**This Program Is Brought to You By...** Joshua A. Braun, 2015-11-24 Journalism, television, cable, and online media are all evolving rapidly. At the nexus of these volatile industries is a growing group of individuals and firms whose job it is to develop and maintain online distribution channels for television news programming. Their work, and the tensions surrounding it, provide a fulcrum from which to pry analytically at some of the largest shifts within our media landscape. Based on fieldwork and interviews with different teams and organizations within MSNBC, this multi-disciplinary work is unique in its focus on distribution, which is rapidly becoming as central as production, to media work.

**Intelligent Multimedia Communication: Techniques and Applications** Chang Wen Chen,Zhu Li,Shiguo Lian,2011-07-06 Multimedia data are used more and more widely in human being's life, e.g., videoconferencing, visual telephone, IPTV, etc. Nearly most of the applications need multimedia transmission techniques that send multimedia data from one side to another side and keep the properties of efficiency, robustness and security. Here, the efficiency denotes the time cost of transmission operations, the robustness denotes the ability to survive transmission errors or noises, and the security denotes the protection of the transmitted media content. Recently, various intelligent or innovative techniques are invented, which bring vast performance improvements to practical applications. For example, such content transmission techniques as p2p, sensor network and ad hoc network are constructed, which adaptively use the peers' properties to improve the network's resources. Multimedia adaptation techniques can adjust the multimedia data rate in order to compliant with the network's bandwidth. Scalable encryption techniques can generate the data stream that can be correctly decrypted after bit rate conversion. Ubiquitous multimedia services make the user share any kind of content anywhere. The book includes fourteen chapters highlighting current concepts, issues and emerging technologies. Distinguished scholars from many prominent research institutions around the world contribute to the book. The book covers various aspects, including not only some fundamental knowledge and the latest key techniques, but also typical applications and open issues. For example, the covered topics include the present and future video coding standards, stereo and multiview coding techniques, free-viewpoint TV techniques, wireless broadcasting techniques, media streaming techniques, wireless media transmission techniques and systems, and User-Generated Content sharing.

Show Me Microsoft Office Outlook 2003 Steve Johnson,2003 Microsoft Office Outlook 2003 provides powerful new tools with which to get connected, manage information, and communicate with others. It is the most-changed application in this revision of the Office products, including an entirely new interface as well as improvements in junk mail blocking and security. Outlook 2003 takes advantage of the latest technologies such as XML and Microsoft SharePoint to extend desktop communication and meeting workspace collaboration over an intranet or the Internet. With these significant changes to both the look and functionality of the program, readers will benefit from the visual format of the Show Me series. All the most important tasks are covered, making this book ideal for new users as well as those upgrading from a previous version. Other features of the book include a Troubleshooting Guide to help solve common problems, a Project Guide with a listing of real-world projects by feature, and a MOS Exam Guide with a complete listing of MOS objectives and page numbers to locate tasks related to those objectives within the text. No other visual series includes this valuable feature.

**Webcasting Worldwide** Louisa S. Ha,Richard J. Ganahl,2013-03-07 Webcasting Worldwide tackles one of the most timely topics in mass communication today—the delivery of audio and video content via the Web, or webcasting—employing a global perspective to explore the subject. It is unique in providing a theoretical framework by which to analyze business models of emerging media, and it also examines the business practices of leading webcasters in the world's most developed broadband markets. With webcasting in its early development, the approaches discussed in this

volume set the standards for the webcasting industry. Representing the major broadband markets in the world, this text is an authoritative and valuable reference for both researchers and practitioners. The chapters relate the business practices of webcasting to the media market environment and established media industries, such as television and radio, as well as government and non-profit organizations. Downloadable resources offer PowerPoint charts for use in training, education, and research, along with tables, graphs, screenshots, and hyperlinks. Webcasting Worldwide is essential reading for academic researchers and media industry practitioners, and the volume will be a useful text in advanced courses addressing media technology, media management, and international communication. For updates about the book chapters and latest commentaries on topics related to webcasting business models, please visit the Webcasting Business Models Blog at <http://webcastingworldwide.blogspot.com> Winner of The Association for Education in Journalism and Mass Communication Picard Award for Media Management and Economics 2007.
