Children and Citizenship Antonella Invernizzi, Jane Williams, 2007-12-12 'This collection...is outstanding. It has an excellent grasp of the field and students in fields of both social studies of childhood and children's rights and citizenship will gain a lot from reading and studying the book' - Jens Qvortrup, Professor of Sociology, University of Trondheim 'Anyone who is concerned with citizenship should grapple with the thesis in this collection. This stimulating book will provoke discussion of what is involved in recognising that children are as much part of our society as adults' - Professor Michael Freeman, Editor of International Journal of Children's Rights *Children and Citizenship* offers a contemporary and critical approach to notions of children's citizenship. Drawing on different disciplinary perspectives and including contributions by leading scholars in the field, this book makes explicit connections between theoretical approaches, representations of childhood, the experiences of children themselves, legal instruments, policies and their implementation. Each chapter presents complex issues in an accessible way, helping readers to understand notions of children's citizenship that are embedded in contemporary debates. *Children and Citizenship* is an important and timely book and will be invaluable for undergraduate and postgraduate students across a wide number of disciplines, including health, social work, childhood studies, youth studies, education, law and social policy, together with policy-makers and practitioners in allied areas. A Kind of Spark Elle McNicoll, 2022-10-11 Perfect for readers of *Song for a Whale* and *Counting by 7s*, a neurodivergent girl campaigns for a memorial when she learns that her small Scottish town used to burn witches simply because they were different. A must-read for students and adults alike. - School Library Journal, Starred Review Ever since Ms. Murphy told us about the witch trials that happened centuries ago right here in Juniper, I can't stop thinking about them. Those people weren't magic. They were like me. Different like me. I'm autistic. I see things that others do not. I hear sounds that they can ignore. And sometimes I feel things all at once. I think about the witches, with no one to speak for them. Not everyone in our small town understands. But if I keep trying, maybe someone will. I won't let the witches be forgotten. Because there is more to their story. Just like there is more to mine. Award-winning and neurodivergent author Elle McNicoll delivers an insightful and stirring debut about the European witch trials and a girl who refuses to relent in the fight for what she knows is right.

Transforming the Workforce for Children Birth Through Age 8 National Research Council, Institute of Medicine, Board on Children, Youth, and Families, Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success, 2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their

future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Population: 485 Michael Perry, 2009-10-13 “Part portrait of a place, part rescue manual, part rumination of life and death, Population: 485 is a beautiful meditation on the things that matter.” — Seattle Times Welcome to New Auburn, Wisconsin (population: 485) where the local vigilante is a farmer’s wife armed with a pistol and a Bible, the most senior member of the volunteer fire department is a cross-eyed butcher with one kidney and two ex-wives (both of whom work at the only gas station in town), and the back roads are haunted by the ghosts of children and farmers. Michael Perry loves this place. He grew up here, and now—after a decade away—he has returned. Unable to polka or repair his own pickup, his farm-boy hands gone soft after years of writing, Perry figures the best way to regain his credibility is to join the volunteer fire department. Against a backdrop of fires and tangled wrecks, bar fights and smelt feeds, Population: 485 is a comic and sometimes heartbreaking true tale leavened with quieter meditations on an overlooked America.

School, Family, and Community Partnerships Joyce L. Epstein, Mavis G. Sanders, Steven B. Sheldon, Beth S. Simon, Karen Clark Salinas, Natalie Rodriguez Jansorn, Frances L. Van Voorhis, Cecelia S. Williams, 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students’ education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller *School, Family, and Community Partnerships: Your Handbook for Action*, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and

continually improve their programs of family and community engagement.

The Shortest Day Wendy Pfeffer, 2014-09-04 The science, history, and cultural significance of the shortest day of the year: The Winter Solstice! The beginning of winter is marked by the solstice, the shortest day of the year. Long ago, people grew afraid when each day had fewer hours of sunshine than the day before. Over time, they realized that one day each year the sun started moving toward them again. In lyrical prose and cozy illustrations, this book explains what the winter solstice is and how it has been observed by various cultures throughout history. Many contemporary holiday traditions were borrowed from ancient solstice celebrations. Using clear, concise language, Pfeffer discusses important ideas behind the shortest day of the year, such as the change from autumn to winter as well as the concept of the Earth's tilting away from the sun.... While appealing to a younger audience, this treatment combines the cultural approach of Ellen Jackson's *The Winter Solstice* (Millbrook, 1994) and the activities of Sandra Markle's *Exploring Winter* (Atheneum, 1984; o.p.). Pfeffer uses an easy, comfortable tone for conveying the basic information, and the end pages will provide additional opportunities for would-be astronomers to explore the principles on their own. —School Library Journal Simple science activities, ideas for celebrating the day in school and at home, and a further-reading list are included.

Advocating for Children in Foster and Kinship Care Mitchell Rosenwald, Beth N. Riley, 2010-03-11 This book is the first to provide strategies for effective advocacy and placement within the foster care and kinship care systems. It also takes a rare look at the dynamics of the foster and kinship relationship, not just among children and the agency workers and service providers who intervene on their behalf, but also between children and those who take in and care for them as permanency develops. Drawing on their experience interacting with and writing about the institution of foster care, Mitchell Rosenwald and Beth N. Riley have composed a unique text that helps practitioners, foster parents, and relative caregivers realize successful transitions for youth, especially considering the traumas these children may suffer both before and after placement. Advocating for a child's best interests must begin early and remain consistent throughout assignment and adjustment. For practitioners, Rosenwald and Riley emphasize the best techniques for assessing a family's capabilities and for guiding families through the challenges of foster care. Part one details the steps potential foster parents and kinship caregivers must take, with the assistance of practitioners, to prepare themselves for placement. Part two describes tactics for successful advocacy within the court system, social service agencies, schools, and the medical and mental health establishments. Part three describes how to lobby for change at the agency and legislative levels, as well as within a given community. The authors illustrate recommendations through real-life scenarios and devote an entire chapter to brokering positive partnerships among practitioners, families, and other teams working to protect and transition children.

Depression in Parents, Parenting, and Children Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Depression, Parenting Practices, and the Healthy Development of Children, 2009-10-28 Depression is a widespread condition affecting approximately 7.5 million parents

in the U.S. each year and may be putting at least 15 million children at risk for adverse health outcomes. Based on evidentiary studies, major depression in either parent can interfere with parenting quality and increase the risk of children developing mental, behavioral and social problems. Depression in Parents, Parenting, and Children highlights disparities in the prevalence, identification, treatment, and prevention of parental depression among different sociodemographic populations. It also outlines strategies for effective intervention and identifies the need for a more interdisciplinary approach that takes biological, psychological, behavioral, interpersonal, and social contexts into consideration. A major challenge to the effective management of parental depression is developing a treatment and prevention strategy that can be introduced within a two-generation framework, conducive for parents and their children. Thus far, both the federal and state response to the problem has been fragmented, poorly funded, and lacking proper oversight. This study examines options for widespread implementation of best practices as well as strategies that can be effective in diverse service settings for diverse populations of children and their families. The delivery of adequate screening and successful detection and treatment of a depressive illness and prevention of its effects on parenting and the health of children is a formidable challenge to modern health care systems. This study offers seven solid recommendations designed to increase awareness about and remove barriers to care for both the depressed adult and prevention of effects in the child. The report will be of particular interest to federal health officers, mental and behavioral health providers in diverse parts of health care delivery systems, health policy staff, state legislators, and the general public.

Steps Every State Should Take to Implement the Child Care Provisions of the Family Support Act Nancy Ebb, 1989

Mental Disorders and Disabilities Among Low-Income Children National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Children, Youth, and Families, Board on the Health of Select Populations, Committee to Evaluate the Supplemental Security Income Disability Program for Children with Mental Disorders, 2015-10-28 Children living in poverty are more likely to have mental health problems, and their conditions are more likely to be severe. Of the approximately 1.3 million children who were recipients of Supplemental Security Income (SSI) disability benefits in 2013, about 50% were disabled primarily due to a mental disorder. An increase in the number of children who are recipients of SSI benefits due to mental disorders has been observed through several decades of the program beginning in 1985 and continuing through 2010. Nevertheless, less than 1% of children in the United States are recipients of SSI disability benefits for a mental disorder. At the request of the Social Security Administration, Mental Disorders and Disability Among Low-Income Children compares national trends in the number of children with mental disorders with the trends in the number of children receiving benefits from the SSI program, and describes the possible factors that may contribute to any differences between the two groups. This report provides an overview of the current status of the diagnosis and treatment of mental disorders, and the levels of impairment in the U.S. population under age 18. The report focuses on 6 mental disorders, chosen due to their prevalence and the severity of disability attributed to those disorders within the SSI disability

program: attention-deficit/hyperactivity disorder, oppositional defiant disorder/conduct disorder, autism spectrum disorder, intellectual disability, learning disabilities, and mood disorders. While this report is not a comprehensive discussion of these disorders, Mental Disorders and Disability Among Low-Income Children provides the best currently available information regarding demographics, diagnosis, treatment, and expectations for the disorder time course - both the natural course and under treatment.
