Global Health Diplomacy Ilona Kickbusch, Graham Lister, Michaela Told, Nick Drager, 2012-12-09 The world's problems are indeed world problems: social and environmental crises, global trade and politics, and major epidemics are making public health a pressing global concern. From this constantly changing scenario, global health diplomacy has evolved, at the intersection of public health, international relations, law, economics, and management—a new discipline with transformative potential. Global Health Diplomacy situates this concept firmly within the human rights dialogue and provides a solid framework for understanding global health issues and their negotiation. This up-to-the-minute guide sets out defining principles and the current agenda of the field, and examines key relationships such as between trade and health diplomacy, and between global health and environmental issues. The processes of global governance are detailed as the UN, WHO, and other multinational actors work to address health inequalities among the world's peoples. And to ensure maximum usefulness, the text includes plentiful examples, discussion questions, reading lists, and a glossary. Featured topics include: The legal basis of global health agreements and negotiations. Global public goods as a foundation for global health diplomacy. Global health: a human security perspective. Health issues and foreign policy at the UN. National strategies for global health. South-south cooperation and other new models of development. A volume of immediate utility with a potent vision for the future, Global Health Diplomacy is an essential text for public health experts and diplomats as well as schools of public health and international affairs.

Evaluating geographical indications Giovanni Belletti, G., Marescotti, A., 2021-11-03 Geographical indications represent a powerful way to foster sustainable food systems through territorial approaches and market linkages, especially for small-scale actors. In this perspective, and following the FAO publication methodologies of the origin-linked virtuous circle, local actors need to well define their geographical indication (GI) system and, more specifically, the product specifications as well as monitor and evaluate the impacts and readjust the system as necessary for the reproduction of local resources. These guidelines aim at providing a detailed and stepwise approach with specific tools to help practitioners in establishing their framework in relation with their objectives and local conditions, to help both the qualification through a prospective evaluation, and the reproduction of local resources through retrospective evaluation.

The Palgrave Handbook of Wine Industry Economics Adeline Alonso Ugaglia, Jean-Marie Cardebat, Alessandro Corsi, 2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.
