Implementing the Microsoft Dynamics GP Web Client Ian Grieve, 2014-09-20 Microsoft Dynamics GP is a popular

enterprise resource planning (ERP) application used by tens of thousands of sites around the world to keep the accounting, financial, distribution and manufacturing functions running day in and day out. To do this Microsoft Dynamics GP was accessed via client software installed directly on the user's computer, or a terminal server. Microsoft Dynamics GP 2013 saw the introduction of a second type of client with which Microsoft Dynamics GP could be accessed; the web client. The installation of the web client is a little more complex than that of the classic desktop client. This book provides guidance for the implementation of the Microsoft Dynamics GP web client with step-by-step guides, illustrations and links to useful resources. Who This Book Is For This book is aimed at Dynamics GP users and partners who intend to implement the web client for Microsoft Dynamics GP for individual clients; much of the process for installing a multi-tenant deployment is the same as the scale-out one, but this book is specifically focusing on the scale-out deployment. This book assumes you have a knowledge of Windows Server, Active Directory for creating users and groups, IIS and application deployments. A basic knowledge of Microsoft Dynamics GP is also required. What This Book Covers This book covers the scale-out deployment of the Microsoft Dynamics GP 2013 R2 web client, from prerequisites through installation to logging in, using and managing. Microsoft Dynamics GP Workflow 2.0 Ian Grieve,2015-06-01 Microsoft Dynamics GP is a popular enterprise resource planning (ERP) application used by tens of thousands of sites around the world to keep the accounting, financial, distribution and manufacturing functions running day in and day out. Dynamics GP includes a variety of tools and modules to assist in controlling processes and data; one of the major modules for this was the Dynamics Workflow module. However, this module had major flaws which very much limited its usefulness; it was slow, clunky and difficult to install, configure and maintain. As of Microsoft Dynamics GP 2013 R2 this Workflow module has been replaced with a new one; Workflow 2.0. This new module lives entirely within Dynamics GP itself, thereby removing the dependency on SharePoint; this has the dual benefit of making Workflow 2.0 easy to setup, configure workflow processes and maintain on an ongoing basis. This book introduces the concepts of workflow and moves onto Workflow 2.0. It covers the creation of both simple and complex document based workflow processes, a non-document based workflow, how users interact with the workflow process, including email notifications and email actions, before wrapping up with a step-by-step install and verification of the Web Services for Microsoft Dynamics GP.
