Handbook of Grammatical Evolution Conor Ryan,Michael
O'Neill,JJ Collins,2018-09-11 This handbook offers a comprehensive
treatise on Grammatical Evolution (GE), a grammar-based
Evolutionary Algorithm that employs a function to map binary strings
into higher-level structures such as programs. GE's simplicity and
modular nature make it a very flexible tool. Since its introduction
almost twenty years ago, researchers have applied it to a vast range of
problem domains, including financial modelling, parallel
programming and genetics. Similarly, much work has been conducted
to exploit and understand the nature of its mapping scheme,
triggering additional research on everything from different grammars
to alternative mappers to initialization. The book first introduces GE to
the novice, providing a thorough description of GE along with
historical key advances. Two sections follow, each composed of
chapters from international leading researchers in the field. The first
section concentrates on analysis of GE and its operation, giving
valuable insight into set up and deployment. The second section
consists of seven chapters describing radically different applications of
GE. The contributions in this volume are beneficial to both novices
and experts alike, as they detail the results and researcher experiences
of applying GE to large scale and difficult problems. Topics include: •
Grammar design • Bias in GE • Mapping in GE • Theory of disruption
in GE • Structured GE • Geometric semantic GE • GE and semantics •

Multi- and Many-core heterogeneous parallel GE · Comparing methods to creating constants in GE · Financial modelling with GE · Synthesis of parallel programs on multi-cores · Design, architecture and engineering with GE · Computational creativity and GE · GE in the prediction of glucose for diabetes · GE approaches to bioinformatics and system genomics · GE with coevolutionary algorithms in cybersecurity · Evolving behaviour trees with GE for platform games · Business analytics and GE for the prediction of patient recruitment in multicentre clinical trials

From Kavad to al-Ghazali Patricia Crone, 2020-12-20 This volume brings together twelve articles by Patricia Crone dealing with pre-Islamic and Islamic religion, law and political thought. The first section focuses on the centuries before Islam, with studies on Mazdakism in Iran and on Islam as the key factor behind the outbreak of Iconoclasm

in Byzantium. The second group of studies looks at problems in legal history, including the codification of the Qur'an, while the third investigates questions of political thought, amongst them a study of early Muslim anarchists, and an examination of the authorship of a work ascribed to al-Ghazali.

Proceedings of the Royal Irish Academy Royal Irish Academy, 1964 Includes also Minutes of [the] Proceedings, and Report of [the] President and Council for the year (beginning 1965/66 called Annual report).

Nigeria Demographic and Health Survey 2008, 2009 The 2008 NDHS is a follow-up to the 1990, 1999, and 2003 NDHS surveys and provides updated estimates of basic demographic and health indicators covered in the earlier surveys. The 2008 NDHS is the first DHS to include the collection of information on violence against women. In addition to presenting national estimates, the report provides estimates of key indicators for rural and urban areas in Nigeria, the six geopolitical zones, and for the first time, the thirty-six states and the Federal Capital Territory (FCT).
