*The Makers of the Sacred Harp* David Warren Steel, 2024-03-31 This authoritative reference work investigates the roots of the Sacred Harp, the central collection of the deeply influential and long-lived southern tradition of shape-note singing. Where other studies of the Sacred Harp have focused on the sociology of present-day singers and their activities, David Warren Steel and Richard H. Hulan concentrate on the regional culture that produced the Sacred Harp in the nineteenth century and delve deeply into history of its authors and composers. They trace the sources of every tune and text in the Sacred Harp, from the work of B. F. White, E. J. King, and their west Georgia contemporaries who helped compile the original collection in 1844 to the contributions by various composers to the 1936 to 1991 editions. *The Makers of the Sacred Harp* also includes analyses of the textual influences on the music--including metrical psalmody, English evangelical poets, American frontier preachers, camp meeting hymnody, and revival choruses--and essays placing the Sacred Harp as a product of the antebellum period with roots in religious revivalism. Drawing on census reports, local histories, family Bibles and other records, rich oral interviews with descendants, and Sacred Harp Publishing Company records, this volume reveals new details and insights about the history of this enduring American musical tradition.

3D Printing for Artists, Designers and Makers Stephen Hoskins, 2018-02-08 Fully revised and with a new chapter and international case studies, this second edition of the best-selling book traces how artists and designers continue to adapt and incorporate 3D printing technology into their work and explains how the creative industries are directly interfacing with this new technology. Covering a broad range of applied art practice - from fine art and furniture-design to film-making - Stephen

Hoskins introduces some of his groundbreaking research from the Centre for Fine Print Research along with an updated history of 3D print technology, a new chapter on fashion and animation, and new case studies featuring artists working with metal, plastic, ceramic and other materials. A fascinating investigation into how the applied arts continue to adapt to new technologies and a forecast of what developments we might expect in the future, this book is essential reading for students, researchers studying contemporary art and design and professionals involved in the creative industries.
