From Here to There Kris Harzinski,2013-07-02 From Here to There celebrates these ephemeral documents--usually forgotten or tossed aside after having served their purpose--giving them their due as artifacts representing stories from people's lives around the world. There is the young woman suffering from juvenile rheumatoid arthritis who created maps of the Humira injections on her stomach and thighs to help her remember the sites, and give them time to heal. Or the young boy who imagined a whole country for ants and put it to paper. Lucas from Australia drew an obsessively detailed map of his local traffic island, and a teenage girl contributed a map of her high school locker. Two American tourists got lost in the Bulgarian mountains following the hand drawn map of a local, and Brittany from Denmark drew directions to an animal rights protest in Copenhagen. The maps featured in From Here to There are as varied and touching as the stories they tell.

Information Technology and Intelligent Transportation Systems Valentina Emilia Balas,Lakhmi C. Jain,Xiangmo Zhao,2016-11-08 This volume includes the proceedings of the 2015 International Conference on Information Technology and Intelligent Transportation Systems (ITITS 2015) which was held in Xi'an on December 12-13, 2015. The conference provided a platform for all professionals and researchers from industry and academia to present and discuss recent advances in the field of Information Technology and Intelligent Transportation Systems. The presented information technologies are connected to intelligent transportation systems including wireless communication, computational technologies, floating car data/floating cellular data, sensing technologies, and video vehicle detection. The articles focusing on intelligent transport systems vary in the technologies applied, from basic management systems to more application systems including topics such as emergency vehicle notification systems, automatic road enforcement, collision avoidance systems and some cooperative systems. The conference hosted 12 invited speakers and over 200 participants. Each paper was under double peer reviewed by at least 3 reviewers. This proceedings are sponsored by Shaanxi Computer Society and co-sponsored by Chang'an University, Xi'an University of Technology, Northwestern Poly-technical University, CAS, Shaanxi Sirui Industries Co., LTD.

The Map Book Peter Barber,2005-01-01 Chronicles the historical development of maps and mapping from the Bronze Age to the present, collecting some 175 maps spanning ten millennia that represent the progress of civilization and technology, from military plans that depict enemy positions, to the famed London Underground layout, to the digitally enhanced renderings of today.
