### **The Political Economy of Capital Cities** Heike Mayer,Fritz Sager,David Kaufmann,Martin

Warland,2017-09-11 Capital cities that are not the dominant economic centers of their nations – so-called ‘secondary capital cities’ (SCCs) – tend to be overlooked in the fields of economic geography and political science. Yet, capital cities play an important role in shaping the political, economic, social and cultural identity of a nation. As the seat of power and decision-making, capital cities represent a nation’s identity not only through their symbolic architecture but also through their economies and through the ways in which they position themselves in national urban networks. The Political Economy of Capital Cities aims to address this gap by presenting the dynamics that influence policy and economic development in four in-depth case studies examining the SCCs of Bern, Ottawa, The Hague and Washington, D.C. In contrast to traditional accounts of capital cities, this book conceptualizes the modern national capital as an innovation-driven economy influenced by national, local and regional actors. Nationally, overarching trends in the direction of outsourcing and tertiarization of the public-sector influence the fate of capital cities. Regional policymakers in all four of the highlighted cities leverage the presence of national government agencies and stimulate the economy by way of various locational policy strategies. While accounting for their secondary status, this book illustrates how capital-city actors such as firms, national, regional and local governments, policymakers and planning practitioners are keenly aware of the unique status of their city. The conclusion provides practical recommendations for policymakers in SCCs and highlights ways in which they can help to promote economic development.

### Capital Cities: Varieties and Patterns of Development and Relocation Vadim Rossman,2018-03-12

The issue of capital city relocation is a topic of debate for more than forty countries across the world. In this first book to discuss the issue, Vadim Rossman offers an in-depth analysis of the subject, highlighting the global trends and the key factors that motivate different countries to consider such projects, analyzing the outcomes and drawing lessons from recent capital city transfers worldwide for governments and policy-makers. Capital Cities studies the approaches and the methodologies that inform such decisions and debates. Special attention is given to the study of the universal patterns of relocation and patterns specific to particular continents and mega-regions and particular political regimes. The study emphasizes the role of capital city transfers in the context of nation- and state-building and offers a new framework for thinking about capital cities, identifying six strategies that drive these decisions, representing the economic, political, geographic, cultural and security considerations.

Confronting the popular hyper-critical attitudes towards new designed capital cities, Vadim Rossman shows the complex motives that underlie the proposals and the important role that new capitals might play in conflict resolution in the context of ethnic, religious and regional rivalries and federalist transformations of the state, and is seeking to identify the success and failure factors and more efficient implementation strategies. Drawing upon the insights from spatial economics, comparative federalist studies, urban planning and architectural criticism, the book also traces the evolution of the concept of the capital city, showing that the design, iconography and the location of the capital city play a critical role in the success and the viability of the state.

Varieties of Capital Cities David Kaufmann, 2018-08-31 The political and symbolic centrality of capital cities has been challenged by increasing economic globalization. This is especially true of secondary capital cities; capital cities which, while being the seat of national political power, are not the primary economic city of their nation state. David Kaufmann examines the unique challenges that these cities face entering globalised, inter-urban competition while not possessing a competitive political economy.

**The World's Best Cities** National Geographic, 2014 Delving into the heart and soul of more than 225 cities around the globe, World's Best Cities is a glossy, glorious tribute to cosmopolitan life. In photos and words, this irresistible volume showcases long-established great cities like Paris, Rome, New York, London, and Tokyo, as well as exciting up-and-comers, including Denver, Asheville, Oslo, and Abu Dhabi. As readable as it is beautiful, this expansive travel guide offers a playful, informative mix of inspirational personal narratives; photo galleries, and fun facts; plus sidebars on oddities; where to find the best food and shopping; novels that capture a particular city's atmosphere; local secrets; and more. Many additional cities appear in illustrated lists, such as eco-friendly cities, foodie cities; and happiest cities. The twenty-first century is the Century of the City, and on-the-go visitors and armchair travelers alike will make World's Best Cities a must-have volume to accompany all their urban adventures.

**Capital Cities/Les capitales** John Taylor, 1993-12-15 An unusual look at the nature and role of capital cities around the world - past, present and future. The 24 papers by scholars from many countries and disciplines present their thinking on capital cities, with contributions from Amos Rapoport, Claude Raffestin, Peter Hall and Anthony Sutcliffe. 16 papers in English, 8 in French.

**Political Landscapes of Capital Cities** Jessica Joyce Christie, Jelena Bogdanovic, Eulogio Guzmán, 2016-08-08 Political Landscapes of Capital Cities investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments of capital cities. In this spatially inclusive, socially dynamic interpretation, an interdisciplinary group of authors including archaeologists, anthropologists, and art historians uses the methodology put forth in Adam T. Smith's *The Political Landscape: Constellations of Authority in Early Complex Polities* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority. Political Landscapes of Capital Cities blends the historical, political, and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis, hinging on the methodological tools of not only architectural and urban design but also cultural, historiographical, and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological

agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal ideals in the spaces of their capitals, ultimately confirming that political authority is profoundly spatial. Global Cities (Routledge Library Editions: Economic Geography) Anthony D King, 2015-03-27

Since the late 1970s the role of key world cities such as Los Angeles, New York and London as centres of global control and co-ordination has come under increasing scrutiny. This book provides an overview and critique of work on the global context of metropolitan growth, world city formation and the theory it has generated. Suggesting 'post-imperialism' as the most appropriate framework for analysis, the author demonstrates the extent to which urban and regional development, both in Britain and elsewhere, were linked to a colonial mode of production, and highlights the effects of its disappearance. Against this background, the author charts the transformation of London from imperial capital in the nineteenth and early twentieth centuries to world city in the capitalist world economy of today.

Capital Cities around the World Roman Adrian Cybriwsky, 2013-05-23 This informative resource is a fascinating compilation of the history, politics, and culture of every capital city from around the world, making this the only singular reference on the subject of its kind. Every country, even the world's youngest nations, has a capital city—a centralized location which houses the seat of government and acts as the hub of culture and history. But, what role do capital cities play in the global arena? Which factors have influenced the selection of a municipal center for each nation? This interesting encyclopedia explores the topic in great depth, providing an overview of each country's capital—its history and early inhabitants, ascension to prominence, infrastructure within the government, and influence on the world around them. The author considers the culture and society of the area, discussing the ethnic and religious groups among those who live there, the major issues the residents face, and other interesting cultural facts. *Capital Cities around the World: An Encyclopedia of Geography, History, and Culture* features the capital cities of 200 countries across the globe. Organized in alphabetical order by country, each profile combines social studies, geography, anthropology, world history, and political science to offer a fascinating survey of each location.

Digital Cities: The Interdisciplinary Future of the Urban Geo-Humanities Benjamin

Fraser, 2015-07-30 This book highlights an interdisciplinary terrain where the humanities and social

sciences combine with digital methods. It argues that while disciplinary frictions still condition the potential of digital projects, the nature of the urban phenomenon pushes us toward an interdisciplinary and digital future where the primacy of cities is assured.

From Socialist to Post-Socialist Cities Alexander C. Diener, Joshua Hagen, 2016-04-14 The development of post-socialist cities has become a major field of study among critical theorists from across the social sciences and humanities. Originally constructed under the dictates of central planners and designed to serve the demands of command economies, post-socialist urban centers currently develop at the nexus of varied and often competing economic, cultural, and political forces. Among these, nationalist aspirations, previously simmering beneath the official rhetoric of communist fraternity and veneer of architectural conformity, have emerged as dominant factors shaping the urban landscape. This book explores this burgeoning field of research through detailed cases studies relating to the cultural politics of architecture, urban planning, and identity in the post-socialist cities of Eurasia. This book was published as a special issue of Nationalities Papers.

Planning Twentieth Century Capital Cities David Gordon, 2006-09-27 The twentieth century witnessed an unprecedented increase in the number of capital cities worldwide – in 1900 there were only about forty, but by 2000 there were more than two hundred. And this, surely, is reason enough for a book devoted to the planning and development of capital cities in the twentieth century. However, the focus here is not only on recently created capitals. Indeed, the case studies which make up the core of the book show that, while very different, the development of London or Rome presents as great a challenge to planners and politicians as the design and building of Brasília or Chandigarh. Put simply, this book sets out to explore what makes capital cities different from other cities, why their planning is unique, and why there is such variety from one city to another. Sir Peter Hall's 'Seven Types of Capital City' and Lawrence Vale's 'The Urban Design of Twentieth Century Capital Cities' provide the setting for the fifteen case studies which follow – Paris, Moscow and St Petersburg, Helsinki, London, Tokyo, Washington, Canberra, Ottawa-Hull, Brasília, New Delhi, Berlin, Rome, Chandigarh, Brussels, New York. To bring the book to a close Peter Hall looks to the future of capital cities in the twenty-first century. For anyone with an interest in urban planning and design, architectural, planning and urban history, urban geography, or simply capital cities and why they are what they are, Planning Twentieth Century Capital Cities will be the key source book for a long time to come.

Pereira, Maria Eugénia Mata, 2012-12-06 There has been a tremendous explosion of interest in European urban history in the last decades. Across Europe we see a spate of new research projects and publications examining the economic, demographic, social and cultural developments of the many thousands of urban centres -metropolitan cities, regional cities and small towns. This is hardly surprising because urban development has been one of the principal forces shaping the transformation of Europe from the Renaissance to the contemporary era. One striking feature of the new work is its strongly interdisciplinary character with economists, archaeologists, geographers, art historians and sociologists, as well as historians, collaborating in research. Another feature of current approaches is the stress on comparative urban history -using the variable patterns of development in different countries to shed light not only on structural variations but on the process of urban change itself. Testifying to this enthusiasm for comparative history since 1990 the European Association of Urban Historians (instituted by the European Union) has organised large -scale comparative conferences on the European city at Amsterdam, Strasbourg and Budapest. Since the 1980s there has also been a network of European institutions (including the universities of Leicester, New University of Lisbon, Leiden, Cantabria, Humboldt University, Berlin, and Strasbourg, Gent and Leuven) actively involved in student teaching programmes in the field- with support from the European Union ERASMUS programme.

**Assembling Nusantara** Henny Warsilah, Lilis Mulyani, Ivan Kurniawan Nasution, 2023-07-18 Today, the new Indonesian capital city, Nusantara, planning is being anticipated as “representing national identity,” “a model city,” or “a gift to the world,” and many other extraordinary labels. This book examines the reality of an ongoing developmental transformation of the Nusantara beyond those labels. It approaches its assemblage of humans, their works (plans, documents, policies, and others), non-human objects (biodiversity, landscape, geography, physical infrastructure, buildings, and public spaces), processes, social relationships, social infrastructures, and others. It is organized into three themes—mimicry, friction, and resonance. The mimicry illustrates the similarities (and differences) between Nusantara and other capital cities in urban narratives, imageries, and forms. The friction studies how Nusantara moves actors who do not always agree, processes that do not always align or collaboration between diverse contradicting groups that intersect. The resonance observes how Nusantara resonates with, yet communicates its voice toward, the world. The three concepts (originated from geography, anthropology, and sociology) frame the analytics of the various

contributions of local and foreign scientists from multiple disciplines. Overall, the book recommends “Otorita Ibu Kota Nusantara” (Nusantara capital city authority) on the current experimentation and implementation of the urban vision and provides a reference for social scientists to study Nusantara. And more broadly, the book offers the current socio-spatial practices of capital city-making in Asia that are valuable for the region.

*City Tourism* Robert Maitland,Brent W. Ritchie,2009 Capital city status attracts and drives tourism by enhancing a city's appeal to the tourist and its international standing. With a focus on city tourism themes, this book examines subjects including the identity of a city in a tourism context and practical matters such as promoting the city as a product. By examining tourist activities in national capitals, the book addresses issues in capital city development as tourist destinations with a broad, international approach and case studies on major tourist cities.

Finance and Governance of Capital Cities in Federal Systems Enid Slack,Rupak Chattopadhyay,2009-11-21 Using capital cities in Australia, Belgium, Canada, Ethiopia, Germany, India, Mexico, Nigeria, South Africa, Switzerland, and the United States as case studies, contributors examine federal policies towards capital cities, with a particular emphasis on how capital cities are funded and governed, and the extent to which the federal government compensates them for their unique role.
