**Renewing Italian Socialism** Spencer M. Di Scala, 1988-07-14 The first comprehensive history of Italian Socialism in English, this book ranges from the defeat of Socialism by Mussolini in 1926 to its resurgence as a powerful force in Italian politics today. Di Scala has not only combed the archives of Italy and America, but also interviewed an array of prominent Italian and American sources, providing testimonies that are themselves likely to become important historical documents. His sweeping, intensive survey sheds new light on important Socialists such as Rodolfo Morandi and Pietro Nenni, and highlights the tremendous accomplishments of Italy's first Socialist prime minister, Bettino Craxi. Di Scala demonstrates that through a remarkable intellectual and political revival, the Socialists overcame their subjection by the Communists and Christian Democrats and went on to radically transform the politics, economy, and international affairs of modern Italy.

*Ezio Tarantelli - Economic Theory and Industrial Relations* Giovanni Michelagnoli, 2011-09-24 The present book analyses the work of Ezio Tarantelli, a remarkable Italian scientist and economist killed by the Red Brigades in 1985 after only a short life (1941-1985). Tarantelli's work and its implications are not only of importance for Italian researchers, but also represents a contribution of interest to economists worldwide. The first chapter of this volume shows the most important features of the European and Italian economy from 1970 to 1985. The contribution of Tarantelli, in fact, was his attempt to address the questions arising from such a context, incorporating the thought of F. Modigliani and J. Robinson in the process. After some brief biographical notes in the second chapter, the third and the fourth concentrate on Tarantelli's

theoretical contribution. The fifth chapter and the conclusions, finally, show how, from his economic analysis, he derived some economic policy proposals that still hold relevance today. The text includes a complete bibliography of his scientific writings.

**Emerging Perspectives on the Mobile Content Evolution** Aguado, Juan Miguel, 2015-09-21 In less than a decade, mobile technology has revolutionized our cultures, societies, and economies by impacting both personal and professional aspects of human life. Mobile technology has therefore become the fastest diffusing technology in history, expanding and transforming existent possibilities by making technology accessible and ubiquitous. *Emerging Perspectives on the Mobile Content Evolution* seeks a better understanding of the centrality of mobile content in the recent and coming evolution of both the ICT ecosystem and the media industry. This publication appeals to a broad audience within the interdisciplinary field of media studies, covering topic areas such as journalism, marketing and advertising, broadcasting, information management, media management, media economics, media- and technology-related public policies, media sociology, audience/consumption studies, and arts. This publication presents a multi-disciplinary discussion through a collection of academic chapters covering topics such as mobile communications and entrepreneurship, reflection on wearables and innovation, personal and mobile healthcare, mobile journalism and innovation, and behavioral targeting in the mobile ecosystem.

Mobile Communication James E. Katz, 2017-07-28 In the few short decades since their commercial deployment, 5 billion people—about three-quarters of all humanity, including children—have become mobile phone users. No technology has even approached the mobile phone's wildfire success. Effects of this

success are apparent everywhere, ranging from accident scenes and earthquake rescue efforts to demeanor in the classroom and at dinner tables. No one interested in the next generation of issues provoked by the mobile communication revolution will want to miss this important new collection of essays. The mobile phone has given near-transcendent power to ordinary people. All aspects of social life have been touched by mobile technology. An ever-growing host of tracking, immersion, gaming, and commercial applications are becoming available. The community of mobile communication scholars has blossomed from a handful of pioneers a decade ago to a large and dynamic intellectual community that spans the globe. Area researchers have gained much insight into cultural, symbolic, and social interaction aspects of mobile communication as well as its relevance to commerce. To address the social policy dimension of the mobile communication revolution, this volume presents analyses by leading thinkers in the field. The volume offers novel and keen insights into the topic. Subjects include the role of mobiles in policy formation and evaluation in several areas including the mobile-digital divide and political campaigns. Also explored are processes and policy implications of mobiles in creating or alleviating social problems including social isolation and family dispersion. Other chapters analyze social policies for mobile devices, including attempts to regulate the use of the technology and to understand and moderate its potential harm to human health. The contributors' scope ranges across five continents and they address concerns at local, national, and international levels.

Ageing with Smartphones in Urban Italy Shireen Walton, 2021-05-06 'Who am I at this (st)age? Where am I and where should I be, and how and where should I live?' These questions, which individuals ask themselves throughout their lives, are among the central themes of this book, which presents an

anthropological account of the everyday experiences of age and ageing in an inner-city neighbourhood in Milan, and in places and spaces beyond. *Ageing with Smartphones in Urban Italy* explores ageing and digital technologies amidst a backdrop of rapid global technological innovation, including mHealth (mobile health) and smart cities, and a number of wider socio-economic and technological transformations that have brought about significant changes in how people live, work and retire, and how they communicate and care for each other. Based on 16 months of urban digital ethnographic research in Milan, the smartphone is shown to be a ‘constant companion’ in, of and for contemporary life. It accompanies people throughout the day and night, and through individual and collective experiences of movement, change and rupture. Smartphone practices tap into and reflect the moral anxieties of the present moment, while posing questions related to life values and purpose, identities and belonging, privacy and sociability. Through her extensive investigation, Shireen Walton argues that ageing with smartphones in this contemporary urban Italian context is about living with ambiguity, change and contradiction, as well as developing curiosities about a changing world, our changing selves, and changing relationships with and to others. Ageing with smartphones is about figuring out how best to live together, differently.

*A Century of Italian American Economics* Valentina Sgro, 2020-07-24 Through a historical analysis of the link between Italian American migration in the 20th century and the investigation of the minutes of the Board of Directors and the financial statements of the American Chamber of Commerce in Italy, this book provides a privileged observation point for the study of the economic relations between Italy and the United States throughout the twentieth century. Showing that the Chamber played a fundamental role in

highlighting the changes of Italian economy and society, and in strengthening the cooperation between the two countries, it retraces a long-lasting tradition of trade and business, and depicts a solid and enduring relationship between Italy and the United States.

**Digital Love** Raimondo Aiello, Rossella Dolce, Fiorenzo Pilla, 2018-05-04 Le evoluzioni nelle modalità di comunicazione e il rapido sviluppo delle tecnologie di socialità digitale hanno caratterizzato l'ultimo ventennio producendo, al contempo, nuove risorse e nuovi canali dedicati sia al mondo delle relazioni sentimentali che alle diverse galassie della sessualità. Incontrarsi, conoscersi, innamorarsi, fare sesso, sono attività che sempre più ricerchiamo e viviamo al confine tra il piano fisico e l'universo virtuale con il naturale e cospicuo bagaglio di domande e dubbi che questa dualità porta con sé. Cosa sono e come funzionano Tinder e le altre app per appuntamenti? È possibile innamorarsi online? Quali possono essere le conseguenze dello spiare lo smartphone o le mail del proprio partner? A questi ed altri interrogativi gli autori provano a fornire una risposta che, attraverso un approccio basato su ricerca e analisi di casi concreti, risulti per il lettore esauriente e, al tempo stesso, accessibile.

**Journalism and Ethics: Breakthroughs in Research and Practice** Management Association, Information Resources, 2019-05-03 In the modern hyperconnected society, consumers are able to access news from a variety of channels, including social media, television, mobile devices, the internet, and more. From sensationalist headlines designed to attract click-throughs to accusations of bias assigned to specific news sources, it is more important now than ever that the media industry maintains best practices and adheres to ethical reporting. By properly informing citizens of critical national concerns, the media can help to

transform society and promote active participation. *Journalism and Ethics: Breakthroughs in Research and Practice* examines the impacts of journalism on society and the media's responsibility to accurately inform citizens of government and non-government activities in an ethical manner. It also provides emerging research on multimedia journalism across various platforms and formats using digital technologies. Highlighting a range of pertinent topics such as investigative journalism, freedom of expression, and media regulation, this publication is an ideal reference source for media professionals, public relations officers, reporters, news writers, scholars, academicians, researchers, and upper-level students interested in journalism and journalistic ethics.

**The Global Smartphone** Daniel Miller ,Laila Abed Rabho ,Patrick Awondo , Maya de Vries,Marília Duque,Pauline Garvey, Laura Haapio-Kirk,Charlotte Hawkins,Alfonso Otaegui ,Shireen Walton,Xinyuan Wang,2021-05-06 The smartphone is often literally right in front of our nose, so you would think we would know what it is. But do we? To find out, 11 anthropologists each spent 16 months living in communities in Africa, Asia, Europe and South America, focusing on the take up of smartphones by older people. Their research reveals that smartphones are technology for everyone, not just for the young. The *Global Smartphone* presents a series of original perspectives deriving from this global and comparative research project. Smartphones have become as much a place within which we live as a device we use to provide 'perpetual opportunism', as they are always with us. The authors show how the smartphone is more than an 'app device' and explore differences between what people say about smartphones and how they use them. The smartphone is unprecedented in the degree to which we can transform it. As a result,

it quickly assimilates personal values. In order to comprehend it, we must take into consideration a range of national and cultural nuances, such as visual communication in China and Japan, mobile money in Cameroon and Uganda, and access to health information in Chile and Ireland – all alongside diverse trajectories of ageing in Al Quds, Brazil and Italy. Only then can we know what a smartphone is and understand its consequences for people's lives around the world.

*Critical Infrastructures at Risk* A.V. Gheorghe, M. Masera, M. Weijnen, L.J. De Vries, 2006-02-15 Europe witnessed in the last years a number of significant power contingencies. Some of them revealed the potentiality of vast impact on the welfare of society and triggered pressing questions on the reliability of electric power systems. Society has incorporated electricity as an inherent component, indispensable for achieving the expected level of quality of life. Therefore, any impingement on the continuity of the electricity service would be able to distress society as a whole, affecting individuals, social and economic activities, other infrastructures and essential government functions. It would be possible to hypothesize that in extreme situations this could even upset national security. This book explores the potential risks and vulnerabilities of the European electricity infrastructure, other infrastructures and our society as whole increasingly depend on. The work was initiated by the need to verify the potential effects of the ongoing market and technical transformation of the infrastructure, which is fundamentally changing its operation and performance. The final aim is to set the basis for an appropriate industrial and political European-wide response to the risk challenges.

**Trade Shows in the Globalizing Knowledge Economy** Harald Bathelt,Francesca Golfetto,Diego Rinallo,2014 This book presents a radically innovative view on trade shows as knowledge-rich places, where firms learn through observation and interaction with other economic actors, and as enablers, rather than mere consequences, of globalization. Traditionally seen as marketing tools, trade shows are conceptualised as temporary clusters that facilitate the creation and diffusion of knowledge across geographical distances, even in the age of social media. The book is organized in four parts. Part I lays out the conceptual foundations of the knowledge-based perspective, from the early development of trade fairs to modern-day events. Part II analyses specific global developments, focussing on the trade show ecologies of Europe, North America, and the Asia-Pacific region. Part III investigates differences in the nature of knowledge generation practices across international hub shows, exports shows, and import shows in different industries, and investigates competition between such events. Part IV discusses the implications of a knowledge-based conceptualisation of trade shows. The book will be of interest to scholars and students in economic geography, management, marketing, organization studies, political science, and sociology. It also has practical implications for trade show organisers on how to make their events more competitive through knowledge-based strategies; for industry associations and cities, on how to use these events for collective/place marketing purposes; and for policy makers, on how to use trade shows for export promotion and innovation policies.

**Where Are You?** Maurizio Ferraris,2014-09-01 This book sheds light on the most philosophically

interesting of contemporary objects: the cell phone. “Where are you?”—a question asked over cell phones myriad times each day—is arguably the most philosophical question of our age, given the transformation of presence the cell phone has wrought in contemporary social life and public space. Throughout all public spaces, cell phones are now a ubiquitous prosthesis of what Descartes and Hegel once considered the absolute tool: the hand. Their power comes in part from their ability to move about with us—they are like a computer, but we can carry them with us at all times—in part from what they attach to us (and how), as all that computational and connective power becomes both handy and hand-sized. Quite surprisingly, despite their name, one might argue, as Ferraris does, that cell phones are not really all that good for sound and speaking. Instead, the main philosophical point of this book is that mobile phones have come into their own as writing machines—they function best for text messages, e-mail, and archives of all kinds. Their philosophical urgency lies in the manner in which they carry us from the effects of voice over into reliance upon the written traces that are, Ferraris argues, the basic stuff of human culture. Ontology is the study of what there is, and what there is in our age is a huge network of documents, papers, and texts of all kinds. Social reality is not constructed by collective intentionality; rather, it is made up of inscribed acts. As Derrida already prophesized, our world revolves around writing. Cell phones have attached writing to our fingers and dragged it into public spaces in a new way. This is why, with their power to obliterate or morph presence and replace voice with writing, the cell phone is such a philosophically interesting object.

*The Truth Society* Noelle Molé Liston, 2020-11-15 Noelle Molé Liston's *The Truth Society* seeks to understand how a period of Italian political spectacle, which regularly blurred fact and fiction, has shaped

how people understand truth, mass-mediated information, scientific knowledge, and forms of governance. Liston scrutinizes Italy's late twentieth-century political culture, particularly the impact of the former prime minister and media mogul Silvio Berlusconi. By doing so, she examines how this truth-bending political era made science, logic, and rationality into ideas that needed saving. With the prevalence of fake news and our seeming lack of shared reality in the post-truth world, many people struggle to figure out where this new normal came from. Liston argues that seemingly disparate events and practices that have unfolded in Italy are historical reactions to mediatized political forms and particular, cultivated ways of knowing. Politics, then, is always sutured to how knowledge is structured, circulated, and processed. The Truth Society offers Italy as a case study for understanding the remaking of politics in an era of disinformation.

**Metamorphosis** Giacomo Keison Bevilacqua, 2022-10-26 L'edizione definitiva di una storia ambiziosa, che ha costituito l'inizio della carriera di graphic novelist del poliedrico fumettista Giacomo Keison Bevilacqua. Originariamente pubblicata in albi in bianco e nero e in seguito raccolta in un solo volume, ora la storia di Luna, la blogger i cui sogni sembrano invadere la sua realtà quotidiana, torna disponibile in un'edizione definitiva, riveduta e corretta dall'autore, con i colori di Elia Bisogno e Silvia Landucci. Un volume curatissimo, per dare a questa storia – che è allo stesso tempo thriller soprannaturale, poliziottesco moderno e un'indagine affilata tra i demoni che albergano in ciascuno di noi – la forma esatta con cui l'autore l'aveva immaginata la prima volta, nel lontano 2007.

*Invoking Humanity* Danilo Zolo,2002-08-01 \* Powerful, passionate and highly topical critique of humanitarian intervention\* International political theorist with eight top-selling booksWhoever invokes humanity wants to cheat.In this first time translation in English, Danilo Zolo considers Carl Schmitt's maxim in the context of the humanitarian war waged against the Federal Republic of Yugoslavia in the Spring of 1999 by 19 NATO countries. This erudite and disturbing book is a political, legal and philosophical reflection on an extraordinary display of Western Power and its present and future impact on the global system of international relations.Zolo's account of the war is located within the context of the irresistible drive of globalization which he argues brings economic, financial and military, ecological and ethnic-religious turbulence in its wake. Not only the future of the Balkan region, he suggests, is at stake here, but the fate of international law, the future role of the United Nations and the political destiny of Europe.
