Computer Science Logo Style: Symbolic computing Brian Harvey,1997 This series is for people--adults and teenagers--who are interested in computer programming because it's fun. The three volumes use the Logo programming language as the vehicle for an exploration of computer science from the perspective of symbolic computation and artificial intelligence. Logo is a dialect of Lisp, a language used in the most advanced research projects in computer science, especially in artificial intelligence. Throughout the series, functional programming techniques (including higher order functions and recursion) are emphasized, but traditional sequential programming is also used when appropriate.In the second edition, the first two volumes have been rearranged so that illustrative case studies appear with the techniques they demonstrate. Volume 1 includes a new chapter about higher order functions, and the recursion chapters have been reorganized for greater clarity. Volume 2 includes a new tutorial chapter about macros, an exclusive capability of Berkeley Logo, and two new projects. Throughout the series, the larger program examples have been rewritten for greater readability by more extensive use of data abstraction.Volume 1 Symbolic Computing, is addressed to a reader who has used computers and wants to learn the ideas behind them. Symbolic computing is the manipulation of words and sentences, in contrast both to the graphics most people associate with Logo and to the numerical computation with which more traditional languages such as Pascal and C++ are most comfortable. This volume is well known for its clear and thorough presentation of recursion, a key idea in computer science that other texts treat as arcane and difficult.The Logo programs in these books and the author's free Berkeley Logo interpreter are available via the Internet or on diskette.

Origination Andy Pike,2015-05-26 Origination: The Geographies of Brands and Branding offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association. Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding Challenges current interpretations of brands as vehicles of homogenization in globalization Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under-researched geographical differentiation of commodity brands and branding Presents innovative new research and analysis of the socio-spatial biographies of the Newcastle Brown Ale, Burberry and Apple brands Forges strong new connections between political and cultural economy approaches within geography Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places

Reformation Theology Matthew Barrett,2017-03-16 Five hundred years ago, the Reformers were defending doctrines such as justification by faith alone, the authority of Scripture, and God's grace in salvation--some to the point of death. Many of these same essential doctrines are still being challenged today, and there has never been a more crucial time to hold fast to the enduring truth of Scripture. In Reformation Theology, Matthew Barrett has brought together a team of expert theologians and historians writing on key doctrines taught and defended by the Reformers centuries ago. With contributions from Michael Horton, Gerald Bray, Michael Reeves, Carl Trueman, Robert Kolb, and many others, this volume stands as a manifesto for the church, exhorting Christians to learn from our spiritual forebears and hold fast to sound doctrine rooted in the Bible and passed on from generation to generation.

Home Learning Environments for Young Children Cathy Nutbrown,Peter Clough,Kay Davies,Peter Hannon,2022-04-07 By bringing together research evidence on effectively supporting parents to engage with their children's early learning, and the role of education professionals in developing partnerships with families, this book focuses on partnerships between professionals and parents to enhance family learning for young children in literacy and other aspects of early learning. The move towards setting, home-based, and online learning has accelerated, and it is important for both students and practitioners to value parents' roles in their young children's learning; to consider how parents can support young children's learning in these scenarios, and how to apply this in practice with children aged birth to five. Through a wealth of case studies from real experience, the authors showcase an inspiring range of inclusive projects and approaches with families, including marginalised groups such as bilingual learners, fostering families, and families identified as 'vulnerable' including imprisoned fathers and children with specific learning needs.

The Adlard Coles Nautical Quiz Book Bloomsbury Publishing,2014-09-11 The Adlard Coles Nautical Quiz Book is perfect for seafaring quizzers. It's divided into six nautically-flavoured categories, covering 1,000 questions. Categories range from Geography, Famous people and History to Culture, Science and Trivia. Each round is graded as easy (Able Seaman), medium (Midshipman) or tough (Hard Tack). A random sprinkling of nautical 'did-you-knows' adds a little salt to the mix and there's a quick-fire section at the end to keep everyone on their toes. · In which ocean is the Bermuda Triangle? · What did Dee Caffari achieve in 2006? · Name the first

vessel to reach the North Pole in 1958 · What does the god Neptune (aka Poseidon) carry? · What is the Saffir-Simpson scale? · What was the proper name of 'Bogie's Boat'? The Adlard Coles Nautical Quiz Book is the perfect stowaway for cosy evenings aboard or ashore.

Hand Over Fist Kevin D. Glenn,2014-07-08 Incivility among Christians has been referred to as a ?cannibal culture, ? ?venomous, ? ?pandemic, ? and ?anything but Christlike.? Why is it so hard for Christians to have a civil conversation anymore? We need the humility to open our hands and ask for help, the boldness to lift up our hand to incivility and say, ?Enough, ? and the confidence to hold out our hand to offer help and guidance to others. That's hard to do with a clenched fist. Hand Over Fist provides the Christian community with tools to recognize various forms of conflict, interpret those conflicts appropriately, and engage those conflicts through a process that equips and empowers Christians to participate in civil discourse. And the solution to all of it is in the palm of your hand.

Flavor Patrick Etievant,Elisabeth Guichard,Christian Salles,Andree Voilley,2016-05-27 Flavor: From Food to Behaviors, Wellbeing and Health is the first single-volume resource focused on the different mechanisms of flavor perception from food ingestion, to sensory image integration and the physiological effects that may explain food behaviors. The information contained is highly multidisciplinary, starting with chemistry and biochemistry, and then continuing with psychology, neurobiology, and sociology. The book gives coherence between results obtained in these fields to better explain how flavor compounds may modulate food intake and behavior. When available, physiological mechanisms and mathematical models are explained. Since almost half a billion people suffer from obesity and food related chronic diseases in the world, and since recent research has investigated the possible roles of pleasure linked to the palatability of food and eating pleasure on food intake, food habits, and energy regulation, this book is a timely resource on the topic. This book links these results in a logical story, starting in the food and the food bolus, and explaining how flavor compounds can reach different receptors, contribute to the emergence of a sensory image, and modulate other systems

recognized as controlling food intake and food behavior. The influence of age, physiological disorders, or social environments are included in this approach since these parameters are known to influence the impact of food flavor on human behavior. Uniquely brings together multidisciplinary fields to explain, in a narrative structure, how flavor compounds may modulate food intake and behavior Includes discussions of chemistry and biochemistry, psychology, neurobiology, and sociology Presents an extremely current view that offers a wide perspective on flavor, an area of rapidly expanding knowledge Edited by renowned experts in the field of flavor perception
