**Coach Education in Football** Thomas M. Leeder, 2022-06-09 Association Football is undoubtedly a global sport, with millions of individuals participating in more than 200 countries. The need for an educated football coaching workforce to deliver appropriate coaching practices has never been greater. Formal coach education, which is often the primary medium for developing football coaches, is socially constructed, meaning an array of social, cultural, and historical factors underpin the design and delivery of any provision. *Coach Education in Football: Contemporary Issues and Global Perspectives* is the first book to explicitly explore these aspects, by providing critical insight into football coach education programmes from across the globe. Each chapter, organised via a central theme, highlights a contemporary issue affecting football coach education and development within a specific country, offering insights into the contextual opportunities and challenges. The book covers essential topics including the progression of female football coaches, coaches' perspectives towards current provision, technological and pedagogical advances, and the historical development of formal coach education. Each chapter demonstrates the complexities associated with developing football coaches within grassroots and high-performance domains, while providing recommendations for national governing bodies, policy makers, and coach developers. This book is the first of its kind to explicitly investigate football coach education globally. This accessible book is an important read for students, academics, and practitioners with an interest in sports coaching, coach education, and football.

**The Digital Coach** Stella Kanatouri,2020-03-13 Thanks to digital media, coaching doesn't have to be constrained by geographical and temporal boundaries. Using digital media to facilitate coaching processes however, creates a distinct form of coaching practice that requires additional skill from the coach. The Digital Coach contains insights based on a comprehensive, exploratory research that analysed the discussions of a 1,000 member strong online community of coaches and several interviews with coaches to understand their practical experiences of working with technology. At the same time, the book offers information, insights, and examples that can be readily used by the coaching practitioner. Based on the developments in the field, the book provides suggestions about improving the usability of coaching software, and it offers reflections on how emerging technologies like immersive Virtual Reality, Augmented Reality, and Artificial Intelligence might extend coaching practice. Whilst acknowledging the limitations and potential risks that may arise by integrating digital media in coaching, the book suggests that coaching success doesn't only depend on media capabilities, but also on the coach. The digital coach develops enhanced coaching skills and adapts coaching practice to the media in use. The book is dedicated to the coaching practitioner who uses digital media or who is considering doing so, and is relevant for coaching supervisors, buyers of coaching services, human resource professionals, and software designers.
