Letters From The Open Road (Vol. 1) Sidharth Sharotri,2023-01-05 From the completely juvenile yet brilliant mind of Sidharth Sharotri comes a compilation of his ‘serious automobile journalism’ work, which consisted of him driving posh cars and making up stories around them for newspapers. These highly technical (read: not at all technical) articles first appeared in a weekly motoring page called Honk in Deccan Chronicle and Asian Age between 2013 and 2015, which this author was exclusively entrusted with. Letters from the Open Road does exactly what his newspaper articles did – make the reader giggle a little bit while making them wonder if they should chase their own childhood dreams.

Braids, Links, and Mapping Class Groups Joan S. Birman,1974 The central theme of this study is Artin's braid group and the many ways that the notion of a braid has proved to be important in low-dimensional topology. In Chapter 1 the author is concerned with the concept of a braid as a group of motions of points in a manifold. She studies structural and algebraic properties of the braid groups of two manifolds, and derives systems of defining relations for the braid groups of the plane and sphere. In Chapter 2 she focuses on the connections between the classical braid group and the classical knot problem. After reviewing basic results she proceeds to an exploration of some possible implications of the Garside and Markov theorems. Chapter 3 offers discussion of matrix representations of the free group and of subgroups of the automorphism group of the free group. These ideas come to a focus in the difficult open question of whether Burau's matrix representation of the braid group is faithful. Chapter 4 is a broad view of recent results on the connections between braid groups and mapping class groups of surfaces. Chapter 5 contains a brief discussion of the theory of plats. Research problems are included in an appendix.

Advances In Hydrogen Generation Technologies Murat Eyvaz,2018-08-22 Among energy sources, hydrogen gas is clean and renewable and has the potential to solve the growing energy crisis in today's society because of its high-energy density and noncarbon fuel properties. It is also used for many potential applications in nonpolluting vehicles, fuel cells, home heating systems, and aircraft. In addition, using hydrogen as an energy carrier is a long-term option to reduce carbon dioxide emissions worldwide by obtaining high-value hydrocarbons through the hydrogenation of carbon dioxide. This book presents the recent progresses and developments in water-splitting processes as well as other hydrogen generation technologies with challenges and future perspectives from the point of energy sustainability.

Indecent Detroit Ben Strassfeld,2023-12-05 While Detroit has been a major focus in urban history, little has been written on censorship in the very city that—due to shifting legalities, the urban crisis, and racial tensions—profoundly shaped media suppression in the United States. By examining censorship in film and literature, Indecent Detroit recounts the evolution of media control from the end of WWII through the 1970s, when the US saw a major change in the legal mechanisms used to censor media due to court rulings that curtailed censorship laws. Ben Strassfeld reveals how Detroit altered its censorial tactics and rhetoric from an obscenity-based system of censorship centered in the Detroit Police Department to a regulatory model based in zoning law that was then expanded nationwide. This shift was connected to broader social and political trends, including the sexual revolution, that led the public to increasingly turn against censorship. A must-read for film and media scholars, Indecent Detroit highlights how one Midwest city's ordinance was imitated across the country after it was upheld by the US Supreme Court, making this more than a local curiosity but also an influential model for the cultural, political, and moral control of urban space through media

regulation.

How to Kill a Panther Tank Craig Moore,2021-01-28 Using only original official period documents from the Second World War this book tries to provide the reader with the same information on the Panzer V Panther tank that was available to British and Commonwealth senior officers and tank crews during the war. As soon as intelligence reports confirmed the existence of the Panther tank the hunt was on to find reliable information on how to knock out this new German tank. Most people believe that the only way to stop a Panther was to penetrate its armour with an armour piercing A.P. round. Luckily the British 17 pdr anti-tank gun could do that but the British were also looking how to knock them out by using other weapons. They tested using high explosive artillery rounds and 20 mm air attack aircraft canon rounds to penetrate and damage the tank's rear engine deck and puncture the vehicle's radiators. Loss of water would cause the engine to overheat and stop working. Tank radiators were large and spares were not carried on the tank. If the Panther could not be recovered back to a maintenance depot the crew would have to abandon the tank and disable it by setting off internal explosive charges.

Vasopressin and Oxytocin Hans H. Zingg,Charles W. Bourque,Daniel G. Bichet,2012-12-06 This monograph provides a comprehensive overview of recent advances in the field of vasopressin and oxytocin. In the summer of 1997, scientists from over 20 countries congregated in Montreal for the 1997 World Congress of Neurohypophysial Hormones, a conference that united the fields of vasopressin, neurohypophysis and oxytocin in a single joint meeting that gave rise to the present book. The organization of a joint meeting was prompted by several recent developments. Specifically the molecular characterization of the vasopressin/oxytocin receptor family made it mandatory to adopt an integrated view and to discuss the vasopressin/oxytocin ligand/receptor family as a whole. To ensure emphasis on novelty, the conference focused on advances made over the last two years and also included important contributions by scientists that had not previously been associated with the vasopressin/oxytocin field. Vasopressin and oxytocin are two neurohormones that exert a wide spectrum of central and peripheral actions. Accordingly, the vasopressin/oxytocin field embraces a large number of different domains, ranging from neuroscience, endocrinology, and oncology to renal, reproductive, and cardiovascular physiology and pathology.
