Email and the Everyday Esther Milne, 2021-02-09 An exploration of how email is experienced, understood, and materially structured as a practice spanning our everyday domestic and work lives. Despite its many obituaries, email is not dead. As a global mode of business and personal communication, email outstrips newer technologies of online interaction; it is deeply embedded in our everyday lives. And yet--perhaps because the ubiquity of email has obscured its study--this is the first scholarly book devoted to email as a key historical, social, and commercial site of digital communication in our everyday lives. In Email and the Everyday, Esther Milne examines how email is experienced, understood, and materially structured as a practice spanning the domestic and institutional spaces of daily life.

Crossing the Aisle Antoine Yoshinaka, 2015-11-24 Switching parties is arguably the most important decision a politician will ever make. This book is the first-ever systematic study of the causes and consequences of legislative party switching in the United States. The author argues that re-election alone does not explain party switching. He proposes an ambition-based theory that accounts for multiple goals (including higher office aspirations and the desire for influence in the legislature) with a focus on the electoral costs and the institutional benefits of the decision. The book combines the statistical analysis of electoral data and legislative careers in the US Congress and state legislatures with elite interviews of party switchers, non-switchers, and a party leader. The case study of a party switcher's decision in 'real time' documents the complexity of the decision in a politician's own words prior to and following the switch. The book raises important questions regarding the

meaning of a party label.

“I don’t translate, I create!” Vanessa Drexler,2016-01-05 “I don’t translate, I create!” – This is the slogan of a translation agency called “Sternkopf Communications” located in Flöha, Germany. The translators at this translation agency are specialized in the field of marketing and perceive creativeness their daily bread. But what does this actually mean – I don’t translate, I create? Undoubtedly, the translation of a text from one language into another is not an easy and straightforward process. On the contrary, the translator needs to invest much time and one or the other headache before a target text (TT) finally sounds natural, fluent, coherent and logical for the target audience. Different possible translation solutions will have to be considered, language as well as culture-related equivalents often are not easily at hand etc. Would it not be pleasant if machine translation (MT) was there to help with this process? Yet, despite the enormous importance of creativity in translating, computer-aided translation (CAT) tools are being used frequently by professional translators, not to replace but to support the translator in their daily business. CAT tools enable their users to translate in a more consistent way, since they

search source texts for words, phrases or sentences that have already been translated before and stored in the TM so that the translator does not need to translate this text unit again 'from scratch'. Considering that this process brings about what could be called 'semi-mechanical' TTs, the use of CAT tools seems to stand in stark contrast to the importance of creativity mentioned above. Thus, the question arises whether CAT tools influence the creative energy of translators and, if this is the case, whether translators regard this influence as rather positive or negative. In this context, it is also important to consider which fields of expertise generally demand a high degree of uniformity/consistency in translations and which subject fields generally allow for a high degree of creative freedom. Accordingly, this paper pursues two related purposes. The first is to compare five CAT tools in their degree of usability. The second purpose is to identify translators' perspectives on uniformity and creativity in translations with the goal to shedding light on the question whether CAT tools generally tend to positively or negatively influence the translation process on a rather linguistic than technological basis.

EDiscovery for the Legal Professional Christine E. Broucek, 2023-09 Intro text for eDiscovery for undergraduates in paralegal, criminal justice, or prelaw programs--

The Manipulators Peter J. Hasson, 2020-02-04 The dawn of the digital age was supposed to be a new era, when everybody would have a voice and battle it out in the marketplace of ideas—intellectual democracy at the touch of a keyboard. Social media offered a way for conservatives to outflank the leftist groupthink that dominated academia, the media, and the political establishment. But, as investigative reporter Peter J. Hasson shows in his explosive new book, *The Manipulators*, that's no longer the case. Instead, Big Tech companies have become enforcers of intellectual conformity: promoting leftist ideas, punishing dissent, and dictating politically correct opinions. Big Tech's grip on the levers of information seems unbreakable. Hasson, working with sources deep inside the tech giants, presents a chilling account of companies that relish their coercive power—and aren't shy about using it. In *The Manipulators*, you'll learn:

- How tech companies skew search results and fact-checks in favor of left-wing ideas and liberal news sources
- How Google employees organize anti-Trump Resistance on company time and with company resources
- How Facebook gives special privileges to liberal publications
- How Big Tech employees collude with liberal journalists and left-wing activists to dictate who can—and can't—have a voice online
- How Twitter, which once touted itself as the free speech wing of the free

speech party, reinvented itself as a liberal news company • How pro-abortion extremists work with Big Tech to shut down pro-life speech online Big Tech has become the greatest threat to free speech and free thought in America. But Big Tech is not invincible. It is still vulnerable to conservative and consumer pressure—though not for long, if Democrats have their way. Peter Hasson provides a frightening look at the concentrated power of Big Tech, its extraordinary intellectual intolerance, and its determination to silence competing voices and even dictate our thoughts. The Manipulators is a warning about rampant political censorship that will only get worse unless Big Tech meets big opposition.

Unifying the Divide Lynn Genciano Chin, 2011 This dissertation examines the processes by which the intragroup division of labor structurally influences the development of group attachment. It specifically addresses a classic sociological issue over whether specialization in the division of labor is beneficial or detrimental to the development of person-to-group bonds and group cohesion. I propose that that solely looking at the independent effects of task specialization in isolation is problematic. Instead, I suggest that it is more beneficial to characterize the division of labor in terms of the different relational aspects that underline micro-interactional task structure. Towards this aim, my project proposes that interdependence in the division of labor is organized around three relational dimensions (task coordination, task differentiation, and skill specialization), which in combination exert complex influences on the development of person-to-group bonds. The first part of my dissertation research proposes a new original theory that specifies how these three relation dimensions differentially impact three independent processes by which group cohesion can endogenously grow from task structure. The second part of my

dissertation centers around two major empirical analyses derived from data collected from a large-scale laboratory experiment. The first empirical study asks whether group bonding is higher in specialized teams? The second empirical study asks whether the impact of specialization changes when task specialization is no longer equally differentiated among group members, but is instead unequally divided amongst group members such that only a few group members possess unique skills important for team success? This project provides three major theoretical contributions: First, it addresses a fundamental issue that lies at the heart of sociology by asking what structural aspects of social interaction encourage individuals to become more attached to a group? Second, it re-conceptualizes the division of labor on an interpersonal level by breaking the concept down into its constituent parts to analyze how the division of labor actually works in real social interaction. Third, it brings insight to a major debate over whether organizational division of labor inhibits or enhances group solidarity by suggesting that the impact of task dimensions like specialization is not straightforward, but is complex and can only be examined while in simultaneous combination with other task dimensions.

The Crisis in Pro Baseball and Japan's Lost Decade Paul Dunscomb, 2023-10-27

This book examines Japan's Heisei era through the lens of the crisis in Japanese professional baseball of 2004, challenging the narrative of decline which dominates the discourse on the period. The story of this crisis reveals much about the Japanese psyche during the "Lost Decade," about the nature of change during Heisei Japan and of the nation's resilience. The business of professional baseball provides crucial insights as it achieved its basic form at the same time as Japan's post-war political economy, and shared

many characteristics with it, including systemic inefficiencies which post “bubble” Japan could no longer sustain. The book traces how the crisis unfolded and the cast of characters who appeared during it (including team owners, players, IT entrepreneurs, and ordinary fans) revealing much about the push and pull of continuity and change in Japan. Featuring an in-depth analysis of the key participants and developments of the crisis in baseball this book will be a valuable resource for students and scholars of sports management, Japanese history, and Japanese culture, particularly of the Heisei era.

Medinfo Marius Fieschi, Enrico Coiera, Yu-Chan Jack Li, 2004 A fundamental challenge for medical informatics is to develop and apply better ways of understanding how information technologies and methods can help support the best care for every patient every day given available medical knowledge and resources. In order to provide the most effective healthcare possible, the activities of teams of health professionals have to be coordinated

through well-designed processes centered on the needs of patients. For information systems to be accepted and used in such an environment, they must balance standardization based on shared medical knowledge with the flexibility required for customization to the individual patient. Developing innovative approaches to design and build evidence-based careflow management systems is essential for providing the knowledge management infrastructure of health care organizations that seeks to increase performance in delivering high quality care services by efficiently exploiting available resources. Parallel challenges arise in the organization of research at the biological and clinical levels, where the focus on systematically organizing and supporting processes of scientific inquiry by novel informatics methods and databases are in their very early stages. These Proceedings of Medinfo 2004 demonstrate the base of knowledge medical informatics professionals will collectively draw upon in the years ahead to meet these challenges and realize opportunities.

Lived Experience, Lifelong Learning, Community Activism and Social Change

Sharon Clancy, Iain Jones, 2024-06-03 This book identifies and celebrates the learning adult educators can gain from the numerous sites of community activism, learning, and social change that are currently taking place across the globe. While the relentless push of neoliberalism has struck at the heart of adult education provision in many countries, including that provided by universities, institutions of further education, international development agencies, NGOs, vocational training centres and the local government sector, what can adult educators learn and what is being learnt when we turn to sites of community activism as a mechanism for broader social change? Drawing on empirical

research, as well as stories and blogs about social change and transformation from those participating in community activist struggles, this book features diverse contributions from adult education practitioners, theorists and activist-researchers who share community activist practices from around the world and provide insight into the ways these have contributed to social change and political transformation in different spaces and communities. Each chapter and blog in this collection relate to different dimensions of community, democracy and dialogue and how this space has become one in which delimiting factors must constantly be fought. In these contributions, questions of critical pedagogy and voice, and contested notions of power, place and voice, are lived, felt and troubled in different national and international contexts. This book was originally published as a special issue of *Studies in the Education of Adults*.
