My Big Book of Sounds Kiko,2019-09-24 Ding dong! Flush! Moo! Roar! What's that sound? Press the buttons to find out! Listening is an important part of language development, and Twirl's first sound book will engage very young children as they explore sounds and words found in familiar settings, and perhaps some not-so-familiar ones. The 20-button sound panel includes 100 sounds and words; each button accompanies a spread where the actions, objects, and animals are named, followed by the appropriate sounds. From sounds in the home and on the street to sounds in the jungle and even in the ocean, little ones will be able to quickly identify sounds and name the animals and objects that make them. Big sounds for little ears!

Sound and the Aesthetics of Play Justin Christensen,2017-12-08 This book is an interdisciplinary project that brings together ideas from aesthetics, philosophy, psychology, and music sociology as an expansion of German philosopher Hans-Georg Gadamer's theory on the aesthetics of play. This way of thinking focuses on an ontology of the process of musicking rather than an ontology of discovering fixed and static musical objects. In line with this idea, the author discusses the importance of participation and involvement in this process of musicking, whether as a listener or as a performer. Christensen then goes on to critique and update Gadamer's theory by presenting incompatibilities between it and recent theories of aesthetic emotions and embodiment. He proposes that emotions are 'constructed' rather than 'caused', that the mind uses a system of 'filters' to respond to sonic stimuli and thus constructs (via play) aesthetic feelings and experiences. In turn, this approach provides music with a route into the development of social capital and inter-subjective communication. This work builds on the hermeneutical steps already taken by Gadamer and those before him, continuing his line of thought beyond his work. It will be of great interest to scholars in music aesthetics as well as a variety of other music related fields, including music psychology, philosophy and science and technology studies.

And with this book of fourteen everyday sounds, babies and toddlers are encouraged to interact with parents, caregivers, and the noisy world around them in ways that widen their sensory awareness and expand their vocabulary. From a tweeting bird to clanging pots, a beeping phone to honking cars, the splash! of water to the sound of a kiss--mmmwah!--this book is full of the sounds that fill a baby's day. Perfect for little hands to grasp, this is a delightful stand-alone or a lovely companion to Baby Signs.

Sound Souvenirs Karin Bijsterveld,José van Dijck,2009 In recent decades, the importance of sound for remembering the past and for creating a sense of belonging has been increasingly acknowledged. We keep sound souvenirs such as cassette tapes and long play albums in our attics because we want to be able to recreate the music and everyday sounds we once cherished. Artists and ordinary listeners deploy the newest digital audio technologies to recycle past sounds into present tunes. Sound and memory are inextricably intertwined, not just through the commercially exploited nostalgia on oldies radio stations, but through the exchange of valued songs by means of pristine recordings and cultural practices such as collecting, archiving and listing. This book explores several types of cultural practices involving the remembrance and restoration of past sounds. At the same time, it theorizes the cultural meaning of collecting, recycling, reciting, and remembering sound and music.
