Clinical Perspectives on Primary Progressive Aphasia Lyndsey Nickels,Karen Croot,2017-10-02 Primary progressive aphasia is a type of dementia that progressively impairs language abilities (speaking, understanding, reading and writing) and may eventually affect other aspects of thinking, movement and/or personality. For the person with primary progressive aphasia, these problems have a profound effect on their ability to communicate, which in turn impacts their relationships, social networks and ability to participate in everyday activities that depend on communication. Recent understanding of primary progressive aphasia has grown enormously, however, and this book provides an up-to-date survey of research relevant to the clinical care of people with primary progressive aphasia. It covers initial diagnosis, neuropathology, genetics and typical patterns of progression from early- to late-stage disease, with a special focus on management and intervention for a range of different language symptoms and

everyday communication activities. This book is suitable for a wide readership, from neurologists, geriatricians and other medical specialists, to general practitioners, speech and language therapists, occupational therapists, psychologists and students in these fields. It was originally published as a special issue of the journal Aphasiology.

Clinical Cases in Augmentative and Alternative Communication

Martine M. Smith, 2023-03-15 Clinical Cases in Augmentative and Alternative Communication provides a concise introduction to the rapidly expanding field of augmentative and alternative communication (AAC). It brings together internationally renowned experts in the field to discuss its application and outline key principles of intervention to support communication using AAC. Carefully grounded in evidence-based clinical practice, the book highlights the diversity of potential applications for AAC across a wide range of client groups, including children and adults with developmental disabilities, as well as adults with acquired impairments. Most of the chapters are structured as case reports following CARE guidelines and highlight key principles for intervention that are grounded in clinical practice. The chapters also include reflections on communication through AAC and the

valuable contributions that AAC can make in supporting independence and enhancing quality of life. This accessible book is ideal reading for students, novice clinicians in the fields of speech and language therapy or pathology, and professionals who are new to this area of clinical practice.

Design and the Digital Divide Alan F. Newell, 2022-06-01

Demographic trends and increasing support costs means that good design for older and disabled people is an economic necessity, as well as a moral imperative. Alan Newell has been described as a visionary who stretches the imagination of all of us and truly ahead of his time. This monograph describes research ranging from developing communication systems for non-speaking and hearing-impaired people to technology to support older people, and addresses the particular challenges older people have with much modern technology. Alan recounts the insights gained from this research journey, and recommends a philosophy, and design practices, to reduce the Digital Divide between users of information technology and those who are excluded by the poor design of many current systems. How to create and lead interdisciplinary teams, and the practical and ethical challenges of working in clinically related fields are discussed. The concepts of Ordinary and

Extra-ordinary HCI, User Sensitive Inclusive Design , and Design for Dynamic Diversity, and the use of Creative Design techniques are suggested as extensions of User Centered and Universal Design. Also described are the use of professional theatre and other methods for raising designers' awareness of the challenges faced by older and disabled people, ways of engaging with these groups, and of ascertaining what they want rather than just what they need. This monograph will give all Human Computer Interaction (HCI) practitioners and designers of both mainstream and specialized IT equipment much food for thought. Table of Contents: 40 years--Highlights and a Brief Review / Communication Systems for Non-Speaking and Hearing-Impaired People / TV Subtitling for Hearing-Impaired People / Word Prediction for Non-Speaking People and Systems for those with Dyslexia / Providing Reusable Conversation for Non-Speaking People / Story Telling and Emotion in Synthetic Speech / Lessons Learned from Designing AAC Devices / IT Systems for Older People / Designing IT Systems for Older People / Ordinary and Extra-Ordinary Human Computer Interaction / User Sensitive Inclusive Design / The Use of Professional Theatre / Attacking the Digital Divide

Assistive Technologies for People with Diverse Abilities Giulio

E. Lancioni, Nirbhay N. Singh, 2014-01-07 The familiar image of the disabled tends to emphasize their limitations and reduced quality of life. However, many people with cognitive, motor, and other difficulties also have the capacity to enhance their social interactions, leisure pursuits and daily activities with the aid of assistive technology. Assistive devices from the simple to the sophisticated, have become essential to intervention programs for this population. And not surprisingly the numbers of devices available are growing steadily. Assistive Technologies for People with Diverse Abilities offers expert analysis of pertinent issues coupled with practical discussion of solutions for effective support. Its comprehensive literature review describes current and emerging devices and presents evidence-based guidelines for matching promising technologies to individuals. Program outcomes are assessed, as are their potential impact on the future of the field. In addition, chapters provide detailed descriptions of the personal and social needs of the widest range of individuals with congenital and acquired conditions, including: Acquired brain damage. Communication impairment. Attention and learning difficulties (with special focus on college students). Visual impairment and blindness. Autism spectrum disorders. Behavioral and occupational

disorders. Alzheimer's disease. Severe, profound and multiple impairments. The scope and depth of coverage makes Assistive Technologies for People with Diverse Abilities an invaluable resource for researchers, professionals and graduate students in developmental psychology, rehabilitation medicine, educational technology, occupational therapy, speech pathology and clinical psychology.

Challenging the Classroom Standard Through Museum-based Education Ian Pumpian,Douglas Fisher,Susan

Wachowiak,2006-08-15 School in the Park is an innovative museum-based educational effort to engage students in their community during the school day. Since 1999 several hundred students have been educated each year in museums and the zoo in San Diego. This is more than a field trip, it is changing the way that education is provided. Challenging the Classroom Standard Through Museum-Based Education: School in the Park presents the experience of School in the Park from the perspective of different disciplines--oral language, reading, writing, social studies, math, science, and the arts--to determine how students are learning content within museums and the zoo. It provides a number

of examples, case studies, references, scenarios, and recommendations for teaching and learning outside of the traditional classroom. The perspectives of teachers, museum educators, and students are represented. Importantly, this book offers ideas that readers can use in their own communities, ranging from long-term partnering with cultural institutions to one-day trips, to ensure that students have authentic experiences with the curriculum. With the current increased focus on accountability and achievement, less attention and importance is given to community-based learning experiences. This book demonstrates the viability of merging formal and informal learning and using community venues as an extension of the classroom. All those interested in and charged with educating children will find this book useful in exploring powerful learning experiences that occur outside traditional classroom settings.

Losing the Battle, Winning the War Ben Parkinson,2021-04-29

'A great and inspiring book from Doncaster's bravest son. Read it in a day' - Jeremy Clarkson 'Ben is the embodiment of positive

thinking. What he has achieved, in large part through willpower, is nothing short of miraculous. An inspiration to us all' - Ant Middleton

The story of Ben Parkinson MBE, the most injured soldier to have survived Afghanistan --- What were you doing when you were 22? Where were you in the world? What did you want to do with your life? Ben Parkinson was a 6'4 Paratrooper. He was in Afghanistan fighting for his country. He wanted to always be a soldier, to be a father and to get home in one piece. But we don't always get what we want. So the question is: how do we react when that happens? Easy: You find something new to fight for. Ben Parkinson MBE is an inspiration to everyone. He suffered 37 injuries when his Land Rover hit a mine in Helmand in 2006, including brain damage, breaking his back and losing both his legs. This book follows the story of what led him to that moment his life changed forever - and what happened next. Doctors didn't think Ben could survive the trauma - then they didn't think he would wake up, or talk again, or walk again. Time after time, Ben pushed the ceiling on what was possible, going on to carry the Olympic flame in 2012 and receiving an MBE for the enormous feats he has undertaken for charity. What he has achieved in the face of adversity - for others as well as for himself - is nothing short of a miracle. Nerve-wracking, heart-

warming and full of classic soldier's humour, *Losing the Battle, Winning the War* is a book you'll be thinking about long after the last page. 'Ben Parkinson is my hero. His story is one of immeasurable courage and character, a testament to the extraordinary resilience of the human spirit' - Dan Jarvis MP, author of *Long Way Home*

Inkflower Suzy Zail, 2023-08-05 A gritty YA novel about family secrets, hope and healing. Based on a true story. Lisa's father has six months to live. And a story to tell about a boy sent to Auschwitz. A boy who lost everything and started again. A story he has kept hidden – until now. But Lisa doesn't want to hear it, because she has secrets too. No one at school knows she is Jewish or that her dad is sick. Not even her boyfriend. But that's all about to change. And so is she.

Aphasia Rehabilitation Patrick Coppens, Janet L. Patterson, 2017-01-05 *Aphasia Rehabilitation: Challenging Clinical Issues* focuses on specific aphasia symptoms and clinical issues that present challenges for rehabilitation professionals. These topics are typically not addressed as separate topics, even in clinical texts. This heavily clinical text will also include thorough discussions of theoretical underpinnings. For chapters that focus on

specific clinical challenges, practical suggestions to facilitate clinical application and maximize clinical usefulness. This resource integrates theoretical and practical information to aid a clinician in planning treatment for individuals with aphasia.

Palliative Care in Amyotrophic Lateral Sclerosis David

Oliver, Gian Domenico Borasio, Wendy Johnston, 2014-03-20

Amyotrophic Lateral Sclerosis (ALS or motor neurone disease) is a progressive neurodegenerative disease that can cause profound suffering for both the patient and their family. Whilst new treatments for ALS are being developed, these are not curative and offer only the potential to slow its progression. Palliative care must therefore be integral to the clinical approach to the disease.

Palliative Care in Amyotrophic Lateral Sclerosis: From diagnosis to bereavement reflects the wide scope of this care; it must cover not just the terminal phase, but support the patient and their family from the onset of the disease. Both the multidisciplinary palliative care team and the neurology team are essential in providing a high standard of care and allowing quality of life (both patient and carer) to be maintained. Clear guidelines are provided to address care throughout the disease process. Control of symptoms is covered alongside the psychosocial care of patients and their families. Case studies are used to emphasise the complexity of the care needs and involvement of the patient and family, culminating in discussion of bereavement. Different models of care are explored, and this new edition utilizes the increase in both the evidence-base and

available literature on the subject. New topics discussed include complementary therapies, personal and family experiences of ALS, new genetics research, and updated guidelines for patient care, to ensure this new edition remains the essential guide to palliative care in ALS.

Motor Neuron Disease Kevin Talbot, 2010 Written and designed to provide comprehensive, easily accessible advice for all healthcare professionals involved in the care of patients with this challenging condition, this book addresses the entire care pathway from presentation to diagnosis to symptom management and end of life issues.

Speech Generating Device Fouad Sabry, 2023-07-04 What Is Speech Generating Device Speech-generating devices (SGDs), also known as voice output communication aides, are electronic augmentative and alternative communication (AAC) systems designed to complement or substitute speech or writing for individuals with severe speech impairments, enabling them to vocally communicate. Another name for SGDs is voice output communication aids. SGDs are essential for individuals who have limited means of verbal engagement because they enable individuals to become active participants in communication

interactions. Because of this, SGDs are significant for individuals who have limited means of verbal interaction. They are of great benefit to adults diagnosed with amyotrophic lateral sclerosis (ALS), but in recent years they have also been utilized for youngsters who have been diagnosed with expected speech deficits. How You Will Benefit (I) Insights, and validations about the following topics: Chapter 1: Speech generating device Chapter 2: Assistive technology Chapter 3: Augmentative and alternative communication Chapter 4: Computer accessibility Chapter 5: Screen reader Chapter 6: Speech and language impairment Chapter 7: Partner-assisted scanning Chapter 8: Semantic compaction Chapter 9: Switch access scanning Chapter 10: Lightwriter (II) Answering the public top questions about speech generating device. (III) Real world examples for the usage of speech generating device in many fields. (IV) 17 appendices to explain, briefly, 266 emerging technologies in each industry to have 360-degree full understanding of speech generating device' technologies. Who This Book Is For Professionals, undergraduate and graduate students, enthusiasts, hobbyists, and those who want to go beyond basic knowledge or information for any kind of speech generating device.

Communication, Control, and Computer Access for Disabled and Elderly Individuals: Communication aids Dale Bengston,1987
One of a series of three resource guides concerned with communication, control, and computer access for disabled and elderly individuals, the directory focuses on communication aids. The book's six chapters each cover products with the same primary function. Cross reference indexes allow access to listings of products by function, input/output features, and by computer model.

Switches are listed separately by input/output features. Provided for each product is usually an illustration, the product name, vendor, size, weight, power source, cost, and a description. The first chapter covers speech aids (prosthetic and orthotic aids to oral speech, such as artificial larynges and speech amplifiers); the second covers pointing and typing aids (headsticks, mouthsticks, handsplints, lightbeam headpointers, and other devices for facilitating an individual's ability to point or press keys); the third describes electronic training and communication initiation aids; the fourth reviews non-electronic communication aids; the fifth covers electronic communication and writing aids; and the last chapter considers telecommunication devices for the deaf (TDD's)--devices specifically designed for deaf individuals to communicate over phone lines using ASCII, Baudot, touchtones, or synthetic speech. Appendixes include a list of additional sources of information, a glossary, addresses of manufacturers listed with their products, and an alphabetical listing of all products in the three-book series. The Top Books of the Year Lightwriter The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous

engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have charmed audiences this year. The Must-Read :

Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Lightwriter : Taylor Jenkins Reids

"The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Lightwriter : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or

personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
