Handbook of Computer Programming with Python Dimitrios Xanthidis,Christos Manolas,Ourania K. Xanthidou,Han-I Wang,2022-12-12 This handbook provides a hands-on experience based on the underlying topics, and assists students and faculty members in developing their algorithmic thought process and programs for given computational problems. It can also be used by professionals who possess the necessary theoretical and computational thinking background but are presently making their transition to Python. Key Features: • Discusses concepts such as basic programming principles, OOP principles, database programming, GUI programming, application development, data analytics and visualization, statistical analysis, virtual reality, data structures and algorithms, machine learning, and deep learning. • Provides the code and the output for all the concepts discussed. • Includes a case study at the end of each chapter. This handbook will benefit students of computer science, information systems, and information technology, or anyone who is involved in computer programming (entry-to-intermediate level), data analytics, HCI-GUI, and related disciplines.

Global Citizenship in Foreign Language Education Christiane Lütge,Thorsten Merse,Petra Rauschert,2022-11-01 In light of increasing globalization, this collection makes the case for global citizenship education as a way forward for transforming foreign language learning and teaching to better address current and future global challenges in times of unprecedented change. The

volume maps a multi-dimensional approach within foreign language pedagogy to take up the challenge of educating the global citizen. Drawing on sociocultural, pedagogical, cosmopolitan, digital and civic-minded perspectives, the book explores the challenges in constructing epistemological frameworks in increasingly global environments, the need for developing context-sensitive educational practices, the potential of linking up with work from related disciplines, and the impact of these considerations on different educational settings. The collection reflects an international range of voices, attuned to global and local nuances, to offer a holistic compilation of conceptual innovations to showcase the relevance of global citizenship issues in foreign language education and encourage future research. This book will be of interest to scholars in intercultural education, foreign language education, and language teaching, as well as policymakers and foreign language teachers. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution 4.0 license.

The chapters focus on language, teaching and pedagogical issues surrounding refugee education.

The Landscape of Lexicography Alina Villalva,Geoffrey Williams,2019-08-01 This book consists of a series of papers that look at three different aspects of the landscape as seen in dictionaries from across Europe. Multilingual diachronic case studies into lexicographical descriptions of flora, landscape features and colours concentrate on three supposedly simple words: daisies (*Bellis perenis* L.), hills and the colour red. The work is part of the ongoing LandLex initiative, originally developed as part of the COST ENeL - European Network for e-Lexicography - action. The group brings together researchers in lexicography and lexicology from across Europe and is dedicated to studying multilingual and diachronic issues in language. It aims to valorise the wealth of European language diversity as found in dictionaries by developing and testing new digital annotation tools and a historical morphological dictionary prototype. Funded by the Horizon 2020 Framework Programme of the European Union

Collected Works of Velimir Khlebnikov: Letters and theoretical writings
Велимир Хлебников,1987 Dubbed by his fellow Futurists the King of Time, Velimir Khlebnikov (1885-1922) spent his entire brief life searching for a

new poetic language to express his convictions about the rhythm of history, the correspondence between human behavior and the language of the stars. The result was a vast body of poetry and prose that has been called hermetic, incomprehensible, even deranged. Of all this tragic generation of Russian poets (including Blok, Esenin, and Mayakovsky), Khlebnikov has been perhaps the most praised and the more censured. This first volume of the Collected Works, an edition sponsored by the Dia Art Foundation, will do much to establish the counterimage of Khlebnikov as an honest, serious writer. The 117 letters published here for the first time in English reveal an ebullient, humane, impractical, but deliberate working artist. We read of the continuing involvement with his family throughout his vagabond life (pleas to his smartest sister, Vera, to break out of the mold, pleas to his scholarly father not to condemn and to send a warm overcoat); the naive pleasure he took in being applauded by other artists; his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time; his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti; a first draft of his famous zoo poem (O Garden of Animals!); his seriocomic but ultimately shattering efforts to be released from army service; his inexhaustibly courageous confrontation with his own disease and excruciating poverty; and always his deadly earnest attempt to make sense of numbers, language, suffering, politics, and the exigencies of publication. The theoretical writings presented here are even more important

than the letters to an understanding of Khlebnikov's creative output. In the scientific articles written before 1910, we discern foreshadowings of major patterns of later poetic work. In the pan-Slavic proclamations of 1908-1914, we find explicit connections between cultural roots and linguistic ramifications. In the semantic excursions beginning in 1915, we can see Khlebnikov's experiments with consonants, nouns, and definitions spelled out in accessible, if arid, form. The essays of 1916-1922 take us into the future of Planet Earth, visions of universal order and accomplishment that no longer seem so farfetched but indeed resonate for modern readers.

Languages in Contact Lisa Lim, Umberto Ansaldo, 2015-09-29 Introducing new findings from popular culture, the globalised new economy and computer-mediated communication, this is a fascinating study of contact between languages in modern societies. Ansaldo and Lim bring together research on multilingualism, code-switching, language endangerment, and globalisation, into a comprehensive overview of world Englishes and creoles. Illustrated with a wide range of original examples from typologically diverse languages, including Sinitic, Austronesian, Dravidian and other non-Indo-European varieties, the book focuses on structural analyses of Asian ecologies and their relevance for current theories of contact phenomena. Full of new insights, it is essential reading for students and researchers across linguistics, culture and communication.

Encyclopedia of New Year's Holidays Worldwide William D. Crump,2014-04-25 Among the world's myriad cultures and their associated calendars, the idea of a "New Year" is relative and hardly specifies a universal celebration or even a universal point in time. Ways of celebrating the New Year range from the observances of religious rituals and superstitions to social gatherings featuring particular foods, music, dancing, noisemaking, fireworks and drinking. This first encyclopedia devoted exclusively to the New Year includes 320 entries that give a global perspective on the New Year, beyond its traditional Western associations with Christmas. National or regional entries detail the principal traditions and customs of 130 countries, while 27 entries discuss major calendar systems in current use or of significant historical interest. The remaining entries cover a wide variety of subjects including literary works, movies, and television specials; the customs of

specific ethnic groups; universal customs such as toasting and drinking; football bowl games and parades; and the New Year celebrations at the White House and the Vatican.

Endangered Languages and Languages in Danger Luna Filipović, Martin Pütz, 2016-10-03 This peer-reviewed collection brings together the latest research on language endangerment and language rights. It creates a vibrant, interdisciplinary platform for the discussion of the most pertinent and urgent topics central to vitality and equality of languages in today's globalised world. The novelty of the volume lies in the multifaceted view on the variety of dangers that languages face today, such as extinction through dwindling speaker populations and lack of adequate preservation policies or inequality in different social contexts (e.g. access to justice, education and research resources). There are examples of both loss and survival, and discussion of multiple factors that condition these two different outcomes. We pose and answer difficult questions such as whether forced interventions in preventing loss are always warranted or indeed viable. The emerging shared perspective is that of hope to inspire action towards improving the position of different languages and their speakers through research of this kind.

Interpreting language-learning data Amanda Edmonds, Pascale Leclercq, Aarnes Gudmestad, 2020-09-28 This book provides a forum for methodological discussions emanating from researchers engaged in studying how individuals acquire an additional language. Whereas publications in the field of second language acquisition generally report on empirical studies with relatively little space dedicated to questions of method, the current book gave authors the opportunity to more fully develop a discussion piece around a methodological issue in connection with the interpretation of language-learning data. The result is a set of seven thought-provoking contributions from researchers with diverse interests. Three main topics are addressed in these chapters: the role of native-speaker norms in second-language analyses, the impact of epistemological stance on experimental design and/or data interpretation, and the challenges of transcription and annotation of language-learning data, with a focus on data ambiguity. Authors expand on these crucial issues, reflect on best practices, and provide in many instances concrete examples of the impact they have on data interpretation.

Coding For Kids For Dummies Camille McCue, 2019-04-30 A guide for kids who want to learn coding Coding is quickly becoming an essential academic skill, right up there with reading, writing, and arithmetic. This book is an ideal way for young learners ages 8-13 who want more coding knowledge than you can learn in an hour, a day, or a week. Written by a classroom instructor with over a decade of experience teaching technology skills to kids as young as five, this book teaches the steps and logic needed to write code, solve problems, and create fun games and animations using projects based in Scratch and JavaScript. This 2nd Edition is fully updated to no longer require any limited-time software downloads to complete the projects. Learn the unique logic behind writing computer code Use simple coding tools ideal for teaching

kids and beginners Build games and animations you can show off to friends Add motion and interactivity to your projects Whether you're a kid ready to make fun things using technology or a parent, teacher, or mentor looking to introduce coding in an eager child's life, this fun book makes getting started with coding fun and easy!

Applying Linguistics in the Classroom Aria Razfar, Joseph C. Rumenapp, 2013-07-24 Making linguistics accessible and relevant to all teachers, this text looks at language issues in the classroom through an applied sociocultural perspective focused on how language functions in society and in schools—how it is used, for what purposes, and how teachers can understand their students' language practices. While touching on the key structural aspects of language (phonetics, phonology, morphology, and syntax), it does not simply give an overview, but rather provides a way to study and talk about language. Each chapter includes practical steps and suggests tools for applying different kinds of linguistic knowledge in classrooms. The activities and exercises are adaptable to elementary or high school settings. Many examples focus on the intersection of math, science, and language. Teacher case studies show how real teachers have used these concepts to inform teaching practices. Given the increasing use of multimedia resources in today's schools, multiple mediums are integrated to engage educators in learning about language. The Companion Website provides a multitude of relevant resources that illustrate the diversity of language

functions and debates about language in society.
