Design Studies and Intelligence Engineering L.C. Jain,V.E. Balas,Q. Wu,2024-02-27 The discipline of design studies applies various technologies, from basic theory to application systems, while intelligence engineering encompasses computer-aided industrial design, human-factor design, and greenhouse design, and plays a major part within design science. Intelligence engineering technologies also include topics from theory and application, such as computational technologies, sensing technologies, and video detection. This book presents the proceedings of DSIE2023, the 2023 International Symposium on Design Studies and Intelligence Engineering, held on 28 & 29 October 2023 in Hangzhou, China. The conference provides a platform for professionals and researchers from industry and academia to present and discuss recent advances in the fields of design studies and intelligence engineering. It also fosters cooperation among the organizations and researchers involved in these overlapping fields, and invites internationally renowned professors to further explore these topics in some depth, providing the opportunity for them to discuss the technical presentations with conference participants. In all, 275 submissions were received for the conference, 105 of which were accepted after thorough review by 3 or 4 referees for presentation at the conference and inclusion here. Providing a valuable overview of the latest developments, the book will be of interest to all those working in the fields of design studies and intelligence engineering.

The Glass of Wine James F. Shackelford, Penelope L. Shackelford,2017-12-27 The first book to focus on the role of glass as a material of critical importance to the wine industry For centuries glass has been the material of choice for storing, shipping, and sipping wine. How did that come to pass, and why? To what extent have glassmaking and wine making co-evolved over the centuries? The first book to focus on the role of glass as a material of critical importance to the wine industry, *The Glass of Wine* answers these and other fascinating questions. The authors deftly interweave compelling historical, technical, and esthetic narratives in their exploration of glass as the vessel of choice for holding, storing, and consuming wine. They discuss the traditions informing the shapes and sizes of wine bottles and wine glasses, and they demystify the selection of the right glass for red versus white varietals, as well as sparkling and dessert wines. In addition, they review the technology of modern glassmaking and consider the various roles glass plays in wineries—especially in the enologist's laboratory. And they consider the increasing use of aluminum and polymer containers and its potential impact on the central role of glass as the essential material for wine appreciation. The first book focusing on the role of glass and its central importance to the wine industry Written by a glass scientist at UC Davis, home of the premier viticulture and enology program in North America Interlards discussions of the multi-billion-dollar glass and wine industries with valuable technical insights for scientists, engineers, and wine enthusiasts alike Illustrates the wide spectrum of bottles, carafes, decanters, and drinking glasses with an abundance of exquisite full-color photos Both an authoritative guide and a compelling read, *The Glass of Wine* tells the story of the centuries-old marriage between an endlessly fascinating material and a celebrated beverage. It is sure to have enormous appeal among ceramic and glass professionals, wine makers, and oenophiles of all backgrounds.

New digital mega-projects like the Blockchain Service Network, smart cities, and new foreign exchange digital rails are animating physical assets: offices, warehouses, homes, and farms. Powered by a network of sensors, AI, and distributed trust, property has digitized wings. The resulting inflow of data from every part of the 'built' world will create new industries, uproot traditional finance, and transform cities.The global trade war is not just a re-ordering of technology: it's a re-ordering of cities. Nations which export this digital technology first will alter the digital fabric of the developing world. A digital Non-Aligned Movement is afoot! One way for the US to catch up is public-private partnerships between Silicon Valley and DC – or just 'copy' China. This book explores the many people and companies, large and small, which are blazing new trails in China's 'Internet of Everything' to transform the way we live, buy, and move.

On Scribing Kelvy Bird,2017-05 Scribing – the practice of visually mapping a group's content in real time, as people talk – is increasingly used across sectors and around the globe to bring human ideas and interaction alive through words and images, thus activating the social field in a unique and participatory way.Scribing is an evolving art form whose potential is only just beginning to be fully realized. This book will provide a much needed framework for scribing and, on a larger level, for seeing possibilities of connecting inner and outer lives, art and the social realm.

Modelling and Control of Switched Reluctance Machines Rui Araújo,José Camacho,2020-09-09 Today, switched reluctance machines (SRMs) play an increasingly important role in various sectors due to advantages such as robustness, simplicity of construction, low cost, insensitivity to high temperatures, and high fault tolerance. They are frequently used in fields such as aeronautics, electric and hybrid vehicles, and wind power generation. This book is a comprehensive resource on the design, modeling, and control of SRMs with methods that demonstrate their good performance as motors and generators.
