Digital live music occupies a multimodal role in a cultural contextual landscape shaped by technological innovation. The book consists of three sections. EBOOK: Access All Eras: Tribute Bands and Global Pop Culture Shane Homan,2006-09-16 From Björn Again to the Illegal Eagles, from Black Stabbath to the Essex Pistols and the Bootleg Beatles, tribute bands comprise a significant sector of many national music scenes. Access All Eras is the first book to examine the tribute and cover band phenomenon and its place within the global popular music industry. The ability of tributes to reinforce or challenge the very idea of stardom is explored through studies of imitations of various iconic pop and rock performers, including Elvis, the Beatles, Jimi Hendrix, ABBA and the Beach Boys. Analysis of such tribute acts can tell us much about how the meanings of performers and performance circulate globally, and are resisted or accommodated by local music cultures in the commercialisation of live and recorded memories. The book also looks at music industry attitudes towards imitation, including copyright issues and the use of multimedia performance techniques to deliver the 'authentic' tribute experience. It offers an insight into how understandings of nostalgia and celebrity circulate within contemporary society and are connected with other media and leisure industries. Access All Eras is key reading for students in popular music, media studies, cultural studies, arts, music, sociology, performing arts and popular culture studies.

The Future of Live Music Ewa Mazierska,Les Gillon,Tony Rigg,2020-05-14 What 'live music' means for one generation or culture does not necessarily mean 'live' for another. This book examines how changes in economy, culture and technology pertaining to post-digital times affect production, performance and reception of live music. Considering established examples of live music, such as music festivals, alongside practices influenced by developments in technology, including live streaming and holograms, the book examines whether new forms stand the test of 'live authenticity' for their audiences. It also speculates how live music might develop in the future, its relationship to recorded music and mediated performance and how business is conducted in the popular music industry.

With access to promoters, musicians and execs alike, Ticket Masters offers new riffs and wrinkles on a saga of ambition in the entertainment industry.

Competition Policy and the Music Industries Jenny Kanellopoulou,2021-11-04 This book explores the nature of the music industries before and after the digital revolution from the point of view of the consumer, and explores the question of whether there is a role for competition policy intervention in the music industries. Considering the historically consolidated environment of the music industries, and their rapidly evolving business models in the twenty-first century, the author argues that there is a need for updated competition design to promote consumer welfare and competition in these markets. Opening a much-needed interdisciplinary dialogue across music studies, business, and law, the book applies business model literature to antitrust law in the context of the music industries. It offers a comprehensive history of encounters between the music industry and antitrust and regulatory authorities in the US, UK, and EU, from the payola scandals of the 1950s to the merger of Live Nation and Ticketmaster in 2010, showing how even as business models in the industry have changed, it has repeatedly moved towards consolidation with little regulation. Drawing on this history, it considers how competition policy can foster innovation and safeguard consumer interests in the music markets of the future. Offering new analytical and methodological tools, this book is relevant to those studying the music industries from business, legal, and cultural perspectives.

Digital Transformation in the Cultural and Creative Industries Marta Massi,Marilena Vecco,Yi Lin,2020-12-29 This research-based book investigates the effects of digital transformation on the cultural and creative sectors. Through cases and examples, the book examines how artists and art institutions are facing the challenges posed by digital transformation, highlighting both positive and negative effects of the phenomenon. With contributions from an international range of scholars, the book examines how digital transformation is changing the way the arts are produced and consumed. As relative late adopters of digital technologies, the arts organizations are shown to be struggling to adapt, as issues of authenticity, legitimacy, control, trust, and co-creation arise. Leveraging a variety of research approaches, the book identifies managerial implications to render a collection that is valuable reading for scholars involved with arts and culture management, the creative industries and digital transformation more broadly.

Government assistance to industry Great Britain: Parliament: House of Commons: Business, Innovation and Skills Committee,2011-02-18 This report from the Business, Innovation and Skills Committee concludes that while the Government has proposed a number of interventions which have the potential to help promote economic growth, it does not add up to a comprehensive growth strategy. The report highlights the fact that in the absence of clear performance measurements the Department for Business, Innovation and Skills' strategy runs the risk that economic success could mask failures in policy while economic hardship could overshadow excellent strategies or interventions. The report argues that different sectors of the economy have different requirements when it comes to government support and that the Department will have to develop a strong awareness of the needs of individual sectors and have the flexibility to react to them if we are to build capability across all sectors of the economy. While the Government's growth strategy appears to move in this direction, evidence from three sectors has shown that much work needs to be done. The banks' role in providing finance to business is crucial to the success of the economy. The report believes that the agreement struck between Government and the banks (Project Merlin) is a step in the right direction but the agreement must be shown to deliver real benefits to industry. If the economic recovery is to be sustained then both Government and banks need to move quickly from rhetoric to meaningful of support to the private sector.

The COVID-19 Crisis Deborah Lupton,Karen Willis,2021-04-19 Since its emergence in early 2020, the COVID-19 crisis has affected every part of the world. Well beyond its health effects, the pandemic has wrought major changes in people’s everyday lives as they confront restrictions imposed by physical distancing and consequences such as loss of work, working or learning from home and reduced contact with family and friends. This edited collection covers a diverse range of experiences, practices and representations across international contexts and cultures (UK, Europe, North America, South Africa, Australia and New Zealand). Together, these contributions offer a rich account of COVID society. They provide snapshots of what life was like for people in a variety of situations and locations living through the first months of the novel coronavirus crisis, including discussion not only of health-related experiences but also the impact on family, work, social life and leisure activities. The socio-material dimensions of quotidian practices are highlighted: death rituals, dating apps, online musical performances, fitness and exercise practices, the role of windows, healthcare work, parenting children learning at home, moving in public space as a blind person and many more diverse topics are explored. In doing so, the authors surface the feelings of strangeness and challenges to norms of practice that were part of many people’s experiences, highlighting the profound affective responses that accompanied the disruption to usual cultural forms of sociality and ritual in the wake of the COVID outbreak and restrictions on movement. The authors show how social relationships and social institutions were suspended, re-invented or transformed while social differences were brought to the fore. At the macro level, the book includes localised and comparative analyses of political, health system and policy responses to the pandemic, and highlights the differences in representations and experiences of very different social groups, including people with disabilities, LGBTQI people, Dutch Muslim parents, healthcare workers in France and Australia, young adults living in northern Italy, performing artists and their audiences, exercisers in Australia and New Zealand, the Latin cultures of Spain and Italy, Asian-Americans and older people in Australia. This volume will appeal to undergraduates and postgraduates in sociology, cultural and media studies, medical humanities, anthropology, political science and cultural geography.

Access All Areas Barbara Charone,2022-06-23 First as a journalist and then a publicist at Warner Brothers Records for nearly twenty years, Barbara Charone has experienced, first-hand, the changes in the cultural landscape. Access All Areas is a personal, insightful and humorous memoir packed with stories of being on the cultural frontline, from first writing press releases on a typewriter driven by Tip Ex, then as a press officer for heavy metal bands taking the bus up to Donnington Festival with coffee, croissants and the much more popular sulfate. To taking on Madonna, an unknown girl from Detroit, and telling Smash Hits 'you don't have to run the piece if the single doesn't chart', and becoming a true pioneer in music, Charone continues to work with the biggest names in music, including Depeche Mode, Robert Plant, Foo Fighters and Mark Ronson at her agency MBCPR. The story of how a music-loving, budding journalist from a Chicago suburb became the defining music publicist of her generation, Access All Areas is a time capsule of the last fifty years, told through the lens of music.
