eBooked! H. Anthony Bandy,2013-10-08 A comprehensive look at today's online book sites, such as Google Books and HathiTrust, that gives you the necessary knowledge, skills, and resources to get up to speed on these amazing digital resources and use them effectively in the library setting. Online book sites such as the Google Books project, the Open Library, HathiTrust, and others are transforming our thoughts on just what a library is and does, and expanding the possibilities of what a library can be. Library staff need to be knowledgeable about these sites, but unfortunately many libraries— particularly those in the public arena—do not have the budget or staff time to learn about these sites and integrate them into their library services. *eBooked!* Integrating Free Online Book Sites into Your Library Collection fills this pressing need. This book examines four of the largest and most popular free, online book sites. Each is discussed in detail in its own chapter, profiling the service in question, identifying its origins and organization and presenting specific, concrete details that describe how to make effective use its available resources. Screenshots, applicable library

scenarios, and sample questions that readers can use to quiz themselves are included. The end of each chapter contains a helpful summary that recaps the main points. Other helpful sites are discussed as well.

Practices and Perspectives of Teaching and Teacher Education in Africa Boadu, Gideon, Odhiambo, George, Marandi, Pegah, 2023-09-25 Teacher education is a known variable that impacts the quality of teaching and schooling, yet while research on practices in teaching and teacher education abound in other contexts, there seems to be no comprehensive reference work on teaching and teacher education in Africa. With Africa and the diaspora boasting rich, diverse political and educational contexts and practices, this gap in knowledge requires that attention be focused on investigating issues that shape the pace, course, and direction of teaching and teacher education in these contexts. Practices and Perspectives of Teaching and Teacher Education in Africa facilitates scholarly discussions among scholars and practitioners about practices, innovations, and future possibilities for educating the next generation of competent students and teachers in Africa. Covering topics such as educational reforms, equity, career progression, and curriculum development, this major reference work is ideal for administrators, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.

The Price We Pay for Google Peter Olsthoorn, 2015-10-23 The growth of Google as a gate to information and entertainment is as dizzying as it is fascinating. 'I can't imagine a life without Google', is an often heard saying. There is a blind trust at its ground, but are we aware of Google's selection processes and what it does with the information on our behavior on the internet? The search results are getting more and more personal and the so-called 'free' services are paid for by the information on our surf behavior. We have become both the producer of and a product to Google. It even intends to become our personal advisor. Where will this lead us? This book will analyze the advantages and risks of the growing power of this corporation. It is not an accusation, but a critical analysis on basis of facts. Peter Olsthoorn (1960) studied history before he became a successful journalist at various newspapers and magazines in the Netherlands, Germany and the US. He has been one of the first European journalists publishing daily online articles since '95. Moreover, Olsthoorn is currently the Chairman of the Internet Section at the Dutch Association for Journalists, and a member of the Netherlands Press Council. This ebook contains exclusive interviews with Google Privacy Director Alma Whitten and Danny Sullivan, founder of Search Engine Land. It also contains practical instructions on how to combat data collection about your personal life.
