After revealing his secret identity as Iron Man, Tony Stark aims to engineer a better world. He is shifting the focus of Stark Industries from destructive weapons to life-improving technologies. With his revelation and his plan, Tony expects fame and adulation but he is only going to get more trouble . . After suffering a tragic, public failure, Tony knows he must improve Iron Man if he ever hopes to defeat a devastating new threat. One solution is a potentially lethal techno-organic virus known as Extremis. It will grant Tony more power than he has ever known—and test his spirit to the breaking point . . . Adapted from the graphic novel by Warren Ellis and Adi Granov. Praise for Iron Man: Extremis “Javins is a masterful writer when it comes to convincing the reader of the sensory details of travel, of locations and their character, and even more adept at portraying characters in a psychologically realistic way. . . . The dialogue is as sharp, appealing, and funny as the films are known for, and are windows into character personality as well.” –The Beat

Augmented Brett King,Andy Lark,Alex Lightman,JP Rangaswami,2016-05-15 The Internet and smartphone are just the latest in a 250-year- long cycle of disruption that has continuously changed the way we live, the way we work and the way we interact. The coming Augmented Age, however, promises a level of disruption, behavioural shifts and changes that are unparalleled. While consumers today are camping outside of an Apple store waiting to be one of the first to score a new Apple Watch or iPhone, the next generation of wearables will be able to predict if we’re likely to have a heart attack and recommend a course of action. We watch news of Google’s self-driving cars, but don’t likely realise this means progressive cities will have to ban human drivers in the next decade because us humans are too risky. Following on from the Industrial or machine age, the space age and the digital age, the Augmented Age will be based on four key disruptive themes–Artificial Intelligence, Experience Design, Smart Infrastructure, and HealthTech. Historically the previous ‘ages’ brought significant disruption and changes, but on a net basis jobs were created, wealth was enhanced, and the health and security of society improved. What will the Augmented Age bring? Will robots take our jobs, and AI’s subsume us as inferior intelligences, or will this usher in a new age of abundance? Augmented is a book on future history, but more than that, it is a story about how you will live your life in a world that will change more in the next 20 years than it has in the last 250 years. Are you ready to adapt? Because if history proves anything, you don't have much of a choice.
