Airline Executives and Federal Regulation Walter David Lewis,2000 This book is a collection of eight case studies of relationships between airline executives and federal regulatory agencies from the passage of the Air Commerce Act in 1926 to the Airline Deregulation Act of 1978. By focusing on the lives and personalities of individual entrepreneurs, W. David Lewis and his contributors hope to explore the interaction between technology, government regulation, and entrepreneurship. Each essay in the book focuses on a particular airline executive, such as Eddie Rickenbacker, Robert Six, and Donald Nyrop. Lewis has been careful to give a variety of perspective: Airlines of various types are represented -- large and small, scheduled and unscheduled. Some of the executives profiled were known for having adversative relationships with federal regulators, whereas others wholeheartedly accepted regulation and thrived under it. There have been public calls for a return to airline regulation, and Lewis thinks it is not inconceivable that regulation may ultimately return if problems continue and conditions deteriorate further. But, he says, it is well to remember that deregulation occurred because there were flaws in the regulatory system it replaced. This collection of essays -- scholarly and well documented but written in a lively style suitable for specialists and nonspecialists alike -- provides a long-range perspective on the issue of airline deregulation.

Hypermedia Systems and Applications Jennifer A. Lennon,2012-12-06 It is a pleasure and an honor to write a foreword for Jennifer Lennon's book *Hypermedia Systems and Applications: World Wide Web and Beyond*. I am fortunate to have been able to follow the development of this book from an excellent Ph.D. thesis to what I would consider one of the best and most comprehensive books in the area. It has a good chance to become a must for teachers, researchers, and practitioners. For the sake of this foreword let us combine the phenomena hypermedia, the Internet, and the WWW by just calling them the Web. Well, this Web surely has become one of the super hot topics, from both a scholarly and a commercial point of view! We have a saying that the Web is like a dog: one year's development of the Web corresponds to seven human years. You will be familiar with Murphy's law: Anything that can go wrong will go wrong, and with a plethora of derivatives or specializations thereof like: If you are in an otherwise empty locker room, the only other person there is bound to have a locker just on top of yours; or: If traffic is moving slowly, you are always going to be in the slowest moving lane, and so on. Well, I have coined a version that applies to the Web: Whenever you have understood an important new development concerning the Web you can be sure that it is obsolete.

**Sustainable Railway Engineering and Operations** Simon Blainey,John Preston,2022-08-08 Railways are frequently promoted as one of the most sustainable modes of transport. However, their impact will in practice be significantly affected by the ways in which they are designed, constructed, and used. This book provides a comprehensive overview of the issues involved in planning, engineering and operating sustainable railway systems.

**Airlines and Air Mail** F. Robert van der Linden,2014-07-11 Conventional wisdom credits only entrepreneurs with the vision to create America's commercial airline industry and contends that it was not until Roosevelt's Civil Aeronautics Act of 1938 that federal airline regulation began. In *Airlines and Air Mail*, F. Robert van der Linden persuasively argues that Progressive republican policies of Herbert Hoover actually fostered the growth of American commercial aviation. Air mail contracts provided a critical indirect subsidy and a solid financial foundation for this nascent industry. Postmaster General Walter F. Brown used these contracts as a carrot and a stick to ensure that the industry developed in the public interest while guaranteeing the survival of the pioneering companies. Bureaucrats, entrepreneurs, and politicians of all stripes are thoughtfully portrayed in this thorough chronicle of one of America's most resounding successes, the commercial aviation industry.

*Handbook of Zeolite Science and Technology* Scott M. Auerbach, Kathleen A. Carrado, Prabir K. Dutta, 2003-07-31 The Handbook of Zeolite Science and Technology offers effective analyses of salient cases selected expressly for their relevance to current and prospective research. Presenting the principal theoretical and experimental underpinnings of zeolites, this international effort is at once complete and forward-looking, combining fundamental concepts with the most sophisticated data for each scientific subtopic and budding technology. Supplying over 750 figures, and 350 display equations, this impressive achievement in zeolite science observes synthesis through the lens of MFI (ZSM-5 and silicalite). Chapters progress from conceptual building blocks to complex research presentations.

*Low-Carbon Land Transport* Daniel Bongardt, Felix Creutzig, Hanna Hüging, Ko Sakamoto, Stefan Bakker, Sudhir Gota, Susanne Böhler-Baedeker, 2013-03-05 Practical guide for transport policymakers and planners to achieve low-carbon land transport systems. Based on wide ranging research, it shows how policies can be bundled successfully and worked into urban transport decision-making and planning strategies. With case studies from developed and developing countries, it outlines measures for reducing emissions, tailoring these to specific circumstances. It also highlights how greenhouse gas savings are measured, as well as success factors for implementing policies and measures in complex decision-making processes. For students of sustainable transport, professional planners and decision makers, Low-Carbon Land Transport is an invaluable reference for all those looking to help transport networks flow in a sustainable direction.

*Interstate* Mark H. Rose, Raymond A. Mohl, 2012-03-30 This new, expanded edition brings the story of the Interstates into the twenty-first century. It includes an account of the destruction of homes, businesses, and communities as the urban expressways of the highway network destroyed large portions of the nation's central cities. Mohl and Rose analyze the subsequent urban freeway revolts, when citizen protest groups battled highway builders in San Francisco, Baltimore, Memphis, New Orleans, Washington, DC, and other cities. Their detailed research in the archival records of the Bureau of Public Roads, the Federal Highway Administration, and the U.S. Department of Transportation brings to light significant evidence of federal action to tame the spreading freeway revolts, curb the authority of state highway engineers, and promote the devolution of transportation decision making to the state and regional level. They analyze the passage of congressional legislation in the 1990s, especially the Intermodal Surface Transportation Efficiency Act (ISTEA), that initiated a major shift of Highway Trust Fund dollars to mass transit and light rail, as well as to hiking trails and bike lanes. Mohl and Rose conclude with the surprising popularity of the recent freeway teardown movement, an effort to replace deteriorating, environmentally damaging, and sometimes dangerous elevated expressway segments through the inner cities. Sometimes led by former anti-highway activists of the 1960s and 1970s, teardown movements aim to restore the urban street grid, provide space for new streetcar lines, and promote urban revitalization efforts. This revised edition continues to be marked by accessible writing and solid research by two well-known scholars. Raymond A. Mohl is distinguished professor of history at the University of Alabama at Birmingham. He is the author of *South of the South: Jewish Activists and the Civil Rights Movement in Miami, 1945-1960* and co-editor of *The Making of Urban America*, 3rd edition. Mark H. Rose is professor of history at Florida Atlantic University. He is the author of *Cities of Light and Heat: Domesticating Gas and Electricity in Urban America* and coauthor of *The Best Transportation System in the World: Railroads, Trucks, Airlines and American Public Policy in the Twentieth Century*. Praise for the previous edition of *Interstate* The tale that Mark Rose relates in great detail is an illuminating one of pressure politics, revealing aspects of the fragmentation of social and political life rarely examined by scholars. —Richard Lowitt, *American Studies* The best researched, most readable single document on the formation of U.S. auto-dominant policy. . . . —Robert C. Stuart, *Policy Studies Journal* Rose has done pioneering work in highway history. This is a small book but an important one. We are becoming more acutely aware that in our world technology and politics are inextricably intertwined. Here is an excellent case study.—John B. Rae, *ISIS* An extensively researched, brief, and important study that adds to our knowledge of interest group politics and the impact of the motor vehicle in the United States. —Blaine A. Brownell, *American Historical Review* An excellent contribution to political and transportation history. . . . an extremely useful account of the various hearings, conferences, and behind-the-scenes maneuverings that finally led to federal absorption of 90 percent of construction costs through the instrumentality of the Highway Trust Fund. . . . an impressive beginning to historical scholarship on a vastly important topic. —Kenneth T. Jackson, *Journal of American History* A remarkably thorough, objective survey and analysis of the role of various interest groups in fashioning highway policies in the 1940s and 1950s. . . . a pioneer, definitive examination of highway development and transportation policy-making from the standpoints of various special interest groups. —Michael Robinson, *Public Works Historical Society* This volume will fill an important area in many collections that probably have several volumes on transportation development after 1956. Persons interested in political processes, policy formation, and urban history will find this volume a useful and important contribution toward understanding the post-World War II period. —Choice

*Air Transport and Regional Development Policies* Anne Graham, Nicole Adler, Hans-Martin Niemeier, Ofelia Betancor, António Pais Antunes, Volodymyr

Bilotkach, Enrique J. Calderón, Gianmaria Martini, 2020-12-17 Air Transport and Regional Development Policies is one of three interconnected books related to a four-year European Cooperation in Science and Technology (COST) Action established in 2015. The Action, called Air Transport and Regional Development (ATARD), aimed to promote a better understanding of how the air transport-related problems of core regions and remote regions should be addressed in order to enhance both economic competitiveness and social cohesion in Europe. This book focuses on policy implications related to air transport and regional development. It begins with chapters that generally discuss important policy issues related to air transport and regional development in relation to connectivity and accessibility; dependency; airport governance and regulation; and air traffic control frameworks. This is followed by a number of chapters that consider government subsidies and state aid. The final chapters focus on other policy implications (tourism development, airport expansion, passenger taxation and noise control). Currently, no other single source publication covers this topic area in such a comprehensive manner, insofar as it considers so many policies and examples. The book aims at becoming a major reference source on the topic, drawing from experienced researchers in the field, covering the diverse experience and knowledge of the members of the COST Action. The book will appeal to academics, practitioners and government bodies who have a particular interest in acquiring detailed comparative knowledge and understanding of the policy implications of air transport and regional development. Along with the other two books (Air Transport and Regional Development Methodologies and Air Transport and Regional Development Case Studies) it fills a much-needed gap in the literature.
