The Routledge History of Fashion and Dress, 1800 to the Present Veronique Pouillard, Vincent Dubé-Sénécal, 2023-10-24 The time span covered by The Routledge History of Fashion and Dress starts in the nineteenth century, with the aftermath of the consumers' revolution, and reaches all the way to the present. The fashion and garment industries have been international from the beginning and, as such, this volume looks at the history of fashion and dress through the lenses of both international and global history. Because fashion is also a multifaceted subject with human agency at its core, at the confluence of the material (fabrics, clothing, dyes, tools, and machines) and the immaterial (savoir-faire, identities, images, and brands), this volume adopts a transdisciplinary perspective, opening its pages to researchers from a variety of complementary fields. The chapters in this volume are organized based on their relationship to five fields of study: economics and commerce, politics, business, identities, and historical sources. Paying particular attention to change, the book goes beyond the great fashion capitals and well-known fashion centers and points to the broader geographies of fashion. Particular geographical areas focus on the emergence of new fashion systems and business models, whether they be in Sweden, Bangladesh, or Spain, or on the African continent, considered to be the "new frontier" of the industry. Covering myriad aspects of the subject this is the perfect companion for all those interested in history of dress and fashion in the modern world.

**The Man from Zara (revised Edition)** Covadonga O'Shea, 2024-12-31 Inditex - the group behind Zara, Massimo Dutti, Oysho and Bershka. The no.1 clothing retailer in the world, with over 7,300 retail outlets in over 94 countries and counting. They have become a fashion connoisseur and a formidable business empire that have taken the world by storm. They have a strong brand presence in every major metropolis across the world, with Zara being the most conspicuous. Yet, little is known about this amazing success and the mastermind behind this venture. The Man from Zara tells the story, for the first time, of the genius behind the Inditex retail empire. Who is Armancio Ortega? Where is he from; where is he going? What led him to dream up this empire? Through unprecedented access to Ortega and his closest aides, the author provides a compelling and unique biography of the man responsible for one of this century's most extraordinary business successes.

The key to Bernácer's pioneering thought is that financial speculation is the root cause of economic crises. With this thesis he anticipated the crisis we are now immersed in by almost a century, line by line, and concept by concept.

**The Globalization Myth** Shannon K. O'Neil, 2022-10-18 A case for why regionalization, not globalization, has been the biggest economic trend of the past forty years The conventional wisdom about globalization is wrong. Over the past forty years as companies, money, ideas, and people went abroad more often than not, they looked regional rather than globally. O'Neil details this transformation and the rise of three major regional hubs in Asia, Europe, and North America. Current technological, demographic, and geopolitical trends look only to deepen these regional ties. O'Neil argues that this has urgent implications for the United States. Regionalization has enhanced economic competitiveness and prosperity in Europe and Asia. It

could do the same for the United States, if only it would embrace its neighbors.

**Advanced Digital Marketing Strategies in a Data-Driven Era** Saura, Jose Ramon, 2021-06-25 In the last decade, the use of data sciences in the digital marketing environment has increased. Digital marketing has transformed how companies communicate with their customers around the world. The increase in the use of social networks and how users communicate with companies on the internet has given rise to new business models based on the bidirectionality of communication between companies and internet users. Digital marketing, new business models, data-driven approaches, online advertising campaigns, and other digital strategies have gathered user opinions and comments through this new online channel. In this way, companies are beginning to see the digital ecosystem as not only the present but also the future. However, despite these advances, relevant evidence on the measures to improve the management of data sciences in digital marketing remains scarce. *Advanced Digital Marketing Strategies in a Data-Driven Era* contains high-quality research that presents a holistic overview of the main applications of data sciences to digital marketing and generates insights related to the creation of innovative data mining and knowledge discovery techniques applied to traditional and digital marketing strategies. The book analyzes how companies are adopting these new data-driven methods and how these strategies influence digital marketing. Discussing topics such as digital strategies, social media marketing, big data, marketing analytics, and data sciences, this book is essential for marketers, digital marketers, advertisers, brand managers, managers, executives, social media analysts, IT specialists, data scientists, students, researchers, and academicians in the field.

**Sustainability Compendium: Edition IV** Fibre2Fashion, 2017-11-01 Sustainability Compendium is an informative sourcebook that holds detailed description of hundreds of sustainable textile companies filtered from different categories of the textile value chain. It's a guiding tool for companies who are seeking to turn their business sustainable as well as be an inspiration for others to turn towards ecological business. This compendium gives the featured companies a voice to narrate their sustainable story to the corporate world. Each participant has a space in this feature to present their sustainable activities setting an example that would lead others to join the sustainable drive. Sustainable, is what it has to be. Fashion in itself is a dynamic industry, and if you choose to look at fashion solely from the sustainability point of view, then keeping track of developments is simply not easy. Inventions, innovations and ideas have already changed the narrative, and the axioms of the business of fashion that dominated the discourse at the turn of the century, today sound hopelessly outdated and out-of-place. 'Sustainable fashion' was just another segment of the industry till even in the early half of this decade. But not anymore. Thought leaders are unanimous about one thing—sustainable fashion can no more be a niche, and many of them agree that if it ain't sustainable, then it ain't fashion. By and by, many brands are lending credence to that idea, while for many others the idea is just beginning to sink in. This is where this compendium comes in—with ideas. There are many articles in this volume that discuss different aspects threadbare. 'Fashionable=Sustainable. Is that even possible?' argues that there is more to sustainable fashion than meets the eye. The article asserts that the relationship between fashion and sustainability is active and complex, and each time we look at the key ideas or issues at stake, different aspects seem to come to light. It looks at sustainability in manufacturing, working conditions of garment workers, and the role of the fashion designer in the entire process. Therein, 'Revitalising a lifestyle' is an interview with Edric Ong, an award-winning Malaysian designer of natural textiles, fashion and crafts. Currently, Senior Vice-President of the World Crafts Council Asia Pacific, he set up the World Eco-Fibre and Textile (WEFT) Network to further the cause of natural fibres and dyes. In a freewheeling interview, Ong talks about sustainable fashion and where it is going globally, and how it can be made a more permanent mode of retail fashion. He also talks about his well-known experiments with ikat, and points out that eco-lifestyle is about going back to the basics. 'The True Cost of Fast Fashion' goes ahead to underline the fact that it is indeed possible to improve and impact almost every aspect of the production process and factors such as scale, technical viability and global supply chains are no longer limiting as long as businesses are committed to paying the true cost of production. And, 'No, fast is not sustainable' takes a deep dive into the entire gamut of fashion, right from the birth of the concept to the explosive growth of the segment, and finally the backlash. I hope this fourth edition will give you thoughts to mull over and even implement some in your day to day business.

**Responsible Business in a Changing World** Belén Díaz Díaz, Nicholas Capaldi, Samuel O. Idowu, René Schmidpeter, 2020-05-11 This book explores the current state of Corporate Social Responsibility (CSR) from an international perspective, the goal being to share ideas and visions for a sustainable future and to provide useful guidelines for academics, practitioners and policymakers in the context of the 2030 "Agenda for Sustainable Development" released by the United Nations. Research on CSR has evolved considerably over the last three decades. However, there are still many unanswered questions concerning the sustainability of business in an increasingly changing world, for example: If most companies consider CSR to be valuable to their organizations, why do only 15% of them systematically implement Social Responsibility initiatives? If CSR has been found to be profitable for companies, why are they so reluctant to develop an active, internal CSR policy? Why are there such significant differences in CSR adoption from country to country? Why does it take a huge crisis to make politicians react and regulate certain core CSR issues? This contributed volume answers these questions, presenting a wealth of case studies and new approaches in the process.

**Global Marketing** Ilan Alon, Eugene Jaffe, Christiane Prange, Donata Vianelli, 2020-08-19 Global Marketing, 3rd edition, provides students with a truly international treatment of the key principles that every marketing manager should grasp. International markets present different challenges that require a marketer to think strategically and apply tools and techniques creatively in order to respond decisively within a fiercely competitive environment. Alon et al. provide students with everything they need to rise to the challenge: Coverage of small and medium enterprises, as well as multinational corporations, where much of the growth in international trade and global marketing has occurred; A shift toward greater consideration of services marketing as more companies move away from manufacturing; A shift from developed markets to emerging markets with more dynamic environments; A focus on emerging markets to equip students with the skills necessary to take advantage of the opportunities that these rapidly growing regions present; Chapters on social media, innovation, and technology teaching students how to incorporate these new tools into their marketing strategy; New material on sustainability, ethics, and corporate social responsibility—key values for any modern business; Short and long cases and examples throughout the text show students how these principles and techniques are applied in the real world. Covering key topics not found in competing books, Global Marketing will equip today's students with the knowledge and confidence they need to become leading marketing managers. A companion website features an instructor's manual with test questions, as well as additional exercises and examples for in-class use.

**Gendered Capitalism** Paula A. De La Cruz-Fernández, 2021-05-05 Gendered Capitalism: Sewing Machines and Multinational Business in Spain and Mexico, 1850-1940 is a history of the gendered corporation, a study that examines how ideas and ideals about domesticity and the cultures of sewing and embroidery, being gender-specific, shaped the US-headquartered Singer Sewing Machine Company's operations around the world. In contrast to production-driven and culture-neutral analyses of the multinational enterprise, this book focuses on both the supply and the demand side to argue that consumers and the cultural worlds of those—mainly women—using the sewing machine for personal purposes or for the market shaped corporate organization. This book is a global history of Singer, but it also focuses on the cases of Spain and Mexico to highlight nations where the sewing machine multinational never established manufacturing operations. Casa Singer was a mostly profitable and a long-term selling and marketing operation in both countries. Gendered Capitalism demonstrates that local Spanish and Mexican agents, both men and women, developed and expanded Singer's selling system to the extent that the multinational company was seen as domestic, both in the location sense, and because of its focus on the private sphere of the home. By bringing the cases of Spain and Mexico, and the cultural, everyday realm of practices related to sewing and embroidery that the sewing machine was part of, to the center of the study of international business, Gendered Capitalism further reveals the layers of complexities and multitudes that conform the history of global capitalism. This book will be of interest to readers and scholars in the fields of business history, economic cultural history, management studies, international business, women's history, gender studies, and the history of technology.
