## New York's Underground Art Museum Sandra

Bloodworth, William Ayres, 2014-11-11 Initiated in 1985, the MTA Arts & Design collection of public art now encompasses more than 250 projects, creating a dynamic underground museum of contemporary art that spans the entire city and its immediate environs. Since the program was founded, a diverse group of artists—including Elizabeth Murray, Faith Ringgold, Eric Fischl, Romare Bearden, Acconci Studio, and many others—has created works in mosaic, terra-cotta, bronze, and glass for the stations of the New York City Subways and Buses, Metro-North Railroad, Long Island Rail Road, and Bridges and Tunnels. An update of the classic *Along the Way*, this expanded edition features nearly 100 new works installed in stations since 2006, including Sol LeWitt's *Whirls and twirls* (MTA) at Columbus Circle, Doug and Mike Starn's *See it split, see it change* at South Ferry, and the James Carpenter/ Grimshaw/ Arup *Sky Reflector-Net* at Fulton Center. The book illustrates how the program has taken to heart its original mandate: that the subways be “designed, constructed, and maintained with a view to the beauty of their appearance, as well as to their efficiency.” MTA Arts & Design is committed to preserving and restoring the original ornament of the system and to commissioning new works that exemplify the principles of vibrant public art, relating directly to the places where they are located and to the community around them. The definitive guide to works commissioned by MTA Arts & Design, a reference for riders who have wondered about an artist or the meaning behind the art they've seen, as well as a memento for visitors, New York's Underground Art Museum provides 300 color illustrations and insightful descriptions sure to infuse any future trip or viewing with a fresh appreciation

and understanding of this historic enterprise.

**Use of Electronic Passenger Information Signage in Transit** Carol L. Schweiger, 2013 TRB's Transit Cooperative Research Program (TCRP) Synthesis 104: Use of Electronic Passenger Information Signage in Transit documents U.S. and international use of electronic passenger information signage in terms of the underlying technology, sign technology, characteristics of the information, resources required, and decision processes used to determine its use--Publication page.

Charlie on the M. T. A. Julia O'Brien-Merrill, 2017-07-25 Do you know why the transit fare card in Boston is called the CharlieCard? Young readers will find out, and should bring an extra nickel along, when they hop aboard the T to follow Charlie through the streets of Boston in 1949. The full-page magical illustrations of Caitlin Marquis will take readers on a ride above and below the streets of Boston as they were in Charlie's time, zooming past familiar landmarks--many still standing, some long gone--wondering all the while, will Charlie ever return? Julia M. O'Brien-Merrill sets the story straight using original historical documents and the original M.T.A. song lyrics of the mayoral campaign song, written by Bess Lomax Hawes and Jackie Steiner, for her father Walter A. O'Brien, Jr. A timeline at the end of the book has juicy tidbits of Boston's history surrounding this time-honored folk song, made famous by the Kingston Trio, and will inform and enthrall readers young and old.

**Web Information Systems and Technologies** Joaquim Filipe, José Cordeiro, 2011-08-03 This book contains the thoroughly refereed and revised best papers from the 6th International Conference on Web Information Systems and Technologies, WEBIST 2010, held in Valencia, Spain, in April 2010, organized by the Institute for Systems and Technologies of Information, Control and Communication

(INSTICC), in collaboration with ACM SIGMIS and co-sponsored by the Workflow Management Coalition (WFMC). The 21 papers presented in this book were carefully reviewed and selected from 205 submissions. The papers are grouped into four parts on Internet Technology; Web Interfaces and Applications; Society, e-Business, and e-Government; and Web Intelligence.

*New York Subways* Gene Sansone, 2004-11-29 The first subway line in New York City opened on October 27, 1904. To celebrate the centennial of this event, the Johns Hopkins University Press presents a new edition of Gene Sansone's acclaimed book, *Evolution of New York City Subways*. Produced under the auspices of New York's Metropolitan Transit Authority, this comprehensive account of the rapid transit system's design and engineering history offers an extensive array of photographs, engineering plans, and technical data for nearly every subway car in the New York City system from the days of steam and cable to the present. The product of years of meticulous research in various city archives, this book is organized by type of car, from the 1903–04 wood and steel Composite cars to the R142 cars put into service in 2000. For each car type, Sansone provides a brief narrative history of its design, construction, and service record, followed by detailed schematic drawings and accompanying tables that provide complete technical data, from the average cost per car and passenger capacity to seat and structure material, axle load, and car weight. Sansone also includes a helpful subway glossary from A Car (the end car in a multiple car coupled unit) to Zone (a section of the train to the conductor's left or right side). Subway and train enthusiasts, students of New York City history, and specialists in the history of technology will appreciate this updated and authoritative reference work about one of the twentieth century's greatest urban

achievements.

*Report; 4th* Colorado State Board of Health,2021-09-09 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

**722 Miles** Clifton Hood,2004-08-23 When it first opened on October 27, 1904, the New York City subway ran twenty-two miles from City Hall to 145th Street and Lenox Avenue—the longest stretch ever built at one time. From that initial route through the completion of the IND or Independent Subway line in the 1940s, the subway grew to cover 722 miles—long enough to reach from New York to Chicago. In this definitive history, Clifton Hood traces the complex and fascinating story of the New York City subway system, one of the urban engineering marvels of the twentieth century. For the subway's centennial the author supplies a new foreword explaining that now, after a century, we can see more clearly than ever that this rapid transit system is among the twentieth century's greatest urban achievements.

**Information Management: Course Outline and Materials** James

Drogan,

*Marc Patrick Stakem*, 2016-12-19 MARC is the Maryland Rail Commuter service, operating in the Baltimore/Washington area. MARC began operating in 1974. MARC trains are operated by Amtrak on the Penn Line, and CSX Transportation on the Camden and Brunswick Lines under contract to the Mass Transit Administration (MTA) of the Maryland Department of Transportation (MDOT). The MTA acquired control of MARC, Maryland's commuter rail system, under legislation by the Maryland General Assembly in 1992. MARC had been providing service throughout the Baltimore-Washington metropolitan area for 18 years at that time. The Maryland Department of Transportation has broader responsibilities than commuter rail; it oversees bus and subway systems, roads, airports, and the Port of Baltimore. Besides giving the history of MARC and the details of its stations and equipment, this book is designed as a ride-along guide that you can take with you, whether on your daily commute, or using the MARC rail to explore sections of the great cities it serves. The stations are presented in alphabetical order for easy access. A bit of history and information on the surroundings are given for each station. For those who are interested in the motive power and rolling stock, a brief description of the locomotives and rolling stock is given. A bibliography is included. The latest edition has additional information on the pending Purple Line of street cars, and its connections with MARC, as well as information on the planned MagLev system.

**NYCTA Objects**, 2017-10-24 The evolving design of New York subway ephemera: a collector's story New York City Transit Authority: Objects originated as a photography experiment. In 2011, New York photographer Brian Kelley began documenting collections of used MetroCards in his Brooklyn studio, arranging them in various grids with the goal of perfecting the lighting of an image. His brother suggested he make the grids more interesting by finding other types of cards. Having exhausted his search for discarded MetroCards in many of the city's 472 subway stations, Kelley turned to eBay for new finds. The online rabbit-hole gave him a crash course in the history of NYC transportation. He discovered tokens dating back to 1860, a ticket stub from 1885 when it cost three cents to take the train across the Brooklyn Bridge, as well as patches, matchbooks, tokens, timetables, pins and signs, posting his photographs of these finds on Tumblr and Instagram. Six years on, many MTA employees follow and advocate his project, sometimes contacting him with information and tips on rare items. As the collection grew, Kelley recognized that there were no comparable digital archives documenting the city's

transportation evolution. New York City Transit Authority: Objects is a story told through the evolving design that spans decades of the city's history. Kelley's objects tell a greater story of New York's past. For him, The NYCTA Project remains a photography experiment and self-funded hobby, archiving the culture of his home city. For the reader, it's an intimate view of the city's history that merges design and infrastructure over the past 150 years.

Technology vs. Government Lloyd Levine, 2024-03-19

Technology vs. Government examines why government fails at technology acquisitions, innovation, and implementation, the impact on people, and the future opportunities and implications for government service, administration and policy.

Climate Change Adaptation in North America Walter Leal

Filho, Jesse M. Keenan, 2017-05-27 This edited book responds to the need for a better understanding of how climate change affects North America and for the identification of processes, methods and tools that may help countries and communities to develop a more robust adaptive capacity. It showcases successful examples of how to manage the social, economic and environmental complexities posed by climate change. The book attempts to synthesize various branches of resilience and adaptation scholarship into a cohesive text that highlights field research and best practices that are shaping policy and practice in a wide geography from the coastal conditions of the Caribbean to the thawing landscape of the Arctic Circle.
