Mom Life: Perfection Pending Meredith Ethington,2018-02-27 Out-parented at PTA? Out-liked on social media? Fruit from the Sands Robert N. Spengler,2020-09-22 A comprehensive and entertaining historical and botanical review, providing an enjoyable and cognitive read."—Nature The foods we eat have a deep and often surprising past. From almonds and apples to tea and rice, many foods that we consume

today have histories that can be traced out of prehistoric Central Asia along the tracks of the Silk Road to kitchens in Europe, America, China, and elsewhere in East Asia. The exchange of goods, ideas, cultural practices, and genes along these ancient routes extends back five thousand years, and organized trade along the Silk Road dates to at least Han Dynasty China in the second century BC. Balancing a broad array of archaeological, botanical, and historical evidence, *Fruit from the Sands* presents the fascinating story of the origins and spread of agriculture across Inner Asia and into Europe and East Asia. Through the preserved remains of plants found in archaeological sites, Robert N. Spengler III identifies the regions where our most familiar crops were domesticated and follows their routes as people carried them around the world. With vivid examples, *Fruit from the Sands* explores how the foods we eat have shaped the course of human history and transformed cuisines all over the globe.

Delegation in Contemporary Democracies Fabrizio Gilardi, Dietmar Braun, 2006-04-18 Delegation is an ubiquitous social phenomenon linked to the growing differentiation of modern societies. Delegation is one of several different modes of organisation that exist to make collective action successful, but has been overlooked and under-researched. Using a rational choice institutional analysis and principal agent models, this book brings literature on delegation to bureaucracy, electorate to legislature to government within representative democracy together with literature on new

forms of delegation such as non-majoritarian institutions, to provide a more complete and synthetic analysis of delegation in political systems. With a broad and comparative approach, this is an important volume for advanced students, researchers and professionals concerned with delegation in the areas of public policy, public administration and democratic theory.

Delegation and Accountability in Parliamentary Democracies Kaare Strøm, Torbjörn Bergman, Wolfgang C. Müller, 2006-01-19 Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics. The General Editors are Max Kaase, Professor of Political Science, Vice President and Dean, School of Humanities and Social Science, International University Bremen, Germany; and Kenneth Newton, Professor of Comparative Politics, University of Southampton. The series is published in association with the European Consortium for Political Research. Today, parliamentarism is the most common form of democratic government. Yet knowledge of this regime type has been incomplete and often unsystematic. Delegation and Accountability in Parliamentary Democracies offers new conceptual clarity on the topic. This book argues that representative democracies can be understood as chains of delegation and accountability between citizens and politicians. Under parliamentary democracy, this chain of delegation is simple but also long and indirect. Principal-agent theory helps us to understand the perils of democratic delegation, which include the problems of adverse selection and

moral hazard. Citizens in democratic states, therefore, need institutional mechanisms by which they can control their representatives. The most important such control mechanisms are on the one hand political parties and on the other external constraints such as courts, central banks, referendums, and supranational institutions such as those of the European Union. Traditionally, parliamentary democracies have relied heavily on political parties and presidential systems more on external constraints. This new empirical investigation includes all seventeen West European parliamentary democracies. These countries are compared in a series of cross-national tables and figures, and seventeen country chapters provide a wealth of information on four discrete stages in the delegation process: delegation from voters to parliamentary representatives, delegation from parliament to the prime minister and cabinet, delegation within the cabinet, and delegation from cabinet ministers to civil servants. Each chapter illustrates how political parties serve as bonding instruments which align incentives and permit citizen control of the policy process. This is complemented by a consideration of external constraints. The concluding chapters go on to consider how well the problems of delegation and accountability are solved in these countries. They show that political systems with cohesive and competitive parties and strong mechanisms of external constraint solve their democratic agency problems better than countries with weaker control mechanisms. But in many countries political parties are now weakening, and

parliamentary systems face new democratic challenges. Delegation and Accountability in Parliamentary Democracies provides an unprecedented guide to contemporary European parliamentary democracies. As democratic governance is transformed at the dawn of the twenty-first century, it illustrates the important challenges faced by the parliamentary democracies of Western Europe.

The Fruit Forager's Companion Sara Bir, 2018-05-25 Winner – IACP 2019 Reference & Technical Cookbook Award From apples and oranges to pawpaws and persimmons Half of the fruit that grows in yards and public spaces is never picked or eaten. Citrus trees are burdened with misshapen lemons, berries grow in tangled thickets on the roadside, and the crooked rows of abandoned orchards fill with fallen apples. At the same time, people yearn for an emotional connection that's lacking in bland grocery store bananas and tasteless melons. *The Fruit Forager's Companion* is a how-to guide with nearly 100 recipes devoted to the secret, sweet bounty just outside our front doors and ripe for the taking, from familiar apples and oranges to lesser-known pawpaws and mayhaws. Sara Bir—a seasoned chef, gardener, and forager—primes readers on foraging basics, demonstrates gathering and preservation techniques, and presents a suite of recipes including habanero crabapple jelly, lime pickle, pawpaw lemon curd, and fermented cranberry relish. Bir encourages readers to reconnect with nature and believes once the foraging mindset takes control, a new culinary world hiding in plain sight will reveal itself. Written in a witty and welcoming style, *The Fruit Forager's Companion* is a must-have for seekers of both flavor and fun.
