**Color and Light** James Gurney, 2010-11-30 Unlike many other art books only give recipes for mixing colors or describe step-by-step painting techniques, *\*Color and Light\** answers the questions that realist painters continually ask, such as: What happens with sky colors at sunset?, How do colors change with distance?, and What makes a form look three-dimensional? Author James Gurney draws on his experience as a plain-air painter and science illustrator to share a wealth of information about the realist painter's most fundamental tools: color and light. He bridges the gap between abstract theory and practical knowledge for traditional and digital artists of all levels of experience.

**Painting with Light** Jan Leonardo Woellert, Joerg Miedza, 2011 Master the skills you need to transform everyday scenes into breathtaking works of art Throw your preconceptions about light-

painting out the window and prepare for a creative journey that will revolutionize your photography. Light painting is a classic photography technique that involves selectively illuminating sections of a dark subject by moving a light source (like a flashlight) over the subject during the course of a seconds- or minutes-long exposure. This results in uniquely nuanced depictions with a high level of technical artistry. As Eric Curry shows, however, today's hardware and software allow you to produce light-painting images that are anything but traditional! In this book, you'll learn, step by step, how to plan and execute incredible, nuanced images using simple gear, a whole lot of imagination, and today's powerful postproduction software. With these techniques, your imagination is the only limit to what you can create! AUTHOR: Eric Curry earned a BA in photography from the Art Center College of Design in 1980, then moved to Copenhagen, Denmark, where he ran his own advertising photography studio for over ten years. There, he worked with the largest agencies in the country, shooting brands such as Novo, Bang and Olufson, Pfizer, Maersk Line Shipping, LEGO, and Philips Electronics. Upon returning to the U.S. in 1992, Eric gradually transitioned to location industrial photography, because it afforded, as he comments, a much broader palette of avenues for creativity. After thirty years of shooting as a professional, and an additional five years working on the series American Pride and Passion, Eric is now sharing the secrets of how some of his most effective shots were made--and how you can make similarly powerful photographs yourself. Currently, Eric creates photographs exclusively on location for select clients and himself, taking full advantage of the depth and possibilities afforded by each and every new challenge. SELLING POINTS: \* Learn to choose the best light sources for the shape and texture of the surface you're lighting -

- and for the effect you want to create \* Devise a detailed plan for lighting each frame and maximize your post-production finishing options \* Determine the optimal exposure settings for the scene and light sources you've chosen

*A Celebration of Light* Jane Freeman, 2007-09-03  
Painting the Textures of Light in Watercolor  
Often, inspiration comes not so much from the subject itself as from the effect light has on the subject. Light tells the viewer what is happening in that moment of time - how the light faded out the leaves and made the shadows reflect the sky, or what time of day it was because of the angle of the shadows. This book shows you how to relay that information to make your viewer see and even feel the lighting effects that inspired you to paint your subject in the first place. Composing a light-filled painting involves more than just saving the whites of the paper or painting with lighter colors. Inside you'll learn how to: Turn up the drama in your reference photos to set the stage for dramatic paintings. Compose paintings for stronger visual impact. Use a full range of values, from deep darks to bright whites, taking your work from mediocre to powerful. Paint shadows in a way that will make your painting much more believable and colorful. Exaggerate color to heighten the impact of your painting, and use grays to make your colors sparkle. Paint backgrounds that evoke greater depth and excitement. Eleven mini-demonstrations, each re-creating a section of a painting presented in the book, help you take on the challenges of portraying individual textures. Five full-length demonstrations show how to combine a variety of textures into strong, light-appropriate compositions.

*California Light: A Century of Landscapes* Jean Stern, Molly Siple, 2011-04-12 A first-of-its-kind

celebration of the California Art Club, a society whose members have for one hundred years captured California's staggeringly beautiful landscapes in resplendent plein air paintings. At the dawn of the twentieth century, California became home to artists from all over America and Europe who aspired to depict the state's awe-inspiring natural landscapes on canvas. In 1909, these artists founded the California Art Club, which stands today as one of the most esteemed painting societies in the United States. The club has achieved distinction for its commitment to plein air painting, an Impressionistic style in which painters work outdoors in order to capture the ephemeral moment when the natural lighting of a landscape elevates an already beautiful scene into something sublime. Celebrating a century of unique artwork, this volume presents impeccable images of the art club's masterworks, including unforgettable paintings of California's stunning and varied beauty—desert vistas, plunging coastlines, verdant vineyards, charming towns, and snow-topped mountains.

**Painting the Light** Sally Cabot Gunning, 2021-06-01 From the critically acclaimed author of *Monticello* and *The Widow's War* comes a vividly rendered historical novel of love, loss, and reinvention, set on Martha's Vineyard at the end of the nineteenth century. *Martha's Vineyard*, 1898. In her first life, Ida Russell had been a

painter. Five years ago, she had confidently walked the halls of Boston's renowned Museum School, enrolling in art courses that were once deemed "unthinkable" for women to take, and showing a budding talent for watercolors. But no more. Ida Russell is now Ida Pease, resident of a seaside farm on Vineyard Haven, and wife to Ezra, a once-charming man who has become an inattentive and altogether unreliable husband. Ezra runs a salvage company in town with his business partner, Mose Barstow, but he much prefers their nightly card games at the local pub to his work in their Boston office, not to mention filling haystacks and tending sheep on the farm at home—duties that have fallen to Ida and their part-time farmhand, Lem. Ida, meanwhile, has left her love for painting behind. It comes as no surprise to Ida when Ezra is hours late for a Thanksgiving dinner, only to leave abruptly for another supposedly urgent business trip to Boston. But then something unthinkable happens: a storm strikes and the ship carrying Ezra and Mose sinks. In the wake of this shocking tragedy, Ida must settle the affairs of Ezra's estate, a task that brings her to a familiar face from her past—Henry Barstow, Mose's brother and executor. As she joins Henry in sifting through the remnants of her husband's life and work, Ida must learn to separate truth from lies and what matters from what doesn't. Captured in rich, painterly prose—piercing as a coastal gale and shimmering as sunlight on the waves—*Painting the Light* is an arresting portrait of a woman, and a considered meditation on grief, persistence, and reinvention.

*Light & Shadow / Oil* Tom Swimm, 2008-06-15 Learn how to capture the effects of radiant light and shadow in oil! In this insightful 32-page book, accomplished painter Tom Swimm shows aspiring artists how to recognize and express the dynamic effects of light in luminous oil paintings. Tom

demonstrates how to get started through sketching, toning a support, and establishing a value underpainting. He then explains special techniques, such as portraying light and shadows, expressing time of day, and rendering reflective surfaces. He also reveals tricks on creating brilliant compositions--from simplifying complex subjects and creating bold textures to telling a compelling story through a seemingly ordinary scene. Best of all, the vivid, full-color illustrations and innovative tips from the artist inspire readers to infuse their own paintings with light and color.
