The Adventures of Tom Sawyer. ILLUSTRATED. : Illustrated by True Williams (Mobi Classics) Mark Twain,2008 The Adventures of Tom Sawyer, by Mark Twain, is a popular 1876 novel about a young boy growing up in the Antebellum South on the Mississippi River in the fictional town of St. Petersburg, Missouri. Tom Sawyer, a mischievous orphan taken in by his Aunt Polly, goes through a series of adventures involving his friends, Joe Harper and Huckleberry Finn. Heaven in Disorder Slavoj Žizek,2022-04-05 As we emerge (though perhaps only temporarily) from the pandemic, other crises move center stage: outrageous inequality, climate disaster, desperate refugees, mounting tensions of a new cold war. The abiding motif of our time is relentless chaos. Acknowledging the possibilities for new beginnings at such moments, Mao Zedong famously proclaimed There is great disorder under heaven; the situation is excellent. The contemporary relevance of Mao's observation depends on whether today's catastrophes can be a catalyst for progress or have passed over into something terrible and irretrievable. Perhaps the disorder is no longer under, but in heaven itself. Characteristically rich in paradoxes and reversals that entertain as well as illuminate, Slavoj Žižek's new book treats with equal analytical depth the lessons of Rammstein and Corbyn, Morales and Orwell, Lenin and Christ. It excavates universal truths from local political sites across Palestine and Chile, France and Kurdistan, and beyond. Heaven In Disorder looks with fervid dispassion at the fracturing of the Left, the empty promises of liberal democracy, and the tepid compromises offered by the powerful. From the ashes of these failures, Žižek asserts the need for international solidarity, economic transformation, and--above all--an urgent, wartime communism.

Army of the Dead Richard S. Tuttle,2005 Massive armies are poised to invade the three main countries of the mainland. The Khadorans, Sakovans, and Fakarans are badly outnumbered as a thousand huge warships set sail from the Island of Darkness to exterminate all life on the mainland. Led by an ageless mage, the forces of evil appeared assured of success. The Torak, the Star of Sakova, and the Astor rally their forces to meet the onslaught and preserve humanity, but can their outnumbered forces stave off the murderous rampage that is about to descend upon them? Army of the dead is the exciting conclusion to the epic fantasy series, Forgotten legacy by Richard S. Tuttle.

Whiteness and Nationalism Nasar Meer,2020-12-17 Naming whiteness is becoming an increasingly pressing issue across a variety of social and political contexts. In this book, an international set of authors discuss how and why this has come to be the case. Studying whiteness, as either a social identity or political ideology, is a relatively recent area of scholarship. Unusually, within the fields of race and ethnicity, it is a concept that sits at an intersection between historical privilege and identity. At the same time, 'white privilege' is not universally shared in (or can be distant to) how many white people feel they experience their identities. Whiteness as a site of privilege is therefore not absolute, but rather cross-cut by a range of other concerns, too. Nonetheless, recent political developments serve to illustrate the political potency of appeals to whiteness, in a way that suggests whiteness coupled with nationhood is a central social and political topic. In this book, authors from the USA, Australia and Europe consider the contemporary relationships between whiteness and national identity by focusing on mainstream electoral politics, the 'normalisation' of white supremacy and where whiteness stands in relation to pluralised national identities. The chapters in this book were originally published as a special issue of the journal, Identities: Global Studies in Culture and Power.

Mobile Brain-Body Imaging and the Neuroscience of Art, Innovation and Creativity Jose L. Contreras-Vidal,Dario Robleto,Jesus G. Cruz-Garza,José M. Azorín,Chang S. Nam,2019-11-15 Mobile Brain–Body Imaging and the Neuroscience of Art, Innovation and Creativity is a trans-disciplinary, collective, multimedia collaboration that critically uncovers the challenges and opportunities for transformational and innovative research and performance at the nexus of art, science and engineering. This book addresses a set of universal and timeless questions with a profound impact on the human condition: How do the creative arts and aesthetic experiences engage the brain and mind and promote innovation? How do arts–science collaborations employ aesthetics as a means of problem-solving and thereby create meaning? How can the creative arts and neuroscience advance understanding of individuality and social cognition, improve health and promote life-long learning? How are neurotechnologies changing science and artistic expression? How are the arts and citizen science innovating neuroscience studies, informal learning and outreach in the public sphere? Emerging from the 2016 and 2017 International Conferences on Mobile Brain–Body Imaging and the Neuroscience of Art, Innovation and Creativity held in Cancun, Mexico and Valencia, Spain to explore these topics, this book intertwines disciplines and investigates not only their individual products—art and data—but also something more substantive and unique; the international pool of contributors reveals something larger about humanity by revealing the state of the art in collaboration between arts and sciences and providing an investigational roadmap projected from recent advances. Mobile Brain–Body Imaging and the Neuroscience of Art, Innovation and Creativity is written for academic researchers, professionals working in industrial and clinical centers, independent researchers and artists from the performing arts, and other readers interested in understanding emergent innovations at the nexus of art, science, engineering, medicine and the humanities. The book contains language, design features (illustrations, diagrams) to develop a conversational bridge between the disciplines involved supplemented by access to video, artistic presentations and the results of a hackathon from the MoBI conferences.

Stop Reading the News Rolf Dobelli,2021-01-07 News is to the mind what sugar is to the body. And he practises what he preaches: he hasn't read the news for a decade. Stop Reading the News is Dobelli's manifesto about the dangers of the most toxic form of information - news. Globalization and Militarism Cynthia Enloe,2007-02-09 Written by one of the world's leading feminist scholars, this masterful and provocative book considers the ways women's desires to be patriotic yet feminine and men's fears of being feminized explain how militarism is being globalized—and thus what it will take to roll back militarization anywhere. Through explorations of how governments think so narrowly about national security, of how postwar reconstruction efforts have marginalized women, of how ideas about feminization were used to humiliate male prisoners in Abu Ghraib, and of why camo has become a fashion statement, Cynthia Enloe unravels militarism's both blatant and subtle workings. Focusing her lens on the big picture of international politics and on the small picture of women's and men's complex everyday lives, Enloe challenges us to recognize militarism in all its forms.
