**Status Power** Isa Dücke, 2002 This book examines recent developments in Japanese-Korean relations. Its aim is to show how soft issues like history consciousness or national identity have an impact on concrete policy decisions including security or economic matters which are traditionally considered more substantial foreign policy issues. The author develops the concept of status as based on either prestige or on a positive reputation, or moral authority. Case studies illustrate the mechanisms in which status power is used for other ends, also in the policy areas of economy and security.

**South Korea's Middle Power Diplomacy in the Middle East** Hae Won Jeong, 2022-02-24 This book examines theoretical and empirical approaches to the study of middle powers with reference to South Korea's bilateral relations with Iran, Saudi Arabia, United Arab Emirates and Iraq. It maps the development, political and diplomatic trajectories between South Korea and Iran, Saudi Arabia, United Arab Emirates and Iraq against the historical backdrop of ROK-US alliance and the rise of China. Jeong provides a nuanced analysis of the intersectionality of political economy and foreign policy analysis contextualizing state-building processes in ROK and the Middle Eastern countries. This accessible book is intended for students and scholars in area studies and international affairs, career diplomats, and South Korean businesses in the Middle East. It should also prove of practical value for journalists and policy makers who are interested in studying the nexus of domestic, regional and international factors that have configured South Korea's Middle East policy.

**Korea's Middle Power Diplomacy** Seungjoo Lee, Sangbae

Kim,2022-05-17 This volume discusses Korea's role as a middle power in the midst of the 21st century global power shift. Focusing on Korea's middle power diplomacy from the perspective of coalition building, the book discusses structural factors that shape middle power strategy and diplomacy. Written by leading Korean researchers, the chapters use diverse methodologies to offer a range of perspectives on Korea's place in the developing global order. Topics discussed include South Korea's approach to technology policy in the midst of US-China cyber competition, the East Asian 'Thucydides Trap', MITKA and middle power diplomacy, Korea's role in the South China Sea dispute, and South Korean cyber security. Providing a unique treatment of middle power opportunities and motivations in the East Asia region, this volume will be of interest to students and scholars of international relations, Asian politics, diplomacy, security studies, and global governance.

**South Korea at the Crossroads** Scott A. Snyder,2018-01-02 Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In *South Korea at the Crossroads*, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the "Nordpolitik" engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung's "Sunshine Policy," designed to bring North Korea into the international community; "trustpolitik," which sought to

foster diplomacy with North Korea and Japan; and changes in South Korea's relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security. Although China is a tempting option, Snyder argues that only the United States is both credible and capable in this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.

**Shifting Power in Asia-Pacific?** Enrico Fels, 2016-11-03

This book investigates whether a power shift has taken place in the Asia-Pacific region since the end of the Cold War. By systematically examining the development of power dynamics in Asia-Pacific, it challenges the notion that a wealthier and militarily more powerful China is automatically turning the regional tides in its favour. With a special emphasis on Sino-US competition, the book explores the alleged linkage between the regional distribution of relevant material and immaterial capabilities, national power and the much-cited regional power shift. The book presents a novel concept for measuring power in international relations by outlining a composite index on aggregated power (CIAP) that includes 55 variables for 44 regional countries and covers a period of twenty years. Moreover, it develops a middle power theory that outlines the significance of middle powers in times of major power shifts. By addressing political, military and economic cooperation via a structured-focused comparison and by applying a comparative-historical analysis, the book analyses in depth the bilateral relations of six regional middle powers to Washington and Beijing.

**Middle Powers in Asia Pacific Multilateralism** Sarah

Teo, 2022-11-25 Drawing on insights from differentiation theory, this book examines the participation of middle powers in

multilateralism. Taking Australia, Indonesia and South Korea as examples, the book examines these countries' roles in regional organizations, and particularly during the creation of the Asia-Pacific Economic Cooperation (APEC) and East Asia Summit. Through its analysis, the book argues that middle powers pursue dilution of major power stratificatory forces, as well as functionally differentiated roles for themselves in multilateral diplomacy. The book sets out a valuable new framework to explain and understand the behaviour of middle powers in multilateralism.

*China-US Great-Power Rivalry* Lai-Ha Chan, Pak K.

Lee, 2024-04-19 This edited volume examines the competitive dynamics of two order-building projects in the Indo-Pacific, namely China's Belt and Road Initiative (BRI) and the US-led Free and Open Indo-Pacific (FOIP). Foci are on how far the two major powers are able to use institutional projects to (re)order the region of the Indo-Pacific to suit their policy preferences, and on how regional powers perceive and navigate between the two ordering projects. This book discusses a wide array of actors in the Indo-Pacific, covering the two major powers of China and the United States, middle powers of Australia and New Zealand, India, Japan, South Korea and Taiwan, and institutional actors of ASEAN, AUKUS, the Quad and the Pacific Islands Forum. Drawing on the concept of international order, the chapters examine the actor-specific foreign policies in relation to the rivalry between the FOIP and the BRI. This accessible book will be a go-to resource for anyone looking for how the two great powers garner legitimacy and followership for their own version of ordering project, and how regional powers respond to the dynamic competition and navigate between China and the United States, and between the forces of liberal democracy and autocracy.

**Korea in the New Asia** Francoise Nicolas, 2007-06-07 Since the late 1970s a number of regional developments have impacted

upon South Korea's political and economic standing in Asia. China's spectacular growth and closer integration with its neighbouring economies, along with a tendency toward more assertive political and diplomatic activity, have deeply altered both the economic and political East Asian environment. Simultaneously, the 1997-98 financial crisis catalysed a process of increased regional co-operation in East Asia. China's rise has imposed a leadership problem that may constitute a major obstacle on the road to deeper regional integration, as well as add force to the need for collective action, and it is this paradox that may give South Korea a key role in the reorganization of the region. Moreover, inter-Korean relations and Korea's future security environment may also feel the effects of the rise of China. Korea in the New Asia seeks to analyze to what extent and how South Korea may contribute to, and take advantage of, the new regional configuration in East Asia. The book represents the first study to address Korea's regional policy responses to the rise of China as an economic power and the regional economic integration of East Asia. Written by an international team of experts, this multidisciplinary study will appeal to researchers, academics and students with an interest in international relations, security studies, economics and East Asian politics. .

### **The Korean Peninsula and Indo-Pacific Power Politics**

Jagannath P. Panda, 2020-03-03 This book assesses the strategic linkages that the Korean Peninsula shares with the Indo-Pacific and provides a succinct picture of issues which will shape the trajectory of the Korean Peninsula in the future. This book analyses how critical actors such as the United States, China, Russia and Japan are caught in a tightly balanced power struggle affecting the Korean Peninsula. It shows how these countries are exerting control over the Korean Peninsula while also holding on to their status as critical actors in the broader Indo-Pacific. The prospects of peace, stability and unity in the Korean Peninsula and the impact of this on Indo-Pacific power politics are explored

as well as the contending and competing interests in the region. Chapters present country-specific positions and approaches as case studies and review the impact of power politics on stakeholders' relationships in the Indo-Pacific. The book also argues that the Korean Peninsula and the issue of denuclearization is of primary importance to any direction an Indo-Pacific Partnership may take. Bringing together scholars, journalists and ex-diplomats, this book will be of interest to academics working in the field of international relations, foreign policy, security studies and Asian studies as well as audiences interested

*North Korea Development Report*, 2003

*External Powers and the Gulf Monarchies* Jonathan Fulton, Li-Chen Sim, 2018-08-23 The Gulf monarchies have been generally perceived as status quo actors reliant on the USA for their security, but in response to regional events, particularly the Arab Spring of 2011, they are pursuing more activist foreign policies, which has allowed other international powers to play a larger role in regional affairs. This book analyses the changing dynamic in this region, with expert contributors providing original empirical case studies that examine the relations between the Gulf monarchies and extra-regional powers, including the USA, Russia, China, India, Brazil, Turkey, Japan, South Korea, France, and the United Kingdom. At the theoretical level, these case studies explore the extent to which different international relations and international political economy theories explain change in these relationships as the regional, political and security environment shifts. Focusing on how and why external powers approach their relationships with the Gulf monarchies, contributors ask what motivates external powers to pursue deeper involvement in an unstable region that has seen three major conflicts in the past 40 years. Addressing an under-analysed, yet important topic, the volume will appeal to scholars in the fields of international relations and international political economy as well as area

specialists on the Gulf and those working on the foreign policy issues of the extra-regional powers studied.

**Peace Regime Building on the Korean Peninsula and Northeast Asian Security Cooperation** Seung-Ho

Joo,2016-05-13 A permanent peace regime on the Korean peninsula has yet to be achieved even though the Korean War came to a halt more than half a century ago. Without a peace treaty formally ending the Korean War, the two Korean states are technically still at war. The current situation on the Korean peninsula is extremely tense and precarious, and tensions and distrust between the two Koreas and between the U.S. and North Korea escalated in the wake of North Korea's second underground nuclear weapons testing in 2009. The editors of this volume conceptually present a two-track (inter-Korean and international) approach to Korean peninsula peace-regime building. They argue that an inter-Korean and international approach should be pursued simultaneously for the construction of a permanent peace regime on the Korean peninsula. The contributing authors are established specialists and experts on Korean foreign relations and Northeast Asian international relations. As natives of the U.S., Korea, China, and Japan, they provide objective, scholarly and diverse perspectives on the Korean peace regime building.

**Asia's New Multilateralism** Michael J. Green,Bates Gill,2009-03-19 Traditionally, stability in Asia has relied on America's bilateral alliances with Japan, Australia, and the Republic of Korea. Yet in recent years, emergent and more active multilateral forums—such as the Six-Party Talks on North Korea and the East Asia Summit—have taken precedence, engendering both cooperation and competition while reflecting the local concerns of the region. Some are concerned that this process is moving toward less-inclusive, bloc-based talking shops and that the future direction and success of these arrangements,

along with their implications for global and regional security and prosperity, remain unclear. The fifteen contributors to this volume, all leading scholars in the field, provide national perspectives on regional institutional architecture and their functional challenges. They illuminate areas of cooperation that will move the region toward substantive collaboration, convergence of norms, and strengthened domestic institutions. They also highlight the degree to which institution building in Asia—;a region composed of liberal democracies, authoritarian regimes, and anachronistic dictatorships—;has become an arena for competition among major powers and conflicting norms, and assess the future shape of Asian security architecture., reviewing a previous edition or volume

Korea's Quest for Economic Democratization Youngmi

Kim,2017-09-06 This book studies the sources of inequality in contemporary South Korea and the social and political contention this engenders. Korean society is becoming more polarized. Demands for 'economic democratization' and a fairer redistribution of wealth occupy centre-stage of political campaigns, debates and discourse. The contributions offer perspectives on this wide-ranging socio-political change by examining the transformation of organized labour, civil society, the emergence of new cleavages in society, and the growing ethnic diversity of Korea's population. Bringing together a team of scholars on Korea's transition and democratization, the story the books tells is one of a society acutely divided by the neo-liberal policies that accompanied and followed the Asian financial crisis. Taken together, the contributions argue that tackling inequalities are challenges that Korean policy-makers can no longer postpone. The solution, however, cannot be imposed, once again, from the top down, but needs to arise from a broader conversation including all segments of Korean society. The book is intended for a readership interested in South Korean politics

specifically, and global experiences in transition more generally.

The United States and Northeast Asia G. John Ikenberry, Chung-in Moon, 2008 This authoritative book provides a comprehensive and penetrating analysis of the emerging security terrain in Northeast Asia. Leading American and Asian scholars explore the shifting power configurations in Northeast Asia represented by China's rise, Japan's quest for a normal state, North Korea's nuclear ambitions, South Korea's projection into a middle power, and U.S. strategic realignments. They also examine new flashpoints such as anti-Americanism; the North Korean crisis; and the clash of parochial nationalisms among China, Japan, and Korea. Shedding light on Asia's new order, this balanced and systematic volume will be invaluable for a nuanced understanding of this complex and dynamic region.
