On Trails Robert Moor, 2017-07-04 In 2009, while thru-hiking the Appalachian Trail, Robert Moor began to wonder about the paths that lie beneath our feet: How do they form? Why do some improve over time while others fade? What makes us follow or strike off on our own? Over the course of the next seven years, Moor traveled the globe, exploring trails of all kinds, from the miniscule to the massive. He learned the tricks of master trail-builders, hunted down long-lost Cherokee trails, and

traced the origins of our road networks and the Internet. In each chapter, Moor interweaves his adventures with findings from science, history, philosophy, and nature writing--combining the nomadic joys of Peter Matthiessen with the eclectic wisdom of Lewis Hyde's *The Gift*. Throughout, Moor reveals how this single topic--the oft-overlooked trail--sheds new light on a wealth of age-old questions: How does order emerge out of chaos? How did animals first crawl forth from the seas and spread across continents? How has humanity's relationship with nature and technology shaped the world around us? And, ultimately, how does each of us pick a path through life? With a breathtaking arc that spans from the dawn of animal life to the digital era, *On Trails* is a book that makes us see our world, our history, our species, and our ways of life anew--Book jacket flap.

Bruised Passports Savi Munjal,Vidit Taneja,2022-02-20 As young kids, SAVI and VID, as they are popularly known to their followers, dreamt of travelling the world together. In 2013, they turned this dream into reality with the launch of their travel blog, BRUISED PASSPORTS. And now, countless flights, dreamy destinations and beautiful pictures later, the OG couple of travel has decided to reveal the secret of their carefree and footloose life. With tips, plans and advice inspired by the hurdles and successes they have faced, Savi and Vid tell you how to be successful digital nomads in a post-pandemic world. From financial planning to, risk analysis, to taking that leap of faith, to how to create a brand of your own, BRUISED PASSPORTS promises to be a treasure trove for anyone who wants to take the plunge and set off on a journey to live life on their own terms.

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Management Consulting International Labour Office,2002 New topics covered in this edition include: e-business consulting; consulting in knowledge management; total quality management; corporate governance; social role and responsibility of business; company transformation and renewal; and public administration.

A Month of Italy Chris Brady,2012 New York Times best-selling author Chris Brady demonstrates for readers the art of taking strategic, proper, restorative vacations that reinvigorate one for greater clarity of thought and increased productivity. What can possibly be said about Italy that hasn't been already? Primarily, that you can enjoy it too! Refreshingly relate-able in a genre previously populated by wealthy expats and Hollywood stars, this book chronicles an ordinary family taking an extraordinary trip, and most importantly, paves the way for you to take one of your own! With hilarious wit and fast-paced narrative, Brady thrills with honest commentary on what a trip of a lifetime actually feels like, and most endearingly, he succeeds in convincing you that not only should you take a similar one, but that you will! Within a few pages you'll be visualizing panoramic Tuscan vistas and breaking open the piggy bank, laughing as you turn the pages and dreaming of your own escape.

The Ocean and Cryosphere in a Changing Climate Intergovernmental Panel on Climate Change (IPCC),2022-05-19 The Intergovernmental Panel on Climate Change (IPCC) is the leading international body for assessing the science related to climate change. It provides policymakers with regular assessments of the scientific basis of human-induced climate change, its impacts and future risks, and options for adaptation and mitigation. This IPCC Special Report on the Ocean and Cryosphere in a Changing Climate is the most comprehensive and up-to-date assessment of the observed and projected changes to the ocean and cryosphere and their associated impacts and risks, with a focus on resilience, risk management response options, and adaptation measures, considering both their potential and limitations. It brings together knowledge on physical and biogeochemical changes, the interplay with ecosystem changes, and the implications for human communities. It serves policymakers, decision makers, stakeholders, and all interested parties with unbiased, up-to-date, policy-relevant information. This title is also available as Open Access on Cambridge Core.

Computational Geometry Franco P. Preparata,Michael I. Shamos,2012-12-06 From the reviews: This book offers a coherent treatment, at the graduate textbook level, of the field that has come to be known in the last decade or so as computational geometry. ... The book is well organized and lucidly written; a timely contribution by two founders of the field. It clearly demonstrates that computational geometry in the plane is now a fairly well-understood branch of computer science and mathematics. It also points the way to the solution of the more challenging problems in dimensions higher than two. #Mathematical Reviews#1 ... This remarkable book is a comprehensive and systematic study on research results obtained especially in the last ten years. The very clear presentation concentrates on basic ideas, fundamental combinatorial structures, and crucial algorithmic techniques. The plenty of results is cleverly organized following these guidelines and within the framework of some detailed case studies. A large number of figures and examples also aid the understanding of the material. Therefore, it can be highly recommended as an early graduate text but it should prove also to be essential to researchers and professionals in applied fields of computer-aided design, computer graphics, and robotics. #Biometrical Journal#2

Two Sides of a Barricade Christian Scholl, 2012-01-01 Two Sides of a Barricade argues that to construct global democracy, conflict and dissent must be taken seriously. Christian Scholl explores the political significance of the confrontations within four sites of interaction: bodies, space, communication, and law. Each site of struggle provides a different entry point to understand the influence of protester and police tactics on each other. At the same time, the four sites of struggle allow a comprehensive analysis of how the contestation of global hegemonic forces during summit protests trigger a preemptive shift in social control through increased deployment of biopolitical forms of power.

Networks of Outrage and Hope Manuel Castells, 2015-06-04 Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

Maritime Cybersecurity Steven D Shepard, PhD, Gary C Kessler, PhD, 2020-09-02 The maritime industry is thousands of years old. The shipping industry, which includes both ships and ports, follows practices that are as old as the industry itself, yet relies on decades-old information technologies to protect its assets. Computers have only existed for the last 60 years and computer networks for 40. Today, we find an industry with rich tradition, colliding with new types of threats, vulnerabilities, and exposures. This book explores cybersecurity aspects of the maritime transportation sector and the threat landscape that seeks to do it harm.

Geo-Economics: The Interplay between Geopolitics, Economics, and Investments Joachim Klement, 2021-04-28 Today's investors need to understand geopolitical trends as a main driving force of markets. This book provides just that: an understanding of the interplay between geopolitics and economics, and of the impact of that dynamic on financial markets. To me, geo-economics is the study of how geopolitics and economics interact in international relations. Plenty of books on geopolitics have been written by eminent experts in politics and international affairs. This book is not one of them. First, I am neither a political scientist nor an expert in international affairs. I am an economist and an investment strategist who has been fascinated by geopolitics for many years. And this fascination has led me to the realization that almost all books and articles written on geopolitics are useless for investors. Political scientists are not trained to think like investors, and they are not typically trained in quantitative methods. Instead, they engage in developing narratives for geopolitical events and processes that pose risks and opportunities for investors. My main problem with these narratives is that they usually do not pass the "so what?" test. Geopolitical risks are important, but how am I to assess which risks are important for my portfolio and which ones are simply noise? Because geopolitics experts focus on politics, they do not provide an answer to this crucial question for investors. What could be important for a geopolitics expert and for global politics could be totally irrelevant for investors. For example, the US wars in Iraq and Afghanistan have been going on for almost two decades now and have been an important influence on the political discussion in the United States. But for investors, the war in Afghanistan was a total nonevent, and the war in Iraq had only a fleeting influence, when it started in 2003. Geopolitics experts cannot answer the question of which geopolitical events matter for investors and which do not. Unfortunately, some experts thus claim that all geopolitical risks matter and that these risks cannot be quantified but only assessed qualitatively. Nothing could be further from the truth. In the chapters that follow, I discuss geopolitical and geo-economic events from the viewpoint of an investor and show that they can be quantified and introduced as part of a traditional risk management process. I do this in two parts. The first part of this book focuses on geopolitics that matters to investors. It reviews the literature on a range of geopolitical events and shows which events have a material economic effect and which do not. The second part of this book puts the insights from those first chapters into practice by applying them to current geopolitical trends. In this second part, I stick my head out and examine the impact the geopolitical trends have on the economy and financial markets today and their likely development in the coming years. –Joachim Klement, CFA

Gesture-Based Communication in Human-Computer Interaction Antonio Camurri, Gualtiero Volpe, 2011-04-02 Research on the multifaceted aspects of modeling, analysis, and synthesis of - man gesture is receiving growing interest from both the academic and industrial communities. On one hand, recent scientific developments on cognition, on - fect/emotion, on multimodal interfaces, and on multimedia have opened new perspectives on the integration of more sophisticated models of gesture in c-putersystems. On the other hand, the consolidation of new technologies enabling "disappearing" computers and (multimodal) interfaces to be integrated into the natural environments of users are making it realistic to consider tackling the complex meaning and subtleties of human gesture in multimedia systems, - abling a deeper, user-centered, enhanced physical participation and experience in the human-machine interaction process. The research programs supported by the European Commission and several national institutions and governments individuated in recent years strategic fields strictly concerned with gesture research. For example, the DG Information Society of the European Commission (www.cordis.lu/ist) supports several initiatives, such as the "Disappearing Computer" and "Presence" EU-IST FET (Future and Emerging Technologies), the IST program "Interfaces & Enhanced Audio-Visual Services" (see for example the project MEGA, Multisensory - pressive Gesture Applications, www.megaproject.org), and the IST strategic - jective "Multimodal Interfaces." Several EC projects and other funded research are represented in the chapters of this book. A wider range of applications can benefit from advances in research on gesture, from consolidated areas such as surveillance to new or emerging fields such as therapy and rehabilitation, home consumer goods, entertainment, and audio-visual, cultural and artistic applications, just to mention only a few of them.

Energy Poverty and Access Challenges in Sub-Saharan Africa Victoria R. Nalule, 2018-08-27 Access to modern energy is central in addressing the major global challenges of the 21st century, including poverty, climate change and famine. However large parts of the world, especially in Sub-Saharan Africa (SSA) have poor or no access to modern energy. Victoria Nalule argues that SSA countries have many common energy challenges which could be tackled with collective efforts through regional

cooperation. By means of a legal and comparative analysis and a seven-step framework, the book explores the current regional mechanisms employed in Africa to address the challenge of energy poverty and access and whether they are effective in tackling the challenge of energy access, including regional energy infrastructure and regional energy regulations. Chapters discuss the evolution of regionalism in SSA and the role of regional cooperation in the development of renewable energy as a means of confronting both energy access and climate change. Specifically the nexus between energy access, renewable energy and climate change is covered as well as the potential of fossil fuels in addressing energy poverty. The establishment and development of regional energy infrastructure as one of the mechanisms of addressing energy access challenges in SSA and regional efforts to harmonise energy regulation are explored. Finally a concluding chapter provides recommendations for policy makers and other relevant stakeholders on how best to implement some of the suggestions made in previous chapters. International organisations, regional organisations, government officials, scholars and students with interest in the energy sector will highly benefit from this book.

Natural Climate Variability on Decade-to-Century Time Scales National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Climate Research Committee, 1996-08-30 This volume reflects the current state of scientific knowledge about natural climate variability on decade-to-century time scales. It covers a wide range of relevant subjects, including the characteristics of the atmosphere and ocean environments as well as the methods used to describe and analyze them, such as proxy data and numerical models. They clearly demonstrate the range, persistence, and magnitude of climate variability as represented by many different indicators. Not only do natural climate variations have important socioeconomic effects, but they must be better understood before possible anthropogenic effects (from greenhouse gas emissions, for instance) can be evaluated. A topical essay introduces each of the disciplines represented, providing the nonscientist with a perspective on the field and linking the papers to the larger issues in climate research. In its conclusions section, the book evaluates progress in the different areas and makes recommendations for the direction and conduct of future climate research. This book, while consisting of technical papers, is also accessible to the interested layperson.
