*Exotix Developing Markets Guide* Exotix Capital,2019-03-20 Welcome to the latest edition of the Exotix Capital Developing Markets Guide, produced by Tellimer – the developing markets experts. This is the sixth edition, the previous one having been published in February 2011 when the concept of investing in frontier economies was beginning to gain traction again after being derailed by the global financial crisis. A lot has happened since then. This guide is written for the serious frontier market investor, policymaker or academic analyst who is looking to maximise returns, improve policymaking or advance research through superior knowledge. We provide analysis and outlooks for 42 frontier economies along with detailed descriptions of their debt histories and restructuring experiences, and with the main investable instruments in the hard currency sovereign and corporate space in each. We aim to give our clients a convenient reference point to check details on loans and illiquid bonds and include as many frontier markets, illiquid instruments, nonperforming or restructured bonds and loans as possible.

Land Use Dynamics and Governance in Sungai Selangor Watershed Jamilah Mohamad,Goh Hong Ching,2015-11-24 Watersheds have been widely

recognized as the best scale at which to govern water. At the geographic scale of the watersheds, stakeholders are able to make decisions on how to manage water resources in a setting more conducive to participation. Through coordinated development and management of water, land, and related resources, economic and social welfare can be optimized without compromising sustainability of vital environmental systems. Sungai Selangor is an important water resource for the state of Selangor. It is the major contributor in meeting water demand to the Selangor State and Kuala Lumpur. Since early days, Sungai Selangor has played a central role in the development of settlements in northern Selangor. The research described here is an attempt to understand the development forces operating in the Sungai Selangor watershed. The approach taken is intentionally multi-disciplinary, as it attempts to paint a broad brush picture of the current situation within the Sungai Selangor watershed. Increasing pressures on land development is a major factor that causes land use conflicts in the watershed. Spatial-environmental governance should improve collaboration and connections between citizens and decision-makers at the watershed scale. Many issues within the economic, social or environmental realm necessitate an understanding of the spatial context within which such forces operate. The book is organized in ten chapters, each chapter being devoted towards addressing particular issues considered prevalent or outstanding within the community living within the watershed. Although the book has been written in an academic manner, it should also appeal to the general public and students in higher education institutions as it relates to topical issues. Beginner researchers may find that the discussion of various issues within a location-specific context might spark off their interest to begin their own research on particular aspects that appeal to their own area of expertise.

**Talking Politics** Kum-Kum Bhavnani, 1991-06-06 Originally published in 1991, this study examines the views of politics presented by young people in contemporary Britain. Bhavnani argues that previous studies of youth and youth culture were limited by too great a reliance on simple survey techniques, and by lack of attention to conceptions of politics amongst young people, and to politics as a series of lived relationships rather than a set of external objects. Instead, she uses ethnographic approaches and open-response interviewing within the broad theoretical framework of social representations. The political is taken to refer to the ways in which people regulate, and attempt to regulate with a view to challenging, unequal social relationships. Within this the specific issues examined are employment, unemployment, youth training schemes, democracy and voting, racism, and marriage. Bhavnani's analysis, organised by themes such as disposable income and social and personal control, tackles questions of power in the research

process; and a notion of discursive configurations as distinct from social representations.

**Jōkei and Buddhist Devotion in Early Medieval Japan** James L. Ford, 2006-08-24 This is the first book-length study in any language of Jōkei (1155-1213), a prominent Buddhist cleric of the Hossō (Yogācāra) school, whose life bridged the momentous transition from Heian (794-1185) to Kamakura (1185-1333) Japan. Kamakura Buddhism has drawn notable scholarly attention, largely because it marks the emergence of new schools—Pure Land, Nichiren, and Zen—that came to dominate the Buddhist landscape of Japan. Although Jōkei is invariably cited as one of the leading representatives of established Buddhism during the Kamakura period, he has been seriously neglected by Western scholars. In this book, James L. Ford aims to shed light on this pivotal and long-overlooked figure. Ford argues convincingly that Jōkei is an ideal personage through which to peer anew into the socio-religious dynamics of early medieval Japan. Indeed, Jōkei is uniquely linked to a number of decisive trends and issues of dispute including: the conflict between the established schools and Hōnen's exclusive nenbutsu movement; the precept-revival movement; doctrinal reform efforts; the proliferation of prominent reclusive monks (tonseis); the escalation of fundraising (kanjin) campaigns and popular propagation; and the conspicuous revival of devotion toward 'Sākyamuni and Maitreya. Jōkei represents a paradigm within established Buddhism that recognized the necessity of accessing other powers through esoteric practices, ritual performances, and objects of devotion. While Jōkei is best known as a leading critic of Hōnen's exclusive nenbutsu movement and a conservative defender of normative Buddhist principles, he was also a progressive reformer in his own right. Far from defending the status quo, Jōkei envisioned a more accessible, harmonious, and monastically upright form of Buddhism. Through a detailed examination of Jōkei's extensive writings and activities, Ford challenges many received interpretations of Jōkei's legacy and the transformation of Buddhism in early medieval Japan. This book fills a significant lacuna in Buddhist scholarship.

**Reasoning About Knowledge** Ronald Fagin, Joseph Y. Halpern, Yoram Moses, Moshe Vardi, 2004-01-09 Reasoning about knowledge—particularly the knowledge of agents who reason about the world and each other's knowledge—was once the exclusive province of philosophers and puzzle solvers. More recently, this type of reasoning has been shown to play a key role in a surprising number of contexts, from understanding conversations to the

analysis of distributed computer algorithms. Reasoning About Knowledge is the first book to provide a general discussion of approaches to reasoning about knowledge and its applications to distributed systems, artificial intelligence, and game theory. It brings eight years of work by the authors into a cohesive framework for understanding and analyzing reasoning about knowledge that is intuitive, mathematically well founded, useful in practice, and widely applicable. The book is almost completely self-contained and should be accessible to readers in a variety of disciplines, including computer science, artificial intelligence, linguistics, philosophy, cognitive science, and game theory. Each chapter includes exercises and bibliographic notes.

**Shingon Refractions** Mark Unno, 2014-05-13 Shingon Buddhism arose in the eighth century and remains one of Japan's most important sects, at present numbering some 12 million adherents. As such it is long overdue appropriate coverage. Here, the well-respected Mark Unno illuminates the tantric practice of the Mantra of Light, the most central of Shingon practices, complete with translations and an in-depth exploration of the scholar-monk Myoe Koben, the Mantra of Light's foremost proponent.

Republic of Kazakhstan International Monetary Fund. Middle East and Central Asia Dept., 2017-05-09 This 2017 Article IV Consultation highlights growth in Kazakhstan expected to strengthen to 2.5 percent in 2017 after a slowdown in 2016, reflecting higher oil production and the effect of substantial fiscal stimulus spending. The sharp exchange rate depreciation in late 2015 and early 2016 triggered a surge in consumer prices, but inflation has come down to levels consistent with the National Bank of Kazakhstan's target range. The medium-term outlook has improved; growth in the non-oil sector is expected to pick up gradually to 4 percent, benefiting from structural reforms and a resumption of bank lending. Uncertainty is high, however, because the economy remains vulnerable to commodity price swings and especially to a sustained decline in oil prices.
