**GPS Tracking with Java EE Components** Kristof Beiglböck,2018-08-06 GPS Tracking with Java EE Components: Challenges of Connected Cars highlights how the self-driving car is actually changing the automotive industry, from programming embedded software to hosting services and data crunching, in real time, with really big data. The book analyzes how the challenges of the Self Driving Car (SDC) exceed the limits of a classical GPS Tracking System (GTS.) It provides a guidebook on setting up a tracking system by customizing its components. It also provides an overview of the prototyping and modeling process, and how the reader can modify this process for his or her own software. Every component is introduced in detail and includes a number of design decisions for development. The book introduces Java EE (JEE) Modules, and shows how they can be combined to a customizable GTS, and used as seed components to enrich existing systems with live tracking. The book also explores how to merge tracking and mapping to guide SDCs, and focuses on client server programming to provide useful information. It also discusses the challenges involved with the live coordination of moving cars. This book is designed to aid GTS developers and engineers in the automotive industry. It can also help Java Developers, not only interested in GPS Tracking, but in modern software design from many individual modules. Source code and sample applications will be available on the book's website.

**Médias suisses à l'ère numérique** Philippe Amez-Droz,2015-04-22 Sous la pression d’Internet et du plein accès à l’information gratuite, les mutations de la presse sont inéluctables, et cet ouvrage décrit en particulier le basculement numérique des groupes médiatiques suisses. Ceux-ci font l’objet d’une description détaillée, sous l’angle de l’économie des médias et de la stratégie adoptée pour réussir cette mutation (concentration, diversification, nouvelle offre tarifaire, etc.). Avec la dématérialisation des biens d’information et l’accès aux contenus sur supports numériques, cette mutation met en exergue de nouveaux modèles économiques où l’on voit s’affronter groupes privés et médias du service public (SRG SSR), mais aussi l’ensemble des médias issus du modèle traditionnel, dit de proximité, et les nouveaux médias, globalisés et mondialisés. Les enjeux d’une nouvelle régulation, l’évolution des recettes publicitaires et le débat politique en Suisse sur les diverses formes d’aides aux médias d’information sont nécessairement abordés. Ce tour d’horizon complet, remarquablement documenté, permet de mieux comprendre le défi majeur auquel font face aujourd’hui les médias suisses.
