**Artificial Intelligence and Legal Analytics** Kevin D. Ashley, 2017-07-10 The field of artificial intelligence (AI) and the law is on the cusp of a revolution that began with text analytic programs like IBM's Watson and Debater and the open-source information management architectures on which they are based. Today, new legal applications are beginning to appear and this book - designed to explain computational processes to non-programmers - describes how they will change the practice of law, specifically by connecting computational models of legal reasoning directly with legal text, generating arguments for and against particular outcomes, predicting outcomes and explaining these predictions with reasons that legal professionals will be able to evaluate for themselves. These legal applications will support conceptual legal information retrieval and allow cognitive computing, enabling a collaboration between humans and computers in which each does what it can do best. Anyone interested in how AI is changing the practice of law should read this illuminating work.

Illustrations Stories Comics Greeting Cards Articles What's so special about this book? It explains how to make prompts to generate art and creative content - a very useful skill for any artist or hobbyist making art with powerful artificial intelligence tools. Enjoy browsing through a gallery of hundreds of illustrations made with prompts and have fun! Easy-to-follow and well structured The book is well structured, so you can quickly find your genres or styles of illustrations or artwork and use hints, guidance and copy-paste prompts that I tested while working on this book, or use Livebook (included) to

create prompts, notebooks and more. Save time and start with best practices Creating a great artwork with artificial intelligence takes time. The book provides best practices and tested prompts to get started quickly. What is a prompt? A prompt is a loosely defined input, like a phrase or instruction that tells A.I. what to do. The art of creating prompts is just like the art of talking to people: if you're skilled in this art you'll get fantastic results! More creative AI resources: What's new in this book: besides lots of new prompt tips, each prompt in this book is available online on Livebook, a new resource where you can keep and share your prompts, play, experiment, make articles, posts, illustrations, books, websites, and more. Livebook helps you creating content based on just your ideas (no special skills necessary), and provides a content management platform for generative AI, with lots of easy-to-use generative AI tools built-in: the visual Prompt Maker, Comics Maker, Greeting Card Maker, Story makers, and tons of templates as part of the Prompt Mania prompt garden. Ta-Da! Meet the Prompt Maker: one of the new tools included in Livebook simplifies prompt engineering, shortening the path from your ideas to content: the tool will automatically make awesome visual and text prompts for you, saving you typing and time from a single idea. Prompts made by Livebook Prompt Maker fit any transformer, and significantly improve the output quality for Google, OpenAI, Midjourney, and other models. Also in the book: multi-modal prompts - for video, images, text and more! While the first Art of Prompts book focused purely on imaging and art, I decided to include more tips in this book that also cover text and videos. So, in addition to vision and images, in this book you'll find entirely new comics, text and conversation sections, including Google tools and new models like multi-modal Gemini, that explains the art of getting what you want from machines and artificial intelligence. This book is to make anyone productive with AI, you don't need to be a data scientist to use methods and tools I share here. I recommend checking books in this series for the background of many methods explained here. Livebook for Business brings a comprehensive generative AI solution for businesses, teams and organizations. For example, at the US Olympic and Paralympic Committee, Livebook powers AI Coaching that teams and coaches as part of long-term Team USA readiness program for LA Olympics 2028! It is the first ever content management system (CMS) designed from the ground up to work with generative AI. Livebook generative AI kiosk had been installed at the Computer History Museum in Silicon Valley, next to the first computers and processors, entertaining visitors with generative stories. Hope you enjoy this book, learn, and have fun!

**A Statistical History of Rugby League** Stephen Kane, 2013-06-08 A Statistical History of Rugby League I always wanted to produce these stats as just a way to take my mind off my back injury and help fill in my days but I also wanted them to be as accurate as I could make them, so as I found stats I had to cross check them with other books and websites and to try to be as accurate as possible and with various sites and books and microfilm I actually went through every game ever played. there are the players stats in alphabetical order then there is the order of Darren Lockyer on 355 games down to every player that just played 1 game, (1 game is still more than most players ever got a chance to play), then there is the list of games played at 1 club and then the lists of pointscorers from Hazam El Masri all the way down to the guys that kicked 1 field goal for a solitary point, as well as the pointscorers at 1 club, also the try scorers lists from The Great Ken Irvine on 212 all the way to 1 and at 1 club Ken Irvine on 171 to 1 again, then goalkickers and field goal kickers. then with the club stats I have added in the records for more than 1 try in a game and all the Hat tricks 4's, 5's, 6's 7's and eight in a game also the most points, tries, goals f/goals in a game season and career at every club including the clubs that are no longer around, like Cumberland who were only in for 1 season. now with these statistics there may be people out there that are either the players or family of the players that the stats are about and corrections may be needed and I am happy for any feedback, but please remember this is as accurate as I could find with the resources I had available, and there is no opinion involved just cold hard stats, some of the sin binned players I had to go back through some 1000 hours of DVD's and video tapes to find which particular brawl or punch having said that there is 2 of these stats where I have included my opinion the first is for the Golden Boot Award, there was a period between 1991-1998 where the award wasn't given, so I have listed the players that I believe should have won the award, but I took into consideration the RLW player of the Year the Dally M award, the English Player of the Year and various other Awards that were on offer in those years, the other one and I hope this causes much discussion is in the State of Origin Records, in particular the 1987 Series, if you ask a Queenslander the Game in Los Angeles was an Exhibition Match, but the way I see it if it was a joke match why did they send a full strength Team, so with New South Wales winning Games 1 and 4 and Queensland winning Games 2 and 3 the series was Drawn 2 all, I know that with Queensland winning the Last 7 Series it Doesn't mean much as they have the Series Overall lead Anyway, but as a Passionate Blues Supporter this is a Wrong that Historically should be Righted. Anyway that all being said I hope you enjoy the read and maybe even

end some arguments with these stats as much as I have enjoyed bringing them to you and I will continue to do so in the future.

Modeling Legal Argument Kevin D. Ashley, 1990 Modeling Legal Argument provides a comprehensive treatment of case-based reasoning and a detailed description of a computer program called Hypo, that models the way attorneys argue with cases, real and hypothetical. The program offers significant advantages over keyword case retrieval systems in the legal field and demonstrates how to design expert systems that assist the user by presenting reasonable alternative answers on all sides of an issue and by citing case examples to explain their advice. Hypo analyzes problem situations dealing with trade secrets disputes, retrieves relevant legal cases from its database and fashions them into reasonable legal arguments about who should win. The arguments demonstrate the program's ability to reason symbolically with past cases, to draw factual analogies between cases, to cite them in arguments, to distinguish them, and to pose counter-examples and hypotheticals based on past cases. Modeling Legal Argument discusses the law as a paradigm of case-based argument, introduces Hypo and its adversarial reasoning process, provides an overview of the Hypo program, and gives extended examples of the model's reasoning capabilities. It describes the case knowledge base, a dimensional index, basic mechanisms of case-based reasoning, and offers a theory of case-based argument in Hypo. Ashley evaluates Hypo's performance and takes up adversarial case-based reasoning beyond the law and extensions of the Hypo model. Kevin D. Ashley is a Research Scientist at the Learning Research and Development Center and Assistant Professor of Law at the University of Pittsburgh. Modeling Legal Argument is included in the Artificial Intelligence and Legal Reasoning series, edited by L. Thorne McCarty and Edwina L. Rissland.

Research Handbook on the Law of Artificial Intelligence Woodrow Barfield, Ugo Pagallo, 2018-12-28 The field of artificial intelligence (AI) has made tremendous advances in the last two decades, but as smart as AI is now, it is getting smarter and becoming more autonomous. This raises a host of challenges to current legal doctrine, including whether AI/algorithms should count as 'speech', whether AI should be regulated under antitrust and criminal law statutes, and whether AI should be considered as an agent under agency law or be held responsible for injuries under tort law. This book contains chapters from US and international law scholars on the role of law in an age of increasingly smart AI, addressing these and other issues that are critical to the evolution of the field.

Argument Types and Fallacies in Legal Argumentation Thomas Bustamante,Christian Dahlman,2015-04-07 This book provides theoretical tools for evaluating the soundness of arguments in the context of legal argumentation. It deals with a number of general argument types and their particular use in legal argumentation. It provides detailed analyses of argument from authority, argument ad hominem, argument from ignorance, slippery slope argument and other general argument types. Each of these argument types can be used to construct arguments that are sound as well as arguments that are unsound. To evaluate an argument correctly one must be able to distinguish the sound instances of a certain argument type from its unsound

instances. This book promotes the development of theoretical tools for this task.

**Coherence: Insights from Philosophy, Jurisprudence and Artificial Intelligence** Michał Araszkiewicz, Jaromír Šavelka,2013-04-05 This book is a thorough treatise concerned with coherence and its significance in legal reasoning. The individual chapters present the topic from the general philosophical perspective, the perspective of legal-theory as well as the viewpoint of cognitive sciences and the research on artificial intelligence and law. As it has turned out the interchange of knowledge among these disciplines is very fruitful for each of them, providing mutual inspiration and increasing understanding of a given topic. This book is a unique resource for anyone interested in the concept of coherence and the role it plays in reasoning. As this book captures important contemporary issues concerning the ongoing discussion on coherence and law, those interested in legal reasoning should find it particularly helpful. By presenting such a broad scope of views and methods on approaching the issue of coherence we hope to promote the general interest in the topic as well as the academic research that centers around coherence and law.

**The American Civil War of 2018** Brandon M. Larson,2011-09-29 The year is 2018, the world is in economic and political chaos, and the United States of America has once again been divided by Civil War. The Democratic and Republican political parties have become much more than just political parties. They now represent the struggle between capitalism and socialism. This struggle led to the eventual division of the United States of America in 2017. Republicans, Tea Party supporters, Libertarians, and some Moderate Democrats fled south and formed the Southern Republic of America to end the corruption and influence of the federal government. Continued tax hikes, high unemployment, hyperinflation and a failing economy sent millions of Americans and most States into bankruptcy. When the people finally had enough of big government, they made their voices heard. The Southern Republic of America was founded using the Constitution and the Bill of Rights as they were interpreted before they were manipulated or

ignored by the United States Government. However, the United States Federal Government is now on the offensive and ready to put down the peaceful secession. In an effort to weaken and slow the United States Military, the Southern Republic of America's government enlisted the help of a Special Forces team called Task Force 24. This extraordinary group of men and women are some of the best handpicked specialists in the world. Their daunting mission is to slow down the United States Military by any means necessary, before the meaning of freedom, liberty and justice for all is lost forever under the socialist government of the United States of America.

The Other Side of the Fence Cynthia Hudgins, 2023-01-31 Two people have written this book. The first person was the child who was still hurting, who hadn't reconciled the past with the present, who didn't want to be what she was. The other is the adult who has faced her demon and laid it to rest for once and for all. This story moves along like a yo-yo, up and down, forward and back. It is a mishmash of what was begone with all these other voices added which I, the obedient, eager to please, whatever I am... frustrated artist, dutiful daughter, obsessive/compulsive housekeeper, possible lunatic, mother, grandmother, great grandmother, or tired old lady, am slowly working my way through the pages... the painful for me, and probably boring for you, story of my life. I suppose there will be those who will fault me for writing this book. Blacks will think, "What has she got to cry about? She could have passed if she'd wanted to." Whites will think whatever I got I deserved for being deceitful, for hiding my ancestry behind a white facade (as if I could help it). I can relate to both points of view. If this book should be published, some people my age who read it may say, "That's not the way I remember those times," or "That wasn't the way I was taught in my school." This could very well be. I've written about my time and place. These are my memories of the way things were in Coronado, California, from 1924, when I was three years old until I moved away in 1940 when I was nineteen and of things that I experienced after that. The original draft of this story ended with my suicide.
