Highlighting the more pluralized and interactive dynamics in the appropriation and dissemination of medical and public health knowledge, its specific case studies challenge the notions of the one way transmission of medicine by modern Western trained doctors and public health officials to ignorant patients and masses, particularly in the non-Western world. With specific examples drawn from popular media, this volume examines the extent to which these developments have given the broader public both greater access to information and choices. Multidisciplinary in scope and truly international in focus, it relates the everyday of health communications to more macro social trends on the Asian continent and will be of interest to scholars within science and technology studies, media and cultural studies and sociology alike.

**The Yudhoyono Presidency** Edward Aspinall, Marcus Mietzner, Dirk Tomsa, 2015-05-13 The presidency of Susilo Bambang Yudhoyono (2004–14) was a watershed in Indonesia's modern democratic history. Yudhoyono was not only the first Indonesian president to be directly elected, but also the first to be democratically re-elected. Coming to office after years of turbulent transition, he presided over a decade of remarkable political stability and steady economic growth. But other aspects of his rule have been the subject of controversy. While supporters view his presidency as a period of democratic consolidation and success, critics view it as a decade of stagnation and missed opportunities. This book is the first comprehensive attempt to evaluate both the achievements and the shortcomings of the Yudhoyono presidency. With contributions from leading experts on Indonesia's politics, economy and society, it assesses the Yudhoyono record in fields ranging from economic development and human rights, to foreign policy, the environment and the security sector.
