Lines Suzy Lee, 2017-09-05 It starts with a line. Whether made by the tip of a pencil or the blade of a skate, the magic starts there. And magic once again flows from the pencil and imagination of internationally acclaimed artist Suzy Lee. With the lightest of touches, this masterwork blurs the lines between real and imagined, reminding us why Lee's books have been lauded around the world, recognized on New York Times Best Illustrated Books lists and nominated for the Hans Christian Andersen Award, the highest international honor given to children's book creators. This seemingly simple story about a young skater on a frozen pond will charm the youngest of readers while simultaneously astounding book enthusiasts of any age. Plus, this is the fixed format version, which looks almost identical to the print edition.

Lines Tim Ingold,2016-04-14 What do walking, weaving, observing, storytelling, singing, drawing and writing have in common? The answer is that they all proceed along lines. In this extraordinary book Tim Ingold imagines a world in which everyone and everything consists of interwoven or interconnected lines and lays the foundations for a completely new discipline: the anthropological archaeology of the line. Ingold's argument leads us through the music of Ancient Greece and contemporary Japan, Siberian labyrinths and Roman roads, Chinese calligraphy and the printed alphabet, weaving a path between antiquity and the present. Drawing on a multitude of disciplines including archaeology, classical studies, art history, linguistics, psychology, philosophy and many others, and including more than seventy illustrations, this book takes us on an exhilarating intellectual journey that will change the way we look at the world and how we go about in it. This Routledge Classics edition includes a new preface by the author.

Arbitrary Lines M. Nolan Gray,2022-06-21 It's time for America to move beyond zoning, argues city planner M. Nolan Gray in Arbitrary Lines: How Zoning Broke the American City and How to Fix It. With lively explanations, Gray shows why zoning abolition is a necessary--if not sufficient--condition for building more affordable, vibrant, equitable, and sustainable cities. Gray lays the groundwork for this ambitious cause by clearing up common misconceptions about how American cities regulate growth and examining four contemporary critiques of zoning (its role in increasing housing costs, restricting growth in our most productive cities, institutionalizing racial and economic segregation, and mandating sprawl). He sets out some of the efforts currently underway to reform zoning and charts how land-use regulation might work in the post-zoning American city. Arbitrary Lines is an invitation to rethink the rules that will continue to shape American life--where we may live or work, who we may encounter, how we may travel. If the task seems daunting, the good news is that we have nowhere to go but up

Lines Anna Doe, 2018-11 Senior year. Three girls. Three guys. Hockey and rivalry. Mean girls and friendships. Old loves and new chances. One more year of being invisible. One more year to win it all. The countdown begins. Senior year can't come or end fast enough for Amelia Campbell. For the shy, nerdy girl-next-door that she is, high school is torture and all she wants is for it to be over. Having her heart broken by a popular, womanizing boy all those years ago doesn't help the matters. Nor does his best friend who still has a habit of mercilessly teasing her. Now, she only has one year left, one year to be invisible before she can move on with her life. Derek King doesn't do drama, but his life is all about drama once Maximillian Sanders steps foot into his town, his school, and into Amelia's life. Max is always around, and he is making her smile again. But the boy who once broke her heart isn't ready to let her go. Older and wiser, Derek isn't about to let someone take away what he wants, and he wants Amelia. She's set on not believing in him and on not getting her heart broken once again. He is set on showing her wrong. She says she hates him, but maybe the line between past and present, love and hate is thinner than she ever realized.

Contesting County Lines James Densley, Robert McLean, Carlton Brick, 2023-01-17 Combining a compulsive read with rigorous academic analysis, this book tells the real-life stories of drug dealers involved in county lines networks, including their methods, motives and misfortunes. Conventional wisdom surrounding county lines often portrays drugs runners as exploited victims and gang proliferation as a market-driven exercise, and suggests a business model facilitated exclusively by smart phone technology and routinely regulated by violence. Aimed at students, scholars, practitioners and policymakers, this myth-busting, accessible book offers a novel way of thinking about county lines in relation to gangs and serious organised crime and presents new ideas for drug crime prevention, intervention and enforcement.

Product lines are enabling organizations to achieve impressive time-to-market gains and cost reductions. Topics include business issues, enabling technologies, organizational issues, and life-cycle issues. Emphasis is placed on experiences in the development and fielding of product lines of complex systems, especially those that expose problems in the design, development, or evolution of software product lines. The Life of Lines Tim Ingold,2015-03-27 To live, every being must put out a line, and in life these lines tangle with one another. This book is a study of the life of lines. Following on from Tim Ingold's groundbreaking work Lines: A Brief History, it offers a wholly original series of meditations on life, ground, weather, walking, imagination and what it means to be human. In the first part, Ingold argues that a world of life is woven from knots, and not built from blocks as commonly thought. He shows how the principle of knotting underwrites both the way things join with one another, in walls, buildings and bodies, and the composition of the ground and the knowledge we find there. In the second part, Ingold argues that to study living lines, we must also study the weather. To complement a linealogy that asks what is common to walking, weaving, observing, singing, storytelling and writing, he develops a meteorology that seeks the common denominator of breath, time, mood, sound, memory, colour and the sky. This denominator is the atmosphere. In the third part, Ingold carries the line into the domain of human life. He shows that for life to continue, the things we do must be framed within the lives we undergo. In continually answering to one another, these lives enact a principle of correspondence that is fundamentally social. This compelling volume brings our thinking about the material world refreshingly back to life. While anchored in anthropology, the book ranges widely over an interdisciplinary terrain that includes philosophy, geography, sociology, art and architecture.

Novels in Three Lines Félix Fénéon, 2011-08-17 A NEW YORK REVIEW BOOKS ORIGINAL Novels in Three Lines collects more than a thousand items that appeared anonymously in the French newspaper Le Matin in 1906—true stories of murder, mayhem, and everyday life presented with a ruthless economy that provokes laughter even as it shocks. This extraordinary trove, undiscovered until the 1940s and here translated for the first time into English, is the work of the mysterious Félix Fénéon. Dandy, anarchist, and critic of genius, the discoverer of Georges Seurat and the first French publisher of James Joyce, Fénéon carefully maintained his own anonymity, toiling for years as an obscure clerk in the French War Department. Novels in Three Lines is his secret chef-d'oeuvre, a work of strange and singular art that brings back the long-ago year of 1906 with the haunting immediacy of a photograph while looking forward to such disparate works as Walter Benjamin's Arcades Project and the Death and Disaster series of Andy Warhol.
