Identity and Play in Interactive Digital Media

Sara M. Cole, 2017-03-16 Recent shifts in new literacy studies have expanded definitions of text, reading/viewing, and literacy itself. The inclusion of non-traditional media forms is essential, as texts beyond written words, images, or movement across a screen are becoming ever more prominent in media studies. Included in such non-print texts are interactive media forms like computer or video games that can be understood in similar, though distinct, terms as texts that are read by their users. This book examines how people are socially, culturally, and personally changing as a result of their reading of, or interaction with, these texts. This work explores the concept of ergodic ontogeny: the mental development resulting from interactive digital media play experiences causing change in personal identity.

Quality Play and Media Kate Highfield, Margaret Sims, C. Glenn Cupit, In the early years, children learn mostly through play. Their receptive young minds are formed and their physical skills are developed as they begin to explore the world around them. They learn how to get along with others as they develop social skills and learn how to handle their emotions. What impact is using digital technology having on how children are developing? Is it harming them or is it helping them? What role do parents and caregivers have in all this? These are some of the questions this e-book sets out to answer. Some of our best minds contribute important ideas on what parents, educators and caregivers need to know about the impact of electronic media on our children's development. More importantly they offer us guidance on what we can do to avoid the pitfalls and make use of the ways it can enhance children's learning.

Changing Play: Play, Media And Commercial

Culture From The 1950s To The Present Day Marsh, Jackie, Bishop, Julia, 2013-10-01 The aim of this book is to offer an informed account of changes in the nature of the relationship between play, media and commercial culture in England through an analysis of play in the 1950s/60s and the present day.

Connected Play Yasmin B. Kafai, Deborah A. Fields, 2013-10-11 How kids play in virtual worlds, how it matters for their offline lives, and what this means for designing educational opportunities.

Literacies Across Media Margaret Mackey, 2007-01-26 The contemporary young reader learns from a very early age to read and interpret through a broad range of media. *Literacies Across Media* explores how a group of boys and girls, aged from ten to fourteen, make sense of narratives in a variety of formats, including print, electronic book, video, DVD, computer game and CD-ROM. This book records these young people over a period of eighteen months as they read, view and play different texts, demonstrating variations and consistencies of interpretative behaviour across different media. Margaret Mackey analyses how the activities of reading, viewing and playing intertwine and affect each other's development. Her in-depth research shows young readers developing strategies for interpreting narratives through encounters with a diverse range of texts and media. The study breaks new ground in its illustration and exploration of the impact of cross-media fertilisation on how young readers come to an understanding of how to make sense of stories. *Literacies Across Media* offers both a vivid account of a group of young readers coming to terms with texts and a radical perspective on the growth of a generation of young readers. It is thought-provoking, fascinating and highly informative reading not only for theoreticians

interested in the reading process, but also teachers, librarians, parents and anybody involved with young people and their texts.

Sound Play William Cheng, 2014-03-05 Video games open portals to fantastical worlds where imaginative play and enchantment prevail. These virtual settings afford us considerable freedom to act out with relative impunity. Or do they? *Sound Play* explores the aesthetic, ethical, and sociopolitical stakes of people's creative engagements with gaming's audio phenomena—from sonorous violence to synthesized operas, from democratic music-making to vocal sexual harassment. William Cheng shows how video games empower their designers, composers, players, critics, and scholars to tinker (often transgressively) with practices and discourses of music, noise, speech, and silence. Faced with collisions between utopian and alarmist stereotypes of video games, *Sound Play* synthesizes insights across musicology, sociology, anthropology, communications, literary theory, philosophy, and additional disciplines. With case studies spanning *Final Fantasy VI*, *Silent Hill*, *Fallout 3*, *The Lord of the Rings Online*, and *Team Fortress 2*, this book insists that what we do in there—in the safe, sound spaces of games—can ultimately teach us a great deal about who we are and what we value (musically, culturally, humanly) out here. Power Play Raymond Boyle, Richard Haynes, 2009 A new study of the link between three key obsessions of the 20th century: the media, sport and popular culture.

Playing Real Lindsay Brandon Hunter, 2021-02-15 *Playing Real: Mimesis, Media, and Mischief* explores the integration and interaction of mimetic theatricality and representational media

in twentieth- and twenty-first-century performance. It brings together carefully chosen sites of performance—including live broadcasts of theatrical productions, reality television, and alternate-reality gaming—in which mediatization and mimesis compete and collude to represent the real to audiences. Lindsay Brandon Hunter reads such performances as forcing confrontation between notions of authenticity, sincerity, and spontaneity and their various others: the fake, the feigned, the staged, or the rehearsed. Each site examined in *Playing Real* purports to show audiences something real—real theater, real housewives, real alternative scenarios—which is simultaneously visible as overtly constructed, adulterated by artifice and artificiality. The integration of mediatization and theatricality in these performances, Hunter argues, exploits the proclivities of both to conjure the real even as they risk corrupting the perception of authenticity by imbricating it with artifice and overt manipulation. Although the performances analyzed obscure boundaries separating actual from virtual, genuine from artificial, and truth from fiction, Hunter rejects the notion that these productions imperil the “real.” She insists on uncertainty as a fertile site for productive and pleasurable mischief—including relationships to realness and authenticity among both audience and participants.

Literacy Playshop Karen E. Wohlwend, 2015-04-25
Building on her award-winning research (featured in *Playing Their Way into Literacies*) which emphasizes that play is an early literacy, Wohlwend has developed a curricular framework for children ages 3 to 8. The Literacy Playshop curriculum engages children in creating their own multimedia productions, positioning them as media makers rather than passive recipients of media messages. The goal is to teach young children to

critically interpret the daily messages they receive in popular entertainment that increasingly blur toys, stories, and advertising. The first half of this practical resource features case studies that show how six early childhood teachers working together in teacher study groups developed and implemented play-based literacy learning and media production. The second half of the book provides a Literacy Playshop framework with professional development and classroom activities, discussion questions, and technology try-it sections. This user-friendly book will inspire and support teachers in designing their own Literacy Playshops.

Corporate Media and the Threat to Democracy Robert W. McChesney, 1997-03-11 In this passionate and strikingly lucid essay, Robert McChesney makes clear why all of us should be alarmed about the effects of media mergers on the future of American democracy. This is a must reading for anyone who wants to get a quick understanding of this troubling trend.—Susan J. Douglas, author of *Growing Up Female with the Mass Media*

Mobile Media Jo Groebel, Eli M. Noam, Valerie Feldmann, 2006-08-15 The proliferation of mobile media in recent years is an international phenomenon, with billions of devices sold annually. Mobile communications are now moving beyond individualized voice to mass media content—text, voice, sound, images, and even video. This will create new types of content that allow media

companies and users to interact in new ways. There is a strong interest from the media and telecom industries in what manner of applications and content can be distributed in that fashion, and at what cost. To answer these questions, the book provides 18 chapters from internationally renowned authors. They identify likely types of content such as news, entertainment, peer-to-peer, and location-specific information; evaluate the economics, business models, and payment mechanisms necessary to support these media; and cover policy dimensions such as copyright, competitiveness, and access rights for content providers. This volume takes the reader through the various elements that need to be considered in the development of third generation (3G) content, and explains pitfalls and barriers. The result is a volume of interest to business professionals, academics, and policy makers. The book is international in focus and a glossary of terms is provided. There are few publications available which give an overview of this rapidly changing field.

Time and Media Markets Alan B. Albarran, Angel Arrese Rea, 2003-01-30 This edited collection examines time and its relationship to and impact upon media industries, studying how the media industry views time and makes business and economic decisions based on considerations of time. Contributions from an international set of authors analyze time constraints and competition between different media; the quantity and quality of time spent in media consumption, audience and readership time valuation/costing/pricing; and the emergence of new media businesses around individual time management. Specific topics examined in the volume include: * a philosophical look at the concept of time and its application to media markets; * temporal aspects of media distribution for the media industries, and how time affects their activities; * the impact of

increasing media industry consolidation and convergence on managerial effectiveness; * approaches to time by CNN and its various cache of news channels, in a managerial context; * the application of niche theory as a framework to examine competition between the Internet and television; * Internet access in the United Kingdom and Europe, examining the cost of time for online access; * the exchange of time and money in the television market for advertising; and * a summary of research and an agenda for future research on the topic of time's role in the media industry and markets. With its origins in the third World Media Economics conference, held in 2000, *Time and Media Markets* is a distinctive and important collection appropriate for scholars and advanced students in media management and economics.

EBOOK: Understanding Alternative Media Olga Bailey, Bart Cammaerts, Nico Carpentier, 2007-12-16
What are alternative media? What roles do alternative media play in pluralistic, democratic societies? What are the similarities and differences between alternative media, community media, civil society media and rhizomatic media? How do alternative media work in practice? This clear and concise text offers a one-stop guide through the complex political, social and economic debates that surround alternative media and provides a fresh and insightful look at the renewed importance of this form of communication. Combining diverse case studies from countries including the UK, North America and Brazil, the authors propose an original theoretical framework to help understand the subject. Looking at both 'old' and 'new' media, the book argues for the importance of an alternative media and suggests a

political agenda as a way of broadening its scope. Understanding Alternative Media is valuable reading for students in media, journalism and communications studies, researchers, academics, and journalists.

The Politics of Southeast Asia's New Media

William Atkins, 2013-11-19 The past decade has seen a major structural shift in broadcasting in Southeast Asia, with the development of digital satellite and cable broadcasting. This shift has impacted upon some of the most information-sensitive governments in the world: Singapore, Malaysia and, until recently, Indonesia. Atkins traces this development in five countries, showing that the challenge to authoritarian regimes, anticipated by modern theorists as a result of the globalization of news and information, is not materializing. Instead, a new commercial elite has arisen, Southeast Asia's own mini-moguls, who act as gatekeepers for state interests, as partners to global media companies.

An Integrated Play-based Curriculum for Young Children Olivia N. Saracho, 2013-03-01 Play provides young children with the opportunity to express their ideas, symbolize, and test their knowledge of the world. It provides the basis for inquiry in literacy, science, social studies, mathematics, art, music, and movement. Through play, young children become active learners engaged in explorations about themselves, their community, and their personal-social world. An Integrated Play-Based Curriculum for Young Children offers the theoretical framework for understanding the origins of an early childhood play-based curriculum and how young children learn and understand concepts in a social and physical environment. Distinguished author Olivia N. Saracho then explores how play fits into various curriculum areas in order to help teachers develop their early childhood curriculum using

developmentally and culturally appropriate practice. Through this integrated approach, young children are able to actively engage in meaningful and functional experiences in their natural context. Special Features Include: Vignettes of children's conversations and actions in the classroom Suggestions for activities and classroom materials Practical examples and guidelines End-of-chapter summaries to enhance and extend the reader's understanding of young children By presenting appropriate theoretical practices for designing and implementing a play-based curriculum, *An Integrated Play-Based Curriculum for Young Children* offers pre-service teachers the foundational knowledge about the field, about the work that practitioners do with young children, and how to best assume a teacher's role effectively.

Media Technologies for Work and Play in East Asia Lee, Micky, Chung, Peichi, 2021-05-28 Media technologies for play have become major industries in Japan and South Korea. Even in North Korea, citizens bypass the state to enjoy popular culture. At the same time, corporations and governments encourage people to produce economic values through play. The first comparative study of media technologies in Japan and the two Koreas, this book illuminates the peculiar geopolitical relations between the three countries through their development and use of digital technologies. Drawing from political economy, cultural studies and technology studies, this book will be essential reading for researchers and students of media technologies and popular culture in Northeast Asia.
