Giovanni Paolo Gallucci

Visions and Concepts for Education 4.0 Michael E. Auer, Dan Centea, 2021-02-05 This book contains papers in the fields of Interactive, Collaborative, and Blended Learning; Technology-Supported Learning; Education 4.0; Pedagogical and Psychological Issues. With growing calls for affordable and quality education worldwide, we are currently witnessing a significant transformation in the development of post-secondary education and pedagogical practices. Higher education is undergoing innovative transformations to respond to our urgent needs. The change is hastened by the global pandemic that is currently underway. The 9th International Conference on Interactive, Collaborative, and Blended Learning: Visions and Concepts for Education 4.0 was conducted in an online format at McMaster University, Canada, from 14th to 15th October 2020, to deliberate and share the innovations and strategies. This conference's main objectives were to discuss guidelines and new concepts for engineering education in higher education institutions, including emerging technologies in learning; to debate new conference format in worldwide pandemic and post-pandemic conditions; and to discuss new technology-based tools and resources that drive the education in non-traditional ways such as Education 4.0. Since its beginning in 2007, this conference is devoted to new learning approaches with a focus on applications and experiences in the fields of interactive, collaborative, and blended learning and related new technologies. Currently, the ICBL conferences are forums to exchange recent trends,

research findings, and disseminate practical experiences in collaborative and blended learning, and engineering pedagogy. The conference bridges the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, industry-centric educators, continuing education practitioners, etc.

New Realities, Mobile Systems and Applications

Michael E. Auer, Thrasyvoulos Tsiatsos, 2022-04-08

This book devotes to new approaches in interactive mobile technologies with a focus on learning.

Interactive mobile technologies are today the core of many—if not all—fields of society. Not only the younger generation of students expects a mobile working and learning environment. And nearly daily new ideas, technologies and solutions boost this trend. To discuss and assess the trends in the interactive mobile field are the aims connected with the 14th International Conference on

Interactive Mobile Communication, Technologies and Learning (IMCL2021), which was held online from 4 to 5 November 2021. Since its beginning in 2006, this conference is devoted to new approaches in interactive mobile technologies with a focus on learning. Nowadays, the IMCL conferences are a forum of the exchange of new research results and relevant trends as well as the exchange of experiences and examples of good practice.

Interested readership includes policy makers, academics, educators, researchers in pedagogy and learning theory, school teachers, learning

Industry, further education lecturers, etc.

Kurvendiskussion Vasco Alexander

Schmidt, 2023-01-16 Dieses ungewöhnliche Mathematik-Lexikon vermittelt kein Grundwissen, sondern stellt große, aber auch randständige Mathematik knapp und unterhaltsam vor. Grundlage bilden mathematische Themen und Personen, über die in den vergangenen 30 Jahren in Zeitungen berichtet wurde. Wie ein Wimmelbuch hält der Band geglückte und überraschende Popularisierungsversuche fest und lädt dazu ein, den Spuren der Mathematik im Internet, in Büchern und Zeitschriften zu folgen. Das Wörterbuch richtet sich an Mathematik-Interessierte, die Spaß an kurzen Schlaglichtern auf die Welt der Mathematik haben und nachvollziehen möchten, wie und in welcher Form die Mathematik in die Zeitungen kommt.
