The Lost Blogs Paul Davidson, 2009-11-29 Over 13,000,000 people are currently blogging with thousands being created each day. But what about the blogs you haven't seen, written by the iconic men and women you're dying to know the most intimate details about but who died before the internet was invented? This original take on the biggest literary development since the paperback offers 200 blogs inspired by the most famous minds in history, detailing their hysterical personal revelations, such as: John Lennon's thoughts after meeting Yoko Ono (and her obsession with the Beatles' publishing rights): Marilyn Monroe's annoyance at her new beau 'J', who breaks off their dates with excuses like having to avert a war in Costa Rica: Read Shakespeare on a treatment for a new play about two princes who misplace their horse and carriage and spend the entire play trying to find it or how a stray hot dog nearly derailed Ghandi's hunger strike: There's also the transcript of Neil Armstrong and Buzz Aldrin's intensely competitive game of Rocks, Paper, Scissors, to decide who would be the first man to set foot on the moon and much, much more. In this book Paul Davidson proves that matters, proving there's no such thing as too much information.

Typing Politics Richard Davis, 2009-05-26 The power of political blogs in American politics is now evident to anyone who follows it. In *Typing Politics*, Richard Davis provides a comprehensive yet concise assessment of the growing role played by political blogs and their relationship with the mainstream media. Through a detailed content analysis of the most popular political blogs--Daily Kos, Instapundit, Michelle Malkin, and Wonkette--he shows the degree to which blogs influence the traditional news media. Specifically, he compares the content of these blogs to four leading newspapers noted for their political coverage: The Washington Post, The New York Times, The Wall Street Journal, and The Washington Times. He explains how political journalists at these papers use blogs to inform their reportage and analyzes general attitudes about the role of blogs in journalism. Drawing on a national survey of political blog readers, Davis concludes with a novel assessment of the blog audience. Compact, accessible, and well-researched, *Typing Politics* will be an invaluable contribution to the literature on a phenomenon that has reshaped the landscape of political communication.

International Blogging Adrienne Russell, Nabil Echchaibi, 2009 Bloggers around the world produce material for local, national and international audiences, yet they are developing in ways that are distinct from the U.S. model. Through case studies of blogs written in English, Chinese, Arab, French, Russian, and Hebrew, this book explores the way blogging is being conceptualized in different cultural contexts. The authors move beyond the most highly trafficked sites to shed light on larger developments taking place online, calling into question assumptions that form the foundation of much of what we read on blogging and, by extension, on global amateur or do-it-yourself media. This book suggests a more nuanced approach to understanding how blogospheres serve communication needs, how they exist in relation to one another, where they exist apart as well as where they overlap, and how they interact with other forms of communication in the larger media landscape.
