I Love Jesus, But I Want to Die Sarah J. Robinson, 2021-05-11 A compassionate, shame-free guide for your darkest days “A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized.”—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn’t cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you’re left wondering if God has abandoned you. You just want a way out. But there’s hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn’t look like what you expect.

2011 National Gang Threat Assessment Federal Bureau of Investigation, 2012-01-01 Gangs continue to commit criminal activity, recruit new members in urban, suburban, and rural regions across the United States, and develop criminal

associations that expand their influence over criminal enterprises, particularly street-level drug sales. The most notable trends for 2011 have been the overall increase in gang membership, and the expansion of criminal street gangs' control of street-level drug sales and collaboration with rival gangs and other criminal organizations.

How the World Changed Social Media Daniel Miller, Elisabetta Costa, Nell Haynes, Tom McDonald, Razvan Nicolescu, Jolynna Sinanan, Juliano Spyer, Shriram Venkatraman, Xinyuan Wang, 2016-02-29 How the World Changed Social Media is the first book in Why We Post, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already

transformed social media in such unexpected ways and assess the consequences

A Forgetful Nation Ali Behdad, 2005-07-18 In *A Forgetful Nation*, the renowned postcolonialism scholar Ali Behdad turns his attention to the United States. Offering a timely critique of immigration and nationalism, Behdad takes on an idea central to American national mythology: that the United States is “a nation of immigrants,” welcoming and generous to foreigners. He argues that Americans’ treatment of immigrants and foreigners has long fluctuated between hospitality and hostility, and that this deep-seated ambivalence is fundamental to the construction of national identity. Building on the insights of Freud, Nietzsche, Foucault, and Derrida, he develops a theory of the historical amnesia that enables the United States to disavow a past and present built on the exclusion of others. Behdad shows how political, cultural, and legal texts have articulated American anxiety about immigration from the Federalist period to the present day. He reads texts both well-known—J. Hector St. John de Crèvecoeur’s *Letters from an American Farmer*, Alexis de Tocqueville’s *Democracy in America*, and Walt Whitman’s *Leaves of Grass*—and lesser-known—such as the writings of nineteenth-century nativists and of public health officials at Ellis Island. In the process, he highlights what is obscured by narratives and texts celebrating the United States as an open-armed haven for everyone: the country’s violent beginnings, including its conquest of Native Americans, brutal exploitation of enslaved Africans, and colonialist annexation of French and Mexican territories; a recurring and fierce strand of nativism; the need for a docile labor force; and the harsh discipline meted out to immigrant “aliens” today, particularly along the Mexican border.

The Net and the Butterfly Olivia Fox Cabane, Judah Pollack, 2017-02-07 In *The Charisma Myth*, Olivia Fox Cabane offered a groundbreaking approach to becoming more charismatic. Now she teams up with Judah Pollack to reveal how anyone can train their brain to have

more eureka insights. The creative mode in your brain is like a butterfly. It's beautiful and erratic, hard to catch and highly valued as a result. If you want to capture it, you need a net. Enter the executive mode, the task-oriented network in your brain that help you tie your shoes, run a meeting, or pitch a client. To succeed, you need both modes to work together--your inner butterfly to be active and free, but your inner net to be ready to spring at the right time and create that aha! moment. But is there any way to trigger these insights, beyond dumb luck? Thanks to recent neuroscience discoveries, we can now explain these breakthrough moments--and also induce them through a series of specific practices. It turns out there's a hidden pattern to all these seemingly random breakthrough ideas. From Achimedes' iconic moment in the bathtub to designer Adam Cheyer's idea for Siri, accidental breakthroughs throughout history share a common origin story. In this book, you will learn to master the skills that will transform your brain into a consistent generator of insights. Drawing on their extensive coaching and training practice with top Silicon Valley firms, Cabane and Pollack provide a step-by-step process for accessing the part of the brain that produces breakthroughs and systematically removing internal blocks. Their tactics range from simple to zany, such as:

- Imagine an alternate universe where gravity doesn't exist, and the social and legal rules that govern it.
- Map Disney's Pocahontas story onto James Cameron's Avatar.
- Rid yourself of imposter syndrome through mental exercises.
- Literally change your perspective by climbing a tree.
- Stimulate your butterfly mode by watching a foreign film without subtitles.

By trying the exercises in this book, readers will emerge with a powerful new capacity for breakthrough thinking.

guide for building good relationships with your sons? Well, the wait is over. *Cats & Puppies* is more than a self-help book. It's a funny, down-to-earth guide to the art of raising boys into healthy men.

The App Generation Howard Gardner, Katie Davis, 2013-10-22 No one has failed to notice that the current generation of youth is deeply--some would say totally--involved with digital media. Professors Howard Gardner and Katie Davis name today's young people The App Generation, and in this spellbinding book they explore what it means to be app-dependent versus app-enabled and how life for this generation differs from life before the digital era. Gardner and Davis are concerned with three vital areas of adolescent life: identity, intimacy, and imagination. Through innovative research, including interviews of young people, focus groups of those who work with them, and a unique comparison of youthful artistic productions before and after the digital revolution, the authors uncover the drawbacks of apps: they may foreclose a sense of identity, encourage superficial relations with others, and stunt creative imagination. On the other hand, the benefits of apps are equally striking: they can promote a strong sense of identity, allow deep relationships, and stimulate creativity. The challenge is to venture beyond the ways that apps are designed to be used, Gardner and Davis conclude, and they suggest how the power of apps can be a springboard to greater creativity and higher aspirations.

The Hyperlinked Society Lokman Tsui, 2009-12-11 Links are among the most basic---and most unexamined---features of online life. Bringing together a prominent array of thinkers from industry and the academy, *The Hyperlinked Society* addresses a provocative series of questions about the ways in which hyperlinks organize behavior online. How do media

producers' considerations of links change the way they approach their work, and how do these considerations in turn affect the ways that audiences consume news and entertainment? What role do economic and political considerations play in information producers' creation of links? How do links shape the size and scope of the public sphere in the digital age? Are hyperlinks bridging mechanisms that encourage people to see beyond their personal beliefs to a broader and more diverse world? Or do they simply reinforce existing bonds by encouraging people to ignore social and political perspectives that conflict with their existing interests and beliefs? This pathbreaking collection of essays will be valuable to anyone interested in the now taken for granted connections that structure communication, commerce, and civic discourse in the world of digital media. This collection provides a broad and deep examination of the social, political, and economic implications of the evolving, web-based media environment. The Hyperlinked Society will be a very useful contribution to the scholarly debate about the role of the internet in modern society, and especially about the interaction between the internet and other media systems in modern society. ---Charles Steinfield, Professor and Chairperson, Department of Telecommunication, Information Studies, and Media, Michigan State University Joseph Turow is Robert Lewis Shayon Professor at the Annenberg School for Communication, University of Pennsylvania. You've GOT to Read This Book! Jack Canfield, Gay Hendricks, 2009-10-13 There's nothing better than a book you can't put down—or better yet, a book you'll never forget. This book puts the power of transformational reading into your hands. Jack Canfield, cocreator of the bestselling Chicken Soup for the Soul® series, and self-actualization pioneer Gay Hendricks have invited notable people to share personal stories of books that changed their lives. What book shaped their outlook and habits? Helped them navigate rough seas? Spurred them to satisfaction and success? The contributors include Dave Barry, Stephen Covey, Malachy McCourt, Jacquelyn Mitchard, Mark Victor Hansen, John Gray, Christiane Northrup, Bernie Siegel, Craig Newmark, Michael E. Gerber, Lou Holtz, and Pat Williams, to name just a few. Their richly varied stories are poignant, energizing, and entertaining. Author and actor Malachy McCourt tells how a tattered biography of Gandhi, stumbled on in his youth, offered a shining example of true humility—and planted the seeds that would help support his sobriety decades later. Bestselling author and physician Bernie Siegel, M.D., tells how William Saroyan's *The Human Comedy* helped him realize that, in

order to successfully treat his patients with life-threatening illnesses, I had to help them live—not just prevent them from dying. Actress Catherine Oxenberg reveals how, at a life crossroads and struggling with bulimia, a book taught her the transforming difference one person could make in the life of another—and why that person for her was Richard Burton. Rafe Esquith, the award-winning teacher whose inner-city students have performed Shakespeare all over the world, recounts his deep self-doubt in the midst of his success—and how reading *To Kill a Mockingbird* strengthened him to continue teaching. Beloved librarian and bestselling author Nancy Pearl writes how, at age ten, Robert Heinlein's science fiction book *Space Cadet* impressed on her the meaning of personal integrity and gave her a vision of world peace she'd never imagined possible. Two years later, she marched in her first civil rights demonstration and learned that there's always a way to make a small contribution to intergalactic harmony. If you're looking for insight and illumination—or simply for that next great book to read—*You've Got to Read This Book!* has treasures in store for you.

Capturing the City Joseph Heathcott, Angela Dietz, 2019-11-15 During the first two decades of the twentieth century, the St. Louis Street Department generated one of the most extensive troves of photographs ever taken of the city. Ostensibly created to document municipal challenges and improvements, the images inadvertently captured richly detailed scenes of everyday life. Largely led by Charles Clement Holt (1866-1925), St. Louis's photography operation expanded until it produced about six thousand images per year in 1914. Many of these photographs were lost, but a city historian salvaged a collection of three hundred glass plate negatives in the 1950s, which are now in the

Missouri Historical Society collections. This small, but superb, group of photographs provides a wealth of information on the visual culture of St. Louis during a period of rapid transformation. *Capturing the City* is the first book to examine these photographs, placing the people and landscapes depicted within the broader context of a swiftly urbanizing and industrializing metropolis. Collected and analyzed here by Joseph Heathcott and Angela Dietz, the compelling images in *Capturing the City* reveal the national trend among cities to use the camera as a documentary tool. Reformers Jacob Riis and Lewis Hine imagined the camera as a truth-telling instrument and used their photographs to mobilize public consciousness. Across the nation, cities used photographers to document slums, workhouses, and crime scenes, as well as municipal improvements like street lighting, pavement, and model housing. In this vein, Holt and his staff showcased both the challenges and the successes of government action in St. Louis. Consistent with their Progressive-era peers, their efforts contributed to the record of ongoing public works while shaping the narrative of urban progress itself.

Writing for Digital Media Brian Carroll, 2010-06-01 *Writing for Digital Media* teaches students how to write effectively for online audiences—whether they are crafting a story for the website of a daily newspaper or a personal blog. The lessons and exercises in each chapter help students build a solid understanding of the ways that the Internet has introduced new opportunities for dynamic storytelling as digital media have blurred roles of media producer, consumer, publisher and reader. Using the tools and strategies discussed in this book, students are able to use their insights into new media audiences to produce

better content for digital formats and environments. Fundamentally, this book is about good writing—clear, precise, accurate, filled with energy and voice, and aimed directly at an audience. Writing for Digital Media also addresses all of the graphical, multimedia, hypertextual and interactive elements that come into play when writing for digital platforms. Learning how to achieve balance and a careful, deliberate blend of these elements is the other primary goal of this text. Writing for Digital Media teaches students not only how to create content as writers, but also how to think critically as a site manager or content developer might about issues such as graphic design, site architecture, and editorial consistency. By teaching these new skill sets alongside writing fundamentals, this book transforms students from writers who are simply able to post their stories online into engaging multimedia, digital storytellers.
