International Financial Statistics, March 2018 International Monetary Fund. Statistics

Dept.,2018-03-01 This paper discusses that for countries that have introduced new currencies, the rates shown in International Financial Statistics (IFS) for the period before the introduction of the most recent currency may be used as conversion factors—they may be used to convert national currency in IFS to US dollar or SDR. In such cases, the factors are constructed by chain linking the exchange rates of the old and the new currencies. The basis used is the value of the new currency relative to the old currency, as established by the issuing agency at the time the new currency was introduced. Notes on

the introduction of new currencies can be found in the Country Notes or in IFS print publication (if recent). Data on members' IMF accounts are presented in the Fund Position section in the country tables and in four world tables. Terms and concepts of IMF accounts and the time series in the country and world tables are explained below.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from

the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
