Lyon France B G Preston, 2020-08-09 Lyon, France. A beautiful city at the confluence of two historic rivers, the Saône and Rhône. Often called France's Second City, Lyon offers visitors a wealth of experiences from fine dining, exploring Roman ruins, learning about the history of cinema, discovering hidden passageways and visiting museums from historic to ultra-modern. This Starting-Point Guide covers Lyon and several nearby towns, villages and attractions including suggested day tours to the hilly Beaujolais wine country and much more. A guide for travelers who wish to use one city such as Lyon as their basecamp to travel the area and not move from town to town as they travel through Europe. historic area. Guidance on how to get around town and an orientation to the most popular sites is included. This guide focuses on the city and surrounds of Lyon but also covers notable sites including Vienne and Pérouges.. This is not a complete guide to the Rhône-Alpes region. Such a guide would go beyond the suggested scope of staying in one town and having enjoyable day trips from there.

Data-Intensive Text Processing with MapReduce Jimmy Lin,Chris Dyer,2022-05-31 Our world is

being revolutionized by data-driven methods: access to large amounts of data has generated new insights and opened exciting new opportunities in commerce, science, and computing applications. Processing the enormous quantities of data necessary for these advances requires large clusters, making distributed computing paradigms more crucial than ever. MapReduce is a programming model for expressing distributed computations on massive datasets and an execution framework for large-scale data processing on clusters of commodity servers. The programming model provides an easy-to-understand abstraction for designing scalable algorithms, while the execution framework transparently handles many system-level details, ranging from scheduling to synchronization to fault tolerance. This book focuses on MapReduce algorithm design, with an emphasis on text processing algorithms common in natural language processing, information retrieval, and machine learning. We introduce the notion of MapReduce design patterns, which represent general reusable solutions to commonly occurring problems across a variety of problem domains. This book not only intends to help the reader think in MapReduce, but also discusses limitations of the programming model as well. Table of

Jours of Our Lives ,2019-05-06 BETH ARNOLD'S Jours of Our Lives is the narrative of one couple's wild-card bet on themselves. In 2002, after living 13 years in their showplace of a Craftsman bungalow in Little Rock, Arkansas, Arnold-a journalist, essayist, and novelist-and her husband, author James Morgan, decided it was time for a change. And what a change they made! When Morgan, a book writer and amateur painter, was stumped for a new book idea, Arnold saw the chance to pull out a dream of hers: to live in France. Arnold's late brother, New York decorator Brent Arnold-whom David Halberstam had called the talent of his generation-had given the couple vivid decorating advice when they'd married and moved into their Craftsman house: Matisse colors and Vuillard patterns. Brent

Arnold's advice had turned James Morgan into a devotee of Henri Matisse. So on a day in 2001, when Beth was working with James to help him discover a new book idea, she suggested a facet of artistic life--in this case, Matisse's life--that gripped Morgan: Most people look, but they don't see in the deepest sense of the word. Her idea for him was a book called *Learning to See*, in which he would follow in the footsteps of Henri Matisse. The book became *Chasing Matisse*, and soon the two of them had sold their beloved house in Little Rock and embarked on a life-changing journey through France, Corsica, Morocco, and beyond. *Jours of Our Lives*, which began life as Beth Arnold's daily blog recounting the soap-opera arc of their crazy and heart-wrenching road trip in pursuit of a creative dream, stands today as a vivid depiction of one couple's brave and unwavering commitment to a life that called them. Beth Arnold, writes William Whitworth, editor emeritus of *The Atlantic*, is a reporter, a novelist, a memoirist, a cook, and a mom, but perhaps most of all she is a wanderer and a gifted travel writer. With wit and offhand ease, Arnold shows us her world: how to get there, where to stay, what it looks like, how it sounds, and what it tastes like.
