Children and Citizenship Antonella Invernizzi, Jane

Williams, 2007-12-12 'This collection...is outstanding. It has an excellent grasp of the field and students in fields of both social studies of childhood and children's rights and citizenship will gain a lot from reading and studying the book' - Jens Qvortrup, Professor of Sociology, University of Trondheim 'Anyone who is concerned with citizenship should grapple with the thesis in this collection. This stimulating book will provoke discussion of what is involved in recognising that children are as much part of our society as adults' - Professor Michael Freeman, Editor of International Journal of Children's Rights Children and Citizenship offers a contemporary and critical approach to notions of children's citizenship. Drawing on different disciplinary perspectives and including contributions by leading scholars in the field, this book makes explicit connections between theoretical approaches, representations of childhood, the experiences of children themselves, legal instruments, policies and their implementation. Each chapter presents complex issues in an accessible way, helping readers to understand notions of children's citizenship that are embedded in contemporary debates. Children and Citizenship is an important and timely book and will be invaluable for undergraduate and postgraduate students across a wide number of disciplines, including health, social work, childhood studies, youth studies, education, law and social policy, together with policy-makers and practitioners in allied areas. Antonella Invernizzi is a Senior Lecturer at the Department of Applied Social Sciences, Swansea University. Jane Williams is a former UK and Welsh Assembly government lawyer now based in the School of Law, Swansea University where she teaches Public Law, aspects of child law and children's rights

Transforming the Workforce for Children Birth Through Age 8
National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about

how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement

from preschools, and elementary, middle, and high schools. Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress. CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.

Population: 485 Michael Perry, 2009-10-13 "Part portrait of a place, part rescue manual, part rumination of life and death, Population: 485 is a beautiful meditation on the things that matter." — Seattle Times Welcome to New Auburn, Wisconsin (population: 485) where the local vigilante is a farmer's wife armed with a pistol and a Bible, the most senior member of the volunteer fire department is a cross-eyed butcher with one kidney and two ex-wives (both of whom work at the only gas station in town), and the back roads are haunted by the ghosts of children and farmers. Michael Perry loves this place. He grew up here, and now—after a decade away—he has returned. Unable to polka or repair his own pickup, his farm-boy hands gone soft after years of writing, Perry figures the best way to regain his credibility is to join the volunteer fire department. Against a backdrop of fires and tangled wrecks, bar fights and smelt feeds, Population: 485 is a comic and sometimes heartbreaking true tale leavened with quieter meditations on an overlooked America.

Mental Disorders and Disabilities Among Low-Income Children National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Children, Youth, and Families, Board on the Health of Select Populations, Committee to Evaluate the Supplemental Security Income Disability Program for Children with Mental Disorders, 2015-10-28 Children living in poverty are more likely to have mental health problems, and their conditions are more likely to be severe. Of the approximately 1.3 million children who were recipients of Supplemental Security Income (SSI) disability benefits in 2013, about 50% were disabled primarily due to a mental disorder. An increase in the number of children who are recipients of SSI benefits due to mental disorders has been observed through several decades of the program beginning in 1985 and continuing through 2010. Nevertheless, less than 1% of children in the United States are recipients of SSI disability benefits for a mental disorder. At the request of the Social Security Administration, Mental Disorders and Disability Among Low-Income Children compares national trends in the number of children with mental disorders with the trends in the number of children receiving benefits from the SSI program, and describes the possible factors that may contribute to any differences between the two groups. This report provides an overview of the current status of the diagnosis and treatment of mental disorders, and the levels of impairment in the U.S. population under age 18. The report focuses on 6 mental

disorders, chosen due to their prevalence and the severity of disability attributed to those disorders within the SSI disability program: attention-deficit/hyperactivity disorder, oppositional defiant disorder/conduct disorder, autism spectrum disorder, intellectual disability, learning disabilities, and mood disorders. While this report is not a comprehensive discussion of these disorders, *Mental Disorders and Disability Among Low-Income Children* provides the best currently available information regarding demographics, diagnosis, treatment, and expectations for the disorder time course - both the natural course and under treatment.
