The Congregation Brian Logan,2011-02-17 As the world begins taking its last breath, Professor Dorian Thomas teaches history to over-privileged students at a New York college. A borderline alcoholic, Thomas plods through his existence until the day he receives a strange note that reads: "Must meet with you tonight after classes. Will meet you in front of the old library steps." The mysterious and dangerous meeting is with Father Michael Donavan who asks Thomas to join their mission—the search for pieces of a missing holy text that has the ability to change life's destiny and save mankind. Thomas is skeptical. In this new world, organized religion is taboo and, in some cases, illegal. But when Thomas discovers that Teresa Elizabeth Donavan is part of the group, he doesn't hesitate. Thomas has been waiting ten long years for Elizabeth, his life's love, to return to him. The diverse group—a team of God's chosen army—seriously attends to its task and embarks on a dangerous international journey to recover the texts and restore life to what it once was.

Survey of Portions of the Chromium-cobalt-nickel-molybdenum Quaternary System at 1200° C
Sheldon Paul Rideout,1952 A survey was made of portions of the Chromium-cobalt-nickel-molybdenum quaternary system at 1200 degrees C by means of microscopic and x-ray diffraction studies. Since the face-centered cubic (alpha) solid solutions form the matrix of almost all practically

useful high-temperature alloys, the solid solubility limits of the quaternary alpha phase were determined up to 20 percent molybdenum. The component cobalt-nickel-molybdenum, chromium-cobalt-molybdenum, and chromium-nickel-molybdenum ternary systems were also studied. The survey of these systems was confined to the determination of the boundaries of the face-centered cubic (alpha) solid solutions and of the phases coexisting with alpha at 1200 degrees C.
