### **Comparative International Perspectives on Education and Social Change in Developing Countries and Indigenous Peoples in Developed Countries**

Gaëtane Jean-Marie, Steve Sider, Charlene Desir, 2015-07-01 Democratizing educational access and building capacity in developing countries and amongst indigenous peoples in developed countries may be elusive but are hopeful goals. Many developing countries are striving to reengineer their incoherent education systems at a time when they are most vulnerable, particularly with susceptibility to natural disasters, political unrests, and economic instabilities (UNESCO, 2007). Similarly, indigenous peoples in developed countries are seeking more control over education as they consider the long-term effects of educational policies that have been forced on them. Research on education and social change in developing countries has a long history (Glewwe, 2002; Hanushek, 1995; Sider, 2011). However, there is limited research on educational capacity-building in developing countries such as Kenya, Honduras, Haiti, Ghana, Hong Kong, India, Peru, China, and Thailand. Further, the educational frameworks by which Indigenous peoples (M?ori, Canada's First Nations, and American Indian/Alaska Natives) have been educated have some significant similarities to those encountered in developing countries. The compilation of chapters illuminates research and collaborative initiatives between the authors and local leaders in developing countries' and Indigenous peoples in developed countries' efforts to solve the complexity of social inequities through educational access and quality learning. The authors draw on theoretical lens, knowledge bases, and strategies, and identify trends and developments to provide the scope of educational improvement in a globalization context (Brooks & Normore, 2010; Jean-Marie, Normore & Brooks, 2009).

*The Mobile Wave* Michael J. Saylor, 2013-05-28 In the tradition of international bestsellers, *Future Shock* and *Megatrends*, Michael J. Saylor, CEO of MicroStrategy, brings *The Mobile Wave*, a ground-breaking analysis of the impact of mobile intelligence -- the fifth wave of computer technology. The *Mobile Wave* argues that the changes brought by mobile computing are so big and widespread that it's impossible for us to see it all, even though we are all immersed in it. Saylor explains that the current generation of mobile smart phones and tablet computers has set the stage to become the universal computing platform for the world. In the hands of billions of people and accessible anywhere and anytime, mobile computers are poised to become an appendage of the human being and an essential tool for modern life. With the perspective of a historian, the precision of a technologist, and the pragmatism of a CEO, Saylor provides a panoramic view of the future mobile world. He describes how: A Harvard education will be available to anyone with the touch of a screen. Cash will become virtual software and crime proof. Cars, homes, fruit, animals, and more will be tagged so they can tell you

about themselves. Buying an item will be as easy as pointing our mobile device to scan and pay. Land and capital will become more of a liability than an asset. Social mobile media will push all businesses to think and act like software companies. Employment will shift as more service-oriented jobs are automated by mobile software. Products, businesses, industries, economies, and even society will be altered forever as the Mobile wave washes over us and changes the landscape. With so much change, *The Mobile Wave* is a guidebook for individuals, business leaders, and public figures who must navigate the new terrain as mobile intelligence changes everything.

**My Life on Craigslist** Alexandra Ares, 2011-05-13 Craigslist can be a real sharkfest! But it's a mirror of who we are. Alexandra Ares takes these two statements to their darkest and funniest place in this page turner satire of today's wildest mores shamelessly unleashed on America's largest free online dating website. A zany and original New Yorker trolls Craigslist for fun, love, sex, relationships and everything else, but she's doomed to run from trouble to trouble. Meet Emily Thompson, 25, quirky, wholesome, with a keen eye for contemporary art. One year after she moves from Buffalo to the trendy East Village, where she lands a job in an art gallery and an artist boyfriend, her life is turned upside down when she loses everything. Alone, broke and depressed, she turns to Craigslist to find everything she needs for both fun and survival. She soon discovers a wild, flawed world where everyone is either the con or the conned, and decency has flown both the laptop and the desktop. A roommate who is rarely home, turns out to be an escort, which makes Emily get on her high moral horse, but later, when Emily herself becomes an escort for a day things spiral out of control... A book with soul, about a mad world without! *An Internet for the People* Jessa Lingel, 2022-06-14 How craigslist champions openness, democracy, and other vanishing principles of the early web Begun by Craig Newmark as an e-mail to some friends about cool events happening around San Francisco, craigslist is now the leading classifieds service on the planet. It is also a throwback to the early internet. The website has barely seen an upgrade since it launched in 1996. There are no banner ads. The company doesn't profit off your data. *An Internet for the People* explores how people use craigslist to buy and sell, find work, and find love—and reveals why craigslist is becoming a lonely outpost in an increasingly corporatized web. Drawing on interviews with craigslist insiders and ordinary users, Jessa Lingel looks at the site's history and values, showing how it has mostly stayed the same while the web around it has become more commercial and far less open. She examines craigslist's legal history, describing the company's courtroom battles over issues of freedom of expression and data privacy, and explains the importance of locality in the social relationships fostered by the site. More than an online garage sale, job board, or dating site, craigslist holds vital lessons for the rest of the web. It is a website that values user privacy over profits, ease of use over slick design, and an ethos of the early web that might just hold the key to a more open, transparent, and democratic internet.

*Tap* Anindya Ghose,2017-04-14 How the smartphone can become a personal concierge (not a stalker) in the mobile marketing revolution of smarter companies, value-seeking consumers, and curated offers. Consumers create a data trail by tapping their phones; businesses can tap into this trail to harness the power of the more than three trillion dollar mobile economy. According to Anindya Ghose, a global authority on the mobile economy, this two-way exchange can benefit both customers and businesses. In *Tap*, Ghose welcomes us to the mobile economy of smartphones, smarter companies, and value-seeking consumers. Drawing on his extensive research in the United States, Europe, and Asia, and on a variety of real-world examples from companies including Alibaba, China Mobile, Coke, Facebook, SK Telecom, Telefónica, and Travelocity, Ghose describes some intriguingly contradictory consumer behavior: people seek spontaneity, but they are predictable; they find advertising annoying, but they fear missing out; they value their privacy, but they increasingly use personal data as currency. When mobile advertising is done well, Ghose argues, the smartphone plays the role of a personal concierge—a butler, not a stalker. Ghose identifies nine forces that shape consumer behavior, including time, crowdedness, trajectory, and weather, and he examines these how these forces operate, separately and in combination. With *Tap*, he highlights the true influence mobile wields over shoppers, the behavioral and economic motivations behind that influence, and the lucrative opportunities it represents. In a world of artificial intelligence, augmented and virtual reality, wearable technologies, smart homes, and the Internet of Things, the future of the mobile economy seems limitless.
